SAFETY DATA SHEET

Section 1 – Products and Suppliers

**SDS: TiH Pastes-NFL-100A (04-2016)**

**Product Identifier:** Brazing Alloy Pastes with titanium hydride, nickel and non-flammable organic binders

**Other means of identification:** Wesgo Metals® Products: See Table 1 in Section 16 for specific products and their respective metal constituents.

**Use (and restrictions):** Metal alloys for joining or repairing metal components by brazing/soldering.

**Suppliers and emergency contact information:**
Morgan Advanced Materials/Wesgo Metals®
2425 Whipple Road
Hayward, California 94544 USA
+1-510-491-1100
0800-1700hrs local time, Mon-Fri.
mtchayward.msd@morganplc.com

**SDS Date:** 21 April 2016. Replaces previous version (SDS: TiH Pastes-NFL-100A) dated 26 Jan 2016.

Section 2 – Hazard Identification

These products are sold in a paste-like form in small containers and syringes. Containers and syringes should be kept sealed when not in use. Metal fumes and dust are generated during melting and brazing operations. Hazardous levels of dust or metal fumes of product constituents can create health risks, as described below. Metallic dust and particles can cause a serious fire and/or explosion hazard.

**2.1 Classification**

Under the Globally Harmonized System of Classification and Labeling and the US OSHA Hazard Communication Standard, dust and fumes released during brazing operations are categorized as hazardous: (incl. Classification according to Regulation (EC) No 1272/2008 [CLP])

- Carcinogenicity, Category 2 H351 due to the presence of nickel
- Skin sensitizer, Category 1 H317 due to the presence of nickel
- Specific target organ toxicity/repeated exposure, Category 2 H373 due to the presence of nickel
SAFETY DATA SHEET

2.2 Signal word, symbols, hazard and precautionary statements:

Warning

Hazard Statements:
H351   Suspected of causing cancer.
H317   May cause allergic skin reaction.
H373   May cause lung damage due to repeated or prolonged exposure.

Note: Accompanying alpha-numeric designations included to address EU regulations.

Precautionary Statements:
P201   Obtain special instructions before use.
P202   Do not handle until all safety precautions have been read and understood.
P260A  Do not breathe dust or fumes.
P270   Do not eat, drink or smoke when using this product.
P280A + P264  Wear protective gloves to prevent skin contact or thermal burns during brazing operations. Wash hands thoroughly after handling.
P302 + P352 + P333 + P313   If on skin: Wash with plenty of water.
P304 + P312   If inhaled: Call a poison center or doctor if you feel unwell.
P308 + P309 + P313   If exposed, concerned, or feel unwell: Get medical advice/attention.
P305 + P351 + P338 + P313   If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Other information about health hazards:
Dust and fumes generated during brazing operations can cause skin and eye irritation. Repeated or prolonged exposure to elevated concentrations of any airborne dust or fume can irritate or harm the respiratory system, especially as an aggravation to a pre-existing condition. Inhalation of significant quantities of very fine metal dust and metal fumes can cause “metal fume fever,” with flu-like symptoms. Avoid creating and breathing airborne dust and fumes.

Other information about physical hazards:
Brazing and soldering operations present a fire hazard to nearby combustible materials. Finely dispersed metal particles can form ignitable and explosive mixtures in air. Maintain good housekeeping.
Section 3 – Composition/Information on Ingredients

3.1 Mixtures:
See Table 1 in Section 16 for specific products and their respective metal constituents.

Section 4 – First Aid Measures

4.1 Description of first aid measures

Inhalation: Remove affected personnel to an exposure-free environment. If experiencing respiratory symptoms: Call a poison center or doctor if you feel unwell.

Skin contact: Wash hands with soap and water. If skin irritation or rash occurs: Get medical advice/attention.

Eye contact: Flush eyes with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. If necessary call a specialist.

Ingestion: Not applicable.

Indication of need for immediate medical attention and special treatment: Skin contact with hot metals or flames during brazing operations can cause thermal burns. Seek medical attention for severe thermal burns.

4.2 Most important symptoms and effects, both acute and delayed
No further relevant information available.

4.3 Indication of any immediate medical attention and special treatment needed
No further relevant information available.

Section 5 – Fire Fighting Measures

5.1 Extinguishing media

Suitable extinguishing media:
Use dry chemical or carbon dioxide.

Unsuitable extinguishing media:
Do not use water on a metal fire.
5.2 Special hazards arising from the substance or mixture
Combustion hazards:
Flames from brazing operations can ignite combustibles. In a finely divided form, this product may ignite when exposed to flames or by reaction with incompatible materials. Metal oxides or fumes of constituent metals may be emitted during a fire.

5.3 Advice for firefighters
Special fire-fighting procedures:
Use protective clothing and breathing equipment appropriate to the surrounding fire.
Unusual fire and explosion hazards:
Metal powder mixtures can cause fires and/or explosions when present in air at high concentrations.

Section 6 – Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures
No special measures required.

6.2 Environmental precautions:
No special measures required.

6.3 Methods and material for containment and cleaning up:
Metal scrap should be collected and contained using normal procedures. Metal particulates, shavings, powders and granules should be cleaned up using wet-sweeping methods to avoid creating dust. Vacuum only with HEPA filtered equipment. Do not use compressed air for clean-up. Some fine metal powders may ignite or explode under specific conditions; avoid creating high airborne dust concentrations and accumulating dust. Appropriate personal protective equipment should be used when cleaning up dust. Recovered material should be placed in sealed containers and recycled for their metal content. Dispose in accordance with applicable waste disposal regulations.

6.4 Reference to other sections
See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

Section 7 – Handling and Storage

7.1 Precautions for safe handling
Avoid skin contact; wash hands after handling chemicals. Do not eat, drink or smoke while handling these products. All employees who handle this material should be trained to handle it safely. Maintain good housekeeping practices, such as wet sweeping or vacuuming to remove dust accumulation. Avoid dust inhalation or ingestion and contact of materials with eyes. Certain metal powder mixtures can cause fires
SAFETY DATA SHEET
and/or explosions when present in air at high concentrations.

7.2 Conditions for safe storage, including any incompatibilities
Store in closed containers in a cool, dry, well-ventilated, fire-resistant area away from oxidizing agents and sources of heat and ignition.

7.3 Specific end use(s)
No further relevant information available.

Section 8 – Exposure Controls and Personal Protection

8.1 Control parameters
Exposure limits and guidelines:

<table>
<thead>
<tr>
<th>Component</th>
<th>OSHA PEL 8-Hr TWA</th>
<th>ACGIH TLV 8-Hr TWA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nickel (Ni)</td>
<td>1 mg/m³</td>

</tr>
<tr>
<td>Propylene glycol</td>
<td>None established</td>
<td>None established</td>
</tr>
<tr>
<td>Titanium hydride</td>
<td>None established</td>
<td>None established</td>
</tr>
</tbody>
</table>

Other jurisdictions may have different exposure limits and control guidelines. Users are advised to consult and comply with local regulations.

8.2 Exposure controls
Engineering controls:
Use local exhaust ventilation during brazing operations to minimize or eliminate concentrations of airborne contaminants.

Personal protective equipment:
Wear protective gloves to prevent skin contact or thermal burns during brazing operations. Use NIOSH-approved respiratory protective equipment if exposures exceed established limits or guidelines.

General hygiene considerations:
Do not eat, drink or smoke when handling these products. Wash hands after handling these products.

Limitation and supervision of exposure into the environment
The legal issue values and limitations are to be paid attention!

Section 9 – Physical and Chemical Properties

Decomposition temperature:  Not applicable  
Viscosity:  Not applicable  

9.2 Other information
No further relevant information available.

Section 10 – Stability and Reactivity

10.1 Reactivity

10.2 Chemical stability
Braze alloy products are stable when stored in closed containers at room temperature under normal storage and handling conditions.

10.3 Possibility of hazardous reactions
Heating to elevated temperatures may liberate metal/metal oxide fumes (i.e., during brazing operations). Metal powder mixtures can cause fires and explosions (if present at high airborne concentrations).

10.4 Conditions to avoid:
Avoid open flames around fine metal powders.

10.5 Incompatible materials:
Metals in particulate form are typically incompatible with strong acids and strong oxidizing agents.

10.6 Hazardous decomposition products:
No dangerous decomposition products known.

Section 11 – Toxicological Information

11.1 Information on toxicological effects
User-generated dusts and fumes may, on contact with the skin or eyes, produce mechanical irritation. Chronic exposures could cause dermatitis (skin) or conjunctivitis (eyes). Excessive inhalation of powders or user-generated fumes from welding/ brazing with these products may, depending on the specific features of the process used, pose a long-term health hazard. The composition of fumes and gases generated in user operations will depend on the metal alloy, base metal and the specific process being used and may include metals, metal oxides, carbon monoxide, ozone, and oxides of nitrogen.
SAFETY DATA SHEET

The International Agency for Research on Cancer (IARC) classifies metallic nickel as a Category 2B carcinogen (possible carcinogenic to humans). The US Department of Health and Human Services National Toxicology Program (NTP) classifies nickel as reasonably anticipated to be human carcinogens based on limited human evidence and laboratory testing of animals. Additional toxicological information is available through the U.S. National Institute for Occupational Safety and Health (NIOSH) and the Registry of Toxic Effects of Chemical Substances (RTECS). See website: http://www.cdc.gov/niosh/ipcsneng/nengrtec.html. Applicable product constituents and their respective RTECS numbers are listed below:

</tbody>
</table>

Section 12 – Ecological Information

12.1 Toxicity
When used in their intended manner, these products would not be expected to be released to the environment. Adverse effects on ecosystems are not anticipated under normal and recommended conditions of handling, use, storage and disposal. None of the constituents in these products are classified as environmentally persistent, bio-accumulative toxic chemicals.

Section 13 – Disposal Considerations

13.1 Waste treatment methods
Manage waste materials in accordance with applicable waste and disposal regulations. Whenever possible, try to recycle and reclaim due to the intrinsic value of certain braze alloy constituents. Whatever cannot be saved for recovery or recycling should be shipped to a permitted waste management facility. Process, use or contamination of this product may change the characteristics of the waste and, consequently, how the waste is managed.

Section 14 – Transport Information

Braze alloy pastes in this group contain non-flammable gel binders and are, therefore, not regulated by the U.S. Department of Transportation.

Special precautions for user
See Section 6 – 8.

Section 15 – Regulatory Information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
- Nickel in dust form is a hazardous substance as defined by the U.S. Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

SDS TiH Pastes-NFL-100A (04-2016)
SAFETY DATA SHEET

- All brazing product components are listed on the U.S. Toxic Substances Control Act (TSCA) inventory.
- Certain braze alloy products contain nickel, which is subject to the reporting requirements of Section 313 of the U.S. Emergency Planning and Community Right-to-Know Act (SARA Title III). Refer to Table 1 in Section 16 for applicable products.
- Metallic nickel is listed on the list of “Chemicals known to the State of California to cause cancer or reproductive toxicity.”

Section 16 – Other Information

Revision Summary: 15 April 2015: SDS revised to comply with US OSHA Hazard Communication Standard and GHS requirements.
26 Jan 2016: Alpha-numeric designations added to Section 2 hazard statements.
21 April 2016: SDS enhanced to comply with Regulation (EC) No 1272/2008 [CLP].
