

PRESS RELEASE

Job No. PR062/16

Issue Date: July 2017

Morgan Advanced Materials enhances bomb suit capability with specialist Silverback® CBRN Visor

A specialist Explosive Ordnance Disposal (EOD) helmet visor has been launched by Morgan Advanced Materials, which integrates with its cutting edge Silverback® 4020 Elite bomb suit. This has been made available in response to increased demand for chemical, biological, radiological, and nuclear (CBRN) protective garments.

Designed as an additional option for Morgan's acclaimed Silverback® 4020 Elite bomb disposal suit, the Silverback CBRN visor allows for the seamless integration of in-service CBRN masks. Featuring a wider surface area to accommodate the wearing of a CBRN facemask and respiration equipment, the visor delivers a range of benefits including powerful demisting technology and a wide field of vision for optimal situational awareness, helping to maximise the safety of the wearer. The latest innovation is the outcome of more than a year of research and development, and has undergone extensive blast testing to ensure full protection for the wearer.

The unique design of the Silverback CBRN visor allows for seamless integration with leading in-service CBRN facemasks and protective undergarments. Designed to ensure full compatibility as a complete CBRN garment system, the Silverback 4020 Elite features Modular Lightweight Load-carrying Equipment (MOLLE) attachments on the rear of suit jacket which allow for air purification and respiratory systems and other critical accessories to be attached.

Chris Davies, Technical Director at the Composites and Defence Systems business of Morgan Advanced Materials, explained: "The launch of our Silverback CBRN visor represents a significant

PRESS RELEASE

technological breakthrough and step change in the application of our bomb suits. We are proud to have developed an EOD suit solution, which is compatible with most in-service CBRN garments to protect EOD teams from an array of threats.”

The Silverback CBRN visor is available to buy with the Silverback 4020 Elite bomb suit, or as a standalone purchase for existing Silverback 4020 Elite customers who wish to upgrade to a CBRN protective solution.

About Morgan Advanced Materials

Morgan Advanced Materials is a global materials engineering company which designs and manufactures a wide range of high specification products with extraordinary properties, across multiple sectors and geographies.

From an extensive range of advanced materials we produce components, assemblies and systems that deliver significantly enhanced performance for our customers’ products and processes. Our engineered solutions are produced to very high tolerances and many are designed for use in extreme environments.

The Company thrives on breakthrough innovation. Our materials scientists and applications engineers work in close collaboration with customers to create outstanding, highly differentiated products that perform more efficiently, more reliably and for longer.

Morgan Advanced Materials has a global presence with over 10,000 employees across 50 countries serving specialist markets in the energy, transport, healthcare, electronics, petrochemical and industrial sectors. It is listed on the London Stock Exchange in the engineering sector.
