Materials advancement for a sustainable future

ANNUAL REPORT 2021
Significant trends shape our modern world, accelerating the demand for new and more sustainable advanced materials.

At Morgan Advanced Materials, we use advanced carbon and ceramic materials to support the move to a more sustainable world. Our people are driven to solve complex customer problems, from managing heat and enabling greener technologies, to supporting improved medical diagnostics and protecting life.

Our purpose is to use advanced materials to make the world more sustainable, and to improve the quality of life. This purpose is underpinned by our safe, ethical and inclusive culture, embraced by our 7,800 employees spanning over 25 countries. Working across many industries and in a number of markets, we deliver the materials science and technologies the world needs now.

OUR STRATEGY
We are a global advanced manufacturing organisation with leading capabilities in three areas: materials science, application engineering and customer focus.

Read more on page 10

OUR BUSINESS MODEL
We operate in two global divisions and five global business units. We empower our global business unit teams, giving them considerable autonomy and enabling them to act quickly and support their customer needs. Our broad manufacturing footprint enables us to supply customers locally from a short supply chain.

¹. Throughout the Annual Report, including the Strategic Report, adjusted measures are used to describe the Group’s financial performance. These adjusted measures are not recognized under IFRS or other generally accepted accounting principles (GAAP). These measures are shown because the Directors consider they provide useful information to shareholders, including additional insights into ongoing trading and year-on-year comparisons. These non-GAAP measures should be viewed as complementary to, not replacements for, the comparable GAAP measures. Throughout this Report these non-GAAP measures are clearly identified by an asterisk (*) where they appear in text, and by a footnote where they appear in tables and charts. Definitions and reconciliations of non-GAAP measures to GAAP measures are included in the Annual Report.

OUR ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG) CREDENTIALS
In line with our purpose we have set stretching ESG goals:

- To improve the way we manufacture and design our products, seeking sustainable manufacturing processes and better environmental outcomes for the customer.
- To enhance social factors to keep our people safe, and to ensure we provide meaningful work that contributes to an improved society and enables the communities where we live and work to thrive.
- To deliver robust governance ensuring we operate to high ethical standards and meet our local, regional and global obligations as a UK listed global Group.

WE HAVE WORKED HARD TO BUILD OUR CAPABILITIES AND IMPROVE OUR PROCESSES, AND THIS FOUNDATION HAS ENABLED US TO DELIVER STRONG ORGANIC GROWTH AND EXPAND OUR MARGINS, DESPITE SOME OF THE SUPPLY CHAIN CHALLENGES AS THE GLOBAL ECONOMY RECOVERS.

Pete Raby
Chief Executive Officer
CHAIRMAN’S STATEMENT

Douglas Caster CBE FIET
Chairman

In 2021 we continued to make good progress in delivering our strategy and the results demonstrate that we are well positioned for the long term. I am proud of the way our people have performed during the challenging environment owing to the COVID-19 pandemic and achieved the results for 2021 which demonstrate increasing demand for our products, driving increases in revenues, profitability and cash flows.

SAFETY OF OUR PEOPLE

The people in our business have shown strength and stamina facing the challenges of 2021. COVID-19 protocols are still in place across all our sites, and we have experienced temporary interruptions during peak infection periods. Demand for our products has increased through the year and sites are operating at full capacity in some instances. I would like to thank our people for their hard work and commitment.

The first imperative is the safety of our people and I am disappointed that during 2021 our safety performance dipped. Supporting executive management, your Board has spent a significant amount of time discussing safety performance and overseeing a new approach to safety culture. These discussions have emphasised a more holistic approach to safety and this now encompasses greater focus on the wellbeing of our people. My fellow non-executive Directors and I will continue to support management to achieve a position of ‘zero harm’.

ENVIRONMENT AND STRATEGY

We are working to reduce the Group’s environmental impact, and this has become an increasingly important area not only for you, our shareholders, but also our customers, suppliers and employees. I am pleased by the progress we have made to date and the opportunities we have identified for the future. Not only are we making our manufacturing processes more efficient and reducing our CO2e emissions, but more importantly our products, which have properties to withstand heat and endure other extreme environments, assist our customers in reducing their environmental impact, either by lasting longer or improving the efficient use of resources.

During 2021, we set our execution priorities for the next three years and these are explained in more detail in the Chief Executive Officer’s Report. Following the restructuring and efficiency programme which completed in 2021, we are well positioned for growth and will focus on opportunities to innovate in faster-growing markets, whilst further developing our service to customers.

I strongly believe that the next phase of our strategy, whilst including stretching targets for our environmental performance and focus on our people and their safety, supports Morgan’s purpose to use advanced materials to make the world more sustainable, and to improve the quality of life.

FINANCIAL PERFORMANCE

Morgan’s financial health has improved significantly during recent years, and this is reflected in a progressive dividend payment policy. The Board considers the allocation of capital carefully and the investments needed for the future of the business. The Group has made good progress in reducing debt, proactively managing the defined benefit pension deficit and improving cash generation.

BOARD CHANGES

Later this year we will say goodbye to Peter Turner who has been Chief Financial Officer since 2016. On behalf of the Board I would like to thank Peter for his support and significant contribution to the Group over the last five years. Peter has worked tirelessly and successfully to strengthen the financial position of the Group, and his calm and rigorous leadership has been invaluable to the Board and executive team. He leaves the Group much stronger and healthier than when he arrived, and we wish him well in his retirement.

Richard Armitage will join the Board as Chief Financial Officer in May 2022 and we look forward to welcoming him to the Group.

OUTLOOK

The global business environment continues to be challenging. The role of the Board is more important than ever in assisting executive management to navigate through the competing priorities of managing the business day to day, whilst continuously looking to the future in order to secure the Group’s position. The fulfilment of our purpose, execution of our strategy and focus on environmental, social and governance matters support the position of the Group for the long term, and I am confident for the future.

Douglas Caster CBE FIET
Chairman
STATEMENT BY THE DIRECTORS IN PERFORMANCE OF THEIR STATUTORY DUTIES IN ACCORDANCE WITH SECTION 172(1) CORPORATE ACT 2001

The Board is committed to the creation of value through sustainable growth. When making decisions and considering key matters of business, the Board considers the implications of these decisions for the long-term, taking account of the interests of the Group’s key stakeholders and how decisions might impact them, and has regard to the need to maintain high standards of business conduct and our commitment to environmental, social and governance (ESG) matters.

HOW THE BOARD TAKES STAKEHOLDER INTERESTS AND OTHER MATTERS INTO ACCOUNT

All decisions and business conducted by the Board are considered in the context of Morgan Advanced Materials’ overarching purpose to ensure alignment.

During 2021, the Board reviewed the Group’s key stakeholders and confirmed that they continue to be its investors, customers, employees, suppliers, pensioners and pension trustees and communities. Our key stakeholders, why they are significant, the main methods we use to engage with them, and the issues of interest to them are set out on pages 6 and 7.

Further information on the mechanisms used by the Board to engage with key stakeholders, in particular with investors and the workforce, and details of the issues raised by them as a result of the engagement and the effectiveness of the methods of engagement, can be found on page 30 of the Sustainability and Responsibility section and pages 64 to 70 of the Corporate Governance Report.

HOW THE BOARD TAKES DECISIONS

A robust governance framework ensures that the appropriate decisions are referred to the Board for consideration. Further information on the Company’s governance structures, delegation of authority and how the Board operates is set out in the Corporate Governance Report on pages 44 to 46. The Board reviews the Group’s principal and emerging risks regularly and takes into account the Group’s appetite for risk when taking decisions.

The Board spent time during 2021 engaging with a diverse cross-section of employees, customers, stakeholders and assessing the Group’s culture. These insights have informed the Board’s discussion when assessing progress in relation to fostering a safe, ethical and diverse culture. These insights have informed the Board’s discussion when assessing progress in relation to fostering a safe, ethical and diverse culture.

The principles and key matters considered by the Board during 2021 are set out on pages 68 to 69 of the Corporate Governance Report.

CONSEQUENCE OF ANY DECISION IN THE LONG TERM

The Board considers the long-term success of the Group when making its decisions. For example, when monitoring the implementation of the Group strategy, approving investments in new product development, approving capital expenditures to upgrade plant and equipment and in new equipment and technology under development for Morgan’s people. Information on the Group’s purpose and strategy, and how these serve to guide the long-term direction of the Group, is set out on page 10.

KEY DECISIONS TAKEN DURING 2021

1. Approval of a new environmental, social and governance (ESG) strategy which sets goals for 2030 in relation to safety performance, CO2e emissions, water usage, employee engagement and diversity and inclusion.

2. The decision was taken: the strategy was developed by combining the ESG aspects that investors are focused on and how these are aligned with Morgan’s business to determine five priority areas. The Board of Directors had oversight of the process to develop the strategy and reviews progress at each Board meeting.

3. How stakeholder interests were taken into account:
   - Workforce – A cross-section of employees were asked for their views on the most important ESG issues to the business and this assessment was taken into account by the Board when selecting the main objectives of the ESG strategy and the key issues to focus on and improve.
   - Customers – Our ESG performance is increasingly important to our customers who view us as partners who share the same values and approach to conducting business responsibly. This safeguards our customers’ reputation and ensures that we remain a reliable partner in their supply chain for the long term. Consequently, our customers expect us to be able to demonstrate ESG performance and plans for improvement.
   - Suppliers – Our suppliers are our partners and it is important to support the steps we take to maximise efficiency and remain competitive.
   - Community – There is a widespread expectation that large corporate businesses responsibly, minimise the use of resources and take steps towards a more sustainable future.
   - Investors – The integration of ESG into our long-term business strategy responds to demands from investors for companies to manage the environmental and social impacts of decisions they make. The Board ensures that the Group’s strategy ensures that our business has ESG policies and procedures and to improve safety performance in order to ensure the Group is able to maintain its reputation and reduce its carbon footprint.

4. Impact of the decision: the new strategy is being rolled out across the Group and will be a key component of the Group’s approach to sustainability and responsible investment. The decision serves to improve performance and support long-term growth.

5. How stakeholder interests were taken into account:
   - Investors – The Board received an overview of the Group’s strategy, which sets out a number of considerations including cash performance, level of financial indebtedness, position relative to financial covenants, contributions to the defined benefit pension schemes, dividend policy and investor needs, and proposals to invest to grow the business and to meet environmental and safety commitments.

6. How stakeholder interests were taken into account:
   - Customers – The Board determined that a prudent balance of reinvesting capital in the business with dividends paid to investors served these stakeholder groups’ interests for the longer term.

Impact of the decision: The Board approved the dividend policy.

4. Continuous review of the Group-wide restructuring programme to improve performance and support long-term growth which was approved and commenced in 2020, with the addition of further select small portfolio changes.

How the decision was taken: The Board received progress reports on the implementation of the restructuring programme from the dedicated project manager at each Board meeting.

How stakeholder interests were taken into account:
   - Employees – The Board considered the restructuring activities taken to be in the interests of employees in order to promote sustainable performance of the Group for the long term. The Board ensured that executive management provided clear and timely communication of the decision which impacted specific sites, and that there was meaningful dialogue on the changes between employees, their representatives and management.
   - Investors, customers, suppliers, pensioners and pension trustees and communities – The Board determined that the restructuring activities served these stakeholder groups’ interests for the longer term.

Impact of the decision: The restructuring programme efficiencies have contributed to the robustness of the Group which has a well placed for growth and to serve customers’ needs.

Further information on these significant decisions can be found throughout this Annual Report:
   - The Chairman’s Statement on page 3 and the Chief Executive Officer’s Review on pages 8 to 9 provides information on the strategic context;
   - The Review of Operations on pages 44 to 49 contains information on the restructuring programme;
   - The Group Financial Review on pages 50 to 52 provides information on measures taken in relation to the Group’s financial performance; and
   - Pages 18 and 19 of the Sustainability and Responsibility section contain information on our safety policy and performance.
Our stakeholders are key to the delivery of our strategy. Below we set out the many ways we engage with stakeholders and why their engagement matters.

### INVESTORS
Those who own shares or wish to own shares in Morgan Advanced Materials

Our investors provide capital for our business. We value this commitment and want to ensure investors have a deep understanding of our business, our strategy, the market environment and our governance arrangements.

It is important to us that we foster an open and transparent relationship to enable investors to make effective investment decisions.

We am to deliver great service so that our customers feel valued and choose us as their ‘go-to’ supplier. To do this effectively we need to listen to and engage with them.

We develop relationships with our customers based on mutual trust and constructive dialogue.

We have a diverse customer base across the globe, which we serve directly and also through joint venture partnerships and local suppliers.

We are seeing growing demand for advanced materials as customers push the boundaries of technology.

We have been working closely with our customers to develop new solutions for their next generation of products and processes.

We are providing products that are differentiated from those of our competitors.

### CUSTOMERS
Those who have purchased our products or will do so in the future

The relationship with our customers starts from the moment they look to find out about our products. We keep customers updated on the progress of our innovation and new product applications through digital and physical channels.

Our sales and service colleagues also keep customers updated on the progress of manufacturing, sometimes working alongside the customer to fine-tune the product and production process.

We also gather key feedback from customers about the service we provide and use this to help improve relationships and secure future business.

### EMPLOYEES
Anyone directly employed by Morgan Advanced Materials

Having people who bring a diverse range of talents and perspectives, and who feel engaged in their roles, is of paramount importance to our long-term success.

Our employees have been instrumental in making Morgan Advanced Materials the company it is today. They are key to driving the brand forward and ensuring it remains relevant in the future.

We work to attract, develop and retain the right people and ensure they are in the right roles.

### SUPPLIERS
Those from whom we purchase goods or services

We believe in an open and collaborative business approach and seek opportunities for innovation. This collaborative approach is particularly important to ensure a more sustainable supply chain.

We aim to use all our resources as efficiently as possible, minimising the environmental and social impact on our employees, our suppliers, our customers and the world around us.

### PENSIONERS AND PENSION TRUSTEES
Anyone directly employed by Morgan Advanced Materials

After more than 160 years in business, we would not be as strong as we are today without the combined efforts of all those who went before.

By keeping our pension commitments, we honour the hard work and dedication of both current and past employees.

### COMMUNITIES
Those who live or operate in areas where we work—such as employees, residents, businesses and charities

Our people live and work within water communities and relationships with these communities are key in supporting our business for the future.

Our relationship with local communities is mutually beneficial, offering us the ideal place to find the talent of tomorrow, while enabling our people to get involved in activities which directly benefit these communities.

We seek to build trust by understanding the issues core to our communities, operating responsibly and addressing concerns that are material to them.

We aim to create long-term relationships with the communities in which we operate, that drive positive change and help build a more sustainable future.

### HOW WE ENGAGE WITH STAKEHOLDERS

We engage with our investors directly through both the formal presentation of results and investor roadshows. We also use these opportunities to talk about the future and the longer-term plans for our business.

When asked, we complete investor questionnaires which give a further insight into key aspects of our business performance.

We provide a dedicated section on our website which offers timely information on how we are performing against our ESG targets, including full disclosure of metrics and ratings linked to environmental performance.

The Board is committed to fostering a safe, ethical and inclusive workplace and spends time engaging with a diverse cross-section of employees, as well as monitoring and assessing the Group’s culture. These insights help inform the Board’s discussions on health, safety and environmental matters, in monitoring progress in relation to embedding ethical conduct and implementation of the Morgan Code, and in strengthening the capabilities of our leaders and teams.

At a local level, leadership teams use feedback from surveys, focus groups, pilot groups, manager one-to-one conversations and employee communications to shape engagement activities with employees.

At a Group level, we solicit feedback through our social media channels both internally and externally, and through employee satisfaction platforms such as Glassdoor.

At all levels we engage on subjects important to our people including mental health at work, safety, the environment, developing a diverse and inclusive culture, and the important role of community and charity.

### WHAT MATTERS TO OUR STAKEHOLDERS?

- Capital gain through share price appreciation;
- Capital return via dividends;
- Profitability and business growth potential;
- Quality of governance;
- Responsibility and fairness;
- The protection of the environment through the use of more sustainable materials and the reduction of carbon emissions, reduction in water use and improved waste management;
- Demonstrating our ‘good governance’ approach throughout our decision making;
- Demonstrating the positive contribution we make to society through the employment opportunities we provide, through our interactions with the communities where we have our sites and through the support we provide to our people.

- Reliable and consistent service;
- Quality products;
- Ability to solve complex problems;
- Application engineering capabilities;
- A diverse and inclusive culture;
- Meaningful roles linked to our purpose;
- Human rights;
- The commitment of the Company to ensure the pension scheme is fully funded and any deficit reduction plan is maintained.

- The protection of the environment through the use of more sustainable materials and the reduction of carbon emissions, reduction in water use and improved waste management;
- Demonstrating our ‘good governance’ approach throughout our decision making;
- Demonstrating the positive contribution we make to society through the employment opportunities we provide, through our interactions with the communities where we have our sites and through the support we provide to our people.

- Cost efficiency;
- Environmental and social impact;
CHIEF EXECUTIVE OFFICER’S REVIEW

"I am extremely proud of how our people have worked together this year, looking out for each other and delivering for our customers. We made further progress with the execution of our strategy, strengthening our capabilities and improving the sustainability of our business."

Pete Raby
Chief Executive Officer

2021 was the second challenging year with the COVID-19 pandemic driving various restrictions on mobility and activity around the world. Demand recovered strongly across the global economy following the sharp slowdown in 2020, and the combination of high demand and the pandemic led to supply chain disruptions, and inflation in materials and labour in various parts of our business. Nevertheless, in spite of these challenges, we have made good progress as a business, with further implementation of our strategy and progress against our long-term goals. This resulted in strong growth and saw margins at their highest point in more than 20 years.

COVID-19
We have maintained our COVID-19 controls across the business as needed, in line with the requirements of local jurisdictions and our Group COVID-19 standards. Our employees have been diligent in following our protocols to keep each other safe. Sadly, we have seen further loss of life due to the pandemic, and our thoughts are with all those affected.

SUSTAINABILITY

Our purpose is to use advanced materials to make the world more sustainable and to improve the quality of life. In 2021, we set out five aspirations for our business together with goals for 2030. We have made good progress against each of these, and we are starting to see that reflected in some of our KPIs:

1. Zero harm: our employees, with a 2030 goal of a 50% reduction in scope 1 and 2 CO₂ emissions, additionally we will start to measure scope 3 emissions from 2023 onwards, with coverage increasing over time. Our teams across the business have embraced this challenge and put in place plans to improve our energy efficiency and switch to zero-carbon energy sources. During the year, we reduced our absolute CO₂ emissions by 17%.

2. Use water sustainably across our business, with 2030 goals of reducing water use and water use in high-stress areas by 30%. We have launched a number of capital projects to recycle water and improve water efficiency. They started to deliver some benefits in 2021 and will drive further improvements in 2022. Our water usage in the short-term increased by 15%, driven by business growth and changes in mix. Our water usage in stressed areas increased by 9%. We expect to make progress on reducing water usage in 2022 as our projects start to deliver.

3. A CO₂e net-zero business by 2050, with a 2030 goal of a 50% reduction in scope 1 and 2 CO₂ emissions, additionally we will start to measure scope 3 emissions from 2023 onwards, with coverage increasing over time. Our teams across the business have embraced this challenge and put in place plans to improve our energy efficiency and switch to zero-carbon energy sources. During the year, we reduced our absolute CO₂ emissions by 17%.

4. A workforce reflective of the communities in which we operate, with a 2030 goal of 40% of our leadership population being female. At the end of 2021, 29% of our leadership population were female, compared with 30% in the prior year. We are making a wide range of changes to improve our diversity, from amending policies, to training and changes in our approach to recruitment. We have also established our first employee resource group, Women@Morgan. It comprises a diverse group of women from across our business. They will review our approach and develop and drive changes to help us support women through their careers in our business.

5. A welcoming and inclusive environment where employees can grow and thrive with a 2030 goal of a top-quartile engagement score. We conducted an employee engagement survey in the fourth quarter of 2021 to understand how our employees are feeling and what we can do to improve. Our engagement score was 59%, a reduction from the 55% we scored when we last surveyed our people in 2019. We have much we can do to improve and will be communicating the results and developing plans in the early part of 2022.

DELIVERING OUR STRATEGY

Beyond our local environment, we have two priority areas where we want to develop our capabilities further:

1. Delighting our customers. Following on from our foundational work on sales effectiveness, we are working to shape our product and service offerings further based on customer needs, with the overall objective of making our business more customer-centric. We will be gathering customer feedback during 2022 through a range of channels and using that to understand our customer segments in more detail. This will enable us to tailor our product, service and support offerings more closely to customer needs.

2. Innovating to grow. We want to accelerate our growth, by winning in our core markets and increasing our exposure to four faster-growing market segments: clean energy, clean transportation, semiconductors and healthcare. We have been focusing our product development and business development efforts in these markets over the last several years to develop new and differentiated products that solve hard problems for our customers. During 2021 the organic revenue growth in these segments was 22% (excluding one-off solar projects*), and this represented around 20% of our revenue overall.

We have concluded our restructuring programme during the year by completing the last of our planned site closures as we move volumes to more efficient plants around the Group. This has improved our robustness as a Group, concentrating work where we have more scale and, in line with our targets, has delivered £20 million of annual savings by the end of 2021. Full-year run rate benefits of £23 million for 2022 remain unchanged.

GROUP FINANCIAL PERFORMANCE

The business grew strongly during the year reflecting good end-market demand and good execution by our teams. This led to a strong overall financial performance with the revenue growth driving expansion in profitability and cash flow.

- Group revenue in 2021 was £950.5 million, 4.4% ahead of the prior year at reported rates and 10.3% higher on an organic constant-currency basis.
- Statutory operating profit was £133.1 million, profit before tax was £104.3 million, basic earnings per share was 23.9p.
- Adjusted operating profit was £242.5 million, representing adjusted operating profit margin of 13.1%.
- Group adjusted earnings per share was £27.2p (2020: 18.4p).
- Basic earnings per share from continuing operations was 23.9p (2020: loss per share 8.46p).
- Net capital expenditure* was £28.1 million (2020: £28.6 million), with investment focused on health, safety and environmental improvements, improvements in efficiency, select capacity expansion and improvements to the underlying infrastructure of the Group.
- Free cash flow before acquisitions, disposals and dividends* was £66.2 million (2020: £24.4 million).
- Net debt excluding lease liabilities* was £66.7 million, with net debt excluding lease liabilities to EBITDA* ratio of 0.3x.

Overall, our results demonstrate the improvements we have made to the business in the last six years, with significant expansion in adjusted operating profit margins arising from both the growth in the business and the benefits of our restructuring programme.

OUTLOOK

We have seen good order momentum coming into the year and anticipate organic revenue growth of 4 to 7% in 2022, assuming no significant change in market momentum. With our investments in new products and new technologies, we plan to increase further our exposure to our faster-growing segments (clean energy, clean transportation, semiconductors and healthcare), and to continue to win in our core markets.

We will see higher inflation in 2022 and expect higher pricing and continuous improvement to offset this. We expect our margins to expand further reflecting the drop-through on our organic growth and the remaining 616-year benefits from our restructuring programme.

I would like to thank our employees for their outstanding commitment and support during the year as they have cared for each other while working diligently to meet the increased demand from our customers.

Pete Raby
Chief Executive Officer
Our strategy builds on our strengths and focuses the Group on scalable businesses in attractive markets, and on the development of our three core capabilities in customer focus, application engineering and materials science. To support our efforts in bringing together the parts of our strategy and to achieve our ESG goals we have three new execution priorities:

To create a ‘big positive difference’ making sure we govern our business the right way, looking after the environment, looking after our people and operating to high ethical standards. This priority supports our focus on working with the customer to help customers need our help. This priority supports our focus on the living and looking after our environment, looking after our people and operating to high ethical standards. This will enable us to tailor our product, service and customer segments in more detail. This will support our efforts in bringing together the parts of our strategy and to achieve our ESG goals.

Our purpose is to use advanced materials to make the world more sustainable and to improve the quality of life. This purpose guides our actions; it underpins our work to reduce our environmental impact, informs how we treat our people, and ensures we fulfil our responsibility for good corporate governance.

We deliver on our purpose through the products that we make and the way that we make them. We design and manufacture our products ethically and safely. Our products help keep people safe. We are proud to design fire protection in everything from cars to tunnels, and ships to oil platforms; our ceramic rollers help customers save energy; our products help keep people safe.

Alongside Pippin’s assistance, the team have worked to support Paul by providing specialist equipment, such as magnification devices and software through the UK Government’s ‘Support to Work’ scheme. These adjustments enable Paul to carry out all the tasks that his role requires, and mean we get Paul and his expertise in our business.

In addition, the team have introduced a flexible working arrangement, allowing Paul to adjust his hours of working to suit public transport timetables, whilst maintaining a full-time working week. Paul has even moved his desk to allow space for Pippin and his wheelchair. Paul shares his advice for creating a more inclusive workplace: “In my experience, if people know you have a disability, they are more likely to help you. So I think it is always better to be open about your disability, as this makes people aware that you may need a reasonable adjustment. When Paul’s sight was impacted, he was supported by amazing resources from Guide Dogs for the Blind on what to expect when working with a guide dog in the workplace. The team at Morgan then shared the information with everyone in Paul’s office, which made his experience easier, and meant everyone knew what to expect.”

This priority supports our focus on bringing together the parts of our strategy and to achieve our ESG goals.

We have an increasing need to reduce their energy consumption and CO₂ emissions; these customers need our help. This priority supports our focus on working with the customer to innovate in traditional heavy industries whilst also contributing to greener technologies for the future.

We want to accelerate our growth, by winning in our core markets and increasing our exposure to four faster-growing market segments: clean energy, clean transportation, semiconductors and healthcare. We have been focusing our product development and business development efforts in these markets over the last several years to develop new and differentiated products that solve hard problems for our customers.

- Clean energy. Growth in energy storage, brushes and slip rings for onshore wind applications and ceramic and carbon products used in solar panel manufacture;
- Clean transportation. Growth in our rail collector business for metro and main rail applications, and in water and vacuum pump components for electric vehicle applications;
- Semiconductors. Growth from carbon and ceramic consumable supply into key semiconductor process steps including crystal growth, deposition, lithography and etch;
- Healthcare. Growth from medical imaging and supply of low temperature insulation for medicine and vaccine transport and storage.

During 2021, organic constant-currency revenue growth in these segments was 22% (excluding one-off solar project*), and they represented 20% of our revenue overall.

Our purpose is to use advanced materials to make the world more sustainable and to improve the quality of life. This purpose guides our actions; it underpins our work to reduce our environmental impact, informs how we treat our people, and ensures we fulfil our responsibility for good corporate governance.

We deliver on our purpose through the products that we make and the way that we make them. We design and manufacture our products ethically and safely. Our products help keep people safe. We are proud to design fire protection in everything from cars to tunnels, and ships to oil platforms; our ceramic rollers help customers save energy; our products help keep people safe.

At Morgan Advanced Materials we are driven to live our purpose, by creating more sustainable products and manufacturing processes, and by creating an inclusive workplace. We support a number of awareness days throughout the year as a way to celebrate, educate and engage ourselves and others, and to highlight our desire to make a big positive difference.

“Being visually impaired impacts most parts of my life, which is why my guide dog Pippin goes everywhere I go, whether it be travelling for my hobbies or work. She is my eyes and keeps me safe.”

Paul Materials Procurement Co-ordinator

Awareness days include demonstrating support for positive changes to our environment and highlight the need for inclusivity, diversity and equity. Our Materials Procurement Co-ordinator Paul, shares his experience of adapting his work environment to support his visual impairment. For Paul this involves an additional member of the team, dedicated to his needs, guide dog Pippin.

When Paul’s sight was impacted, he was supported by amazing resources from Guide Dogs for the Blind on what to expect when working with a guide dog in the workplace. The team at Morgan then shared the information with everyone in Paul’s office, which made his experience easier, and meant everyone knew what to expect.

Alongside Pippin’s assistance, the team have worked to support Paul by providing specialist equipment, such as magnification devices and software through the UK Government’s ‘Support to Work’ scheme. These adjustments enable Paul to carry out all the tasks that his role requires, and mean we get Paul and his expertise in our business.

In addition, the team have introduced a flexible working arrangement, allowing Paul to adjust his hours of working to suit public transport timetables, whilst maintaining a full-time working week. Paul has even moved his desk to allow space for Pippin and his wheelchair. Paul shares his advice for creating a more inclusive workplace: “In my experience, if people know you have a disability, they are more likely to help you. So I think it is always better to be open about your disability, as this makes people aware that you may need a reasonable adjustment. When Paul’s sight was impacted, he was supported by amazing resources from Guide Dogs for the Blind on what to expect when working with a guide dog in the workplace. The team at Morgan then shared the information with everyone in Paul’s office, which made his experience easier, and meant everyone knew what to expect.”

This priority supports our focus on bringing together the parts of our strategy and to achieve our ESG goals.
DELIGHTING THE CUSTOMER

Our success comes from aligning everything we do to focus on the customer, and one of the ways we aim to delight a customer is by incremental improvements to our product offering.

Through continuous improvement efforts in 2021 we have delivered savings in time, energy and labour across the business. Examples of this include:

- Halving the production lead times for spot maintenance spare parts;
- Creating a ‘daily group accountability’ (DGA) process to ensure focus on safety, quality, delivery, inventory and productivity;
- Improving our saw blade replacement process, enabling a 40% work time reduction; and
- Implementing our new fully virtual sales effectiveness training, which allows us to deliver insights in more languages, ensuring that our people are better equipped to focus on our customers.

Our Commercial Process Manager in Augusta, Justin, commented on the impact of the training:

“VITAL TO MORGAN’S SUCCESS IS THE ABILITY OF OUR TEAMS TO SPEAK THE SAME ”SALES LANGUAGE” AND HAVE A COMMON GLOBAL APPROACH; THIS PROGRAMME ENABLES JUST THAT. OUR AIM IS TO DELIGHT OUR CUSTOMERS AND THIS TRAINING IS AN IMPORTANT FOUNDATIONAL PILLAR OF THAT JOURNEY.”

INNOVATING TO GROW

We deliver on our purpose through the products we make, as well as the way in which we make them.

We are developing the next generation of materials, processes and solutions to meet our purpose and position our business for the future.

- The thermal properties of our products have long been known as a key way to manage heat, but in 2021 it was our ability to manage cold that provided our latest innovation. In light of the requirement to store COVID-19 vaccines at 2-8°C, Morgan’s innovative Vacuum Insulation Panels (VIPs) provide the perfect solution to ensure that this precious cargo is correctly insulated in transit;
- In 2021 we announced a new research partnership with the Faraday Institution. This 15-month collaboration is dedicated to investigating the use of oxide ceramics as electrolytes. The initial focus has been on investigating lithium-ion conducting fibres for composite solid-state electrolytes, which might in turn support better electric vehicle (EV) batteries;
- Our partnership with the National Graphene Institute, in Manchester, UK, supports our understanding of interfacial interactions between different components of a composite. We are focused on carbon-related technology developments using new materials, such as graphene. This collaboration allows us to work with cutting-edge technology daily, whilst utilising the research in real-world applications throughout Morgan Advanced Materials.

IMPROVING QUALITY OF LIFE WITH OUR SUPPORT OF THE COVID-19 VACCINE DISTRIBUTION
Our purpose is to use advanced materials to make the world more sustainable, and to improve the quality of life.

This purpose guides our actions: it underpins our work to reduce our environmental impact, informs how we treat our people, and ensures we fulfill our responsibility for good corporate governance.

We play an important role in society, using our deep materials science knowledge and process capability to solve customer problems and deliver on our purpose.

**OUR PRODUCTS DELIVER ON OUR PURPOSE...**

- **Our thermal products** are used in high-temperature industrial processing of metals, petrochemicals, cement, ceramics and glass, and by manufacturers of equipment for automotive, marine, aerospace, and domestic applications in insulation and fire protection.
- **Our electrical carbon products** are used in the rail industry, for power generation, in the mining of iron and steel and to enable wind power generation.
- **Our seals and bearings products** are used in pumps for industrial and domestic use, or other sealing applications. We use advanced carbon/graphite, silicon carbide, alumina and zirconia materials to engineer lightweight, low-friction bearings and seals.
- **Our technical ceramics products** are used in selected segments of the electronics and semiconductor, energy, healthcare, industrial, petrochemicals, security and transport markets, typically in close collaborative customer relationships.
- **We manufacture** advanced ceramic materials, products and systems for thermal insulation in high-temperature environments.
- **We engineer** systems for the safety of people and equipment in demanding applications. Our products help customers, especially those operating energy-intensive processes, to reduce energy consumption, emissions and operating costs.
- **We manufacture** an extensive range of high-performance, energy-saving crucibles and foundry consumables for non-ferrous metal melting applications.
- **We produce** a wide range of products which are used to transfer electrical current between stationary and rotating or linear moving parts in motor, generator, and current collector applications.
- **We create** high-performance self-lubricating bearing and seal components, used predominantly in pumps.
- **We engineer** high-performance functional and structural ceramic materials, components and sub-assemblies to address customer-specific technical challenges.

**TO SERVICE MARKETS RANGING FROM INDUSTRIAL TO HEALTHCARE.**

**OUR STRATEGY BUILDS ON OUR STRENGTHS AND FOCUSES THE GROUP ON SCALABLE BUSINESSES IN ATTRACTIVE MARKETS.**

We have three core capabilities: 
- Materials science;
- Application engineering;
- Customer focus.

We serve markets that are growing and where we have room to grow, and where our customers value our differentiated products and services.

The Group’s products are produced within two global divisions and five global business units.

**Our Thermal Products division**, organised in two global business units:

- **Thermal Ceramics**
- **Molten Metal Systems**

**Our Carbon and Technical Ceramics division**, organised in three global business units:

- **Electrical Carbon**
- **Seals and Bearings**
- **Technical Ceramics**

**WE AIM TO BE A CO₂E´ TO THE SCIENCE-BASED DEVELOPMENT GOALS AND HAVE SIGNED UP TO THE SCIENCE-BASED TARGET INITIATIVE (SBT);**

**WE SUPPORT THE UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS AND HAVE SIGNED UP TO THE SCIENCE-BASED TARGET INITIATIVE (SBT);**

**WE UTILISE OUR DISTINCT COMPETENCIES...**

Our strategy builds on our strengths and focuses the Group on scalable businesses in attractive markets.

We have three core capabilities:
- Materials science;
- Application engineering;
- Customer focus.

We serve markets that are growing and where we have room to grow, and where our customers value our differentiated products and services.

The Group’s products are produced within two global divisions and five global business units.

**Our Thermal Products division**, organised in two global business units:

- **Thermal Ceramics**
- **Molten Metal Systems**

**Our Carbon and Technical Ceramics division**, organised in three global business units:

- **Electrical Carbon**
- **Seals and Bearings**
- **Technical Ceramics**

**WE AIM TO BE A CO₂E´ BY 2050.**

Excludes indirect emissions generated by our supply chain, distribution network and employee travel.
**SUSTAINABILITY AND RESPONSIBILITY**

**NON-FINANCIAL INFORMATION STATEMENT**

The information which follows is intended to explain our non-financial information, the relevant Group policies, the due diligence processes we follow to embed these policies and their effectivenss. Our business model on pages 14 and 15 provides an insight into the key resources and relationships that support the generation and preservation of value within Morgan.

**ENVIRONMENTAL MATTERS**

Our Environmental Policy sets out the Group's commitment to the protection of the environment in the communities where we operate, work and live. The Policy sets out our intention to reduce energy and water use, reduce our dependence on natural resources, and minimise the positive impact of our business on the environment.

We have engaged ERM CVS to provide our customers with innovative, sustainable solutions that improve the performance of their products, to deliver greater environmental and safety benefits to our customers.

**SOCIAL MATTERS**

We do not formal policies on community engagement. Employees are encouraged to support their community through a range of initiatives, for example volunteering and fundraising for good causes.

**HUMAN RIGHTS**

Our Human Rights Policy establishes our commitment to protect the human rights of everyone who works for the Company and all those who have dealings with us. The Policy is supported by the Morgan Code.

**ANTI-BRIBERY AND ANTI-CORRUPTION**

In March 2021, we set stretching targets to improve our environmental, social and governance performance and become a more sustainable business. We take these commitments seriously and have plans in place to deliver against them in the coming years, making a step change in our performance.

We are making investments in our manufacturing processes and technology to reduce the carbon footprint of our business. We are also investing in new materials and processes that improve the performance of our products, to deliver greater environmental and safety benefits to our customers.

We are monitoring emerging ESG risks against the changing business landscape, alongside collecting stakeholder feedback, and we continue to work to position our business for sustainable growth.
We are working towards our aspiration of ‘zero harm’ to all our employees. We are committed to conducting all our activities in a manner that builds a caring safety culture and develops a world-class safety system that supports this effort.

OUR 2021 PERFORMANCE
We have continued to work in a stringent manner with regard to COVID-19 and have maintained high standards across our sites in line with World Health Organization and local jurisdiction guidance.

Our key metric, the lost-time accident (LTA) frequency (namely, the number of LTAs per 100,000 hours worked) increased to 0.22. There was also a rise in the number of LTAs (+8 in 2020). We have refreshed our approach to safety with the goal of improving our safety culture, seeking to build a more caring safety culture where all of our people look out for each other and we learn from the incidents we experience. We are delivering these changes through our ‘thinkSAFE’ programme.

We have performed well against leading indicator metrics. Our near miss reporting has been strong with 33 per employee vs target of 2.5, our site ‘Don’t Walk By’ programmes have been very successful with a 91% action closure rate, our audit action closure rate was 98%, and all businesses achieved their visual safety leadership targets.

A key part in changing our safety culture is learning from what we do well. In 2021, we launched a positive recognition feature in our ‘Don’t Walk By’ app. This gives us the platform to capture what we are doing well and build upon our successes, not just our failures.

We have continued our quarterly topics with a focus on safety conversations, discussing with our people what a caring culture looks like and why it is important.

Our root cause analysis reviews have continued for lost-time accidents and significant near misses. We seek to learn as much as we can from incidents rather than blame individuals for their failures. We have created videos from some of our more serious incidents to help share learnings across the Group, and we continue to proactively capture our near misses to maintain a focus on the leading indicators for safety.

Progress has also been made on our safety alert programme. We completed a review of all lifting equipment across the business and implemented a standard that all sites have applied. The method and collaborative approach will form the basis of our implementation approach for the future.

Our risk programme also progressed with ‘hazard profiles’ carried out for all our sites and global business units. This provides guidance on where to focus efforts, based on the sites’ individual profiles.

At Morgan Advanced Materials, ‘thinkSAFE’ – developing our culture and responsibility

The five Morgan ‘thinkSAFE’ commitments to life for all our employees

1. ‘thinkSAFE’ – developing our culture
   - The caring culture we are aiming for is underpinned by our ‘thinkSAFE’ commitments. We are working through the roll out of commitment workshops to bring these commitments to life for all our employees throughout 2022.
   - Leading the commitments. We have developed an additional workshop, specific to leaders, outlining the mindset, skillset and toolset we require of our leaders to maintain momentum on our cultural journey. This will be rolled out in 2022.
   - New activities including a cultural survey, refreshed quarterly topics, and monthly scenarios, will be delivered throughout 2022. These activities are designed to help align and empower our people so that they live and breathe the ‘thinkSAFE’ commitments, every time, all of the time.

2. Systems – robust process safety
   - We aim to develop our EHS system further with a focus on robust implementation. We will work collaboratively across all business units to improve our processes and enable a longer-lasting impact at all our sites.
   - Hazard profiles documented in 2021 provide site-specific focus areas, which allow for targeted improvement at each site. The profiles will be used to devise site improvement plans in 2022.

POLICY GOVERNANCE
Governance of the Health and Safety Policy is achieved through performance monitoring and the management and mitigation of identified risks to drive continuous improvement in our health and safety performance.

We are committed to providing effective leadership in terms of safety and health workplace. The Chief Executive Officer, global business unit leadership and site management teams are responsible and accountable for health and safety performance. The Group’s Health and Safety Director is responsible for Group direction and the oversight of the Group’s strategic programmes. There are health and safety leaders and resources in each of the global business units and their locations.

Our Group-level processes include a monthly review of performance and progress in the implementation of our improvement plans by the Executive Committee, and regular review of performance by the Board.

2022 FOCUS
We have a two-prodigious approach to creating a zero harm business. The two areas are:

1. ‘thinkSAFE’ – developing our culture
   - We care, and we consider the impact that we do because we care.
   - We consider safety in everything we do.
   - We challenge positively and respect those who challenge us.
   - We are committed to providing effective leadership in terms of safety and health workplace.
   - We seek to learn as much as we can from incidents rather than blame individuals for their failures.
   - We have created videos from some of our more serious incidents to help share learnings across the Group.

2. Systems – robust process safety
   - We aim to develop our EHS system further with a focus on robust implementation.
   - We will work collaboratively across all business units to improve our processes and enable a longer-lasting impact at all our sites.
   - Hazard profiles documented in 2021 provide site-specific focus areas, which allow for targeted improvement at each site.

SUSTAINABILITY AND RESPONSIBILITY

ENVIRONMENT

At Morgan Advanced Materials we are committed to a sustainable future. Our aim is to ensure that our products and manufacturing processes are designed, built and managed in a way that enhances their value to society and our environment.

OUR PROGRESS IN 2021

Our approach to sustainability continues to evolve as we bring into scope more and more elements related to our operations, processes and products.

The Group’s sustainability performance, compared with 2020, has been impacted due to the business’ growth after the COVID-19 pandemic. The environmental metrics results are as follows:

→ CO2e intensity: 20% decrease;
→ Absolute CO2e: 17% decrease;
→ Total energy use: 7% increase;
→ Water use: 15% increase;
→ Water use in stressed areas: 9% increase;
→ Waste intensity: 7% increase;
→ Waste recycling: 3% increase.

SUSTAINABILITY AND RESPONSIBILITY

At Morgan Advanced Materials we are committed to a sustainable future. Our aim is to ensure that our products and manufacturing processes are designed, built and managed in a way that enhances their value to society and our environment.

OUR PROGRESS IN 2021

Our approach to sustainability continues to evolve as we bring into scope more and more elements related to our operations, processes and products.

The Group’s sustainability performance, compared with 2020, has been impacted due to the business’ growth after the COVID-19 pandemic. The environmental metrics results are as follows:

→ CO2e intensity: 20% decrease;
→ Absolute CO2e: 17% decrease;
→ Total energy use: 7% increase;
→ Water use: 15% increase;
→ Water use in stressed areas: 9% increase;
→ Waste intensity: 7% increase;
→ Waste recycling: 3% increase.

THE IMPACT OF CLIMATE ON OUR BUSINESS

Scientists have identified that one of the most important impacts of climate change will be rising sea levels. Using climate scenario analysis modelling methodology, we have evaluated the impact of a 1.5°C to a 4°C rise in global temperatures on our businesses.

We have identified 10 of our manufacturing locations that could be negatively impacted by rising sea levels. We expect to finalise the climate scenario analysis modelling by 2021. Based on these results, we will develop contingency plans with our local sites to enable manufacturing to shift to alternative sites should the need arise.

WATER FOOTPRINT

Water scarcity is an increasing challenge in many parts of the world. As the world tackles climate change, our bio-energy demands will exacerbate water demand, meaning many will face water scarcity due to both physical shortages and scarcity in access.

We use water in a number of our manufacturing processes, and we recognise that in some instances our water demands are in areas of increasing water stress. By improving our water usage we will positively impact the local communities in which we operate, and therefore society more generally.

By 2021, we will reduce our total withdrawal of water by 30%, with the same goal in areas of high and extremely high stress.

Approximately 21% of our manufacturing operations are in these water stress areas. For stressed areas, we are 9% higher in our water withdrawal than 2020 but 12% below our 2015 baseline.

For total water withdrawal, we are 15% higher than 2020 levels, but 26% below our 2015 baseline. Overall, our water withdrawal increase compared with 2020 is primarily due to an increase in production levels, with all of our manufacturing facilities back in full operation after the impact of the pandemic.

We are implementing various water sustainability projects globally. In São Paulo for example, the team has installed a system to collect rainwater for irrigation which reduces the facility’s dependence on the stretched city water supply.

WASTE

Through continuous improvement efforts we are reducing all hazardous and non-hazardous waste streams.

Our facilities implemented various projects in 2021 to reduce the generation of waste. Continuous improvements agreed with the 5s methodology (sort, set in order, shine, standardise and sustain) have also been implemented globally. For example, our Martinsicuro site in Italy eliminated the use of lead in its products, therefore eliminating a hazardous waste stream.

During 2021, we also introduced several process improvements to reduce waste generation, including minimising overstock products, fine-tuning equipment to ensure proper thickness and recycling of air pollution control dust collector wastes. In addition, we have stepped up our focus on recycling for all other materials, including wood, cartons, pallets, plastic and jumbo bags.

Our waste intensity has increased 7% compared with 2020, due to the business growth after the COVID-19 pandemic.

Recycling has improved by 3% compared with 2020. Our recycling efforts have been damped by the COVID-19 pandemic, which has led to some restrictions in recycling opportunities (for example, some recycling operators ceased production). By increasing the time between recycling operations, we are reducing our carbon footprint too. Here are some examples of the progress we have made in 2021:

→ St Marys, USA – closed loop system. Installed a cooling tower, which allows the same water to be reused in cooling machines, with no change ination and changes in reporting methodology to ensure year-on-year consistency.

OUR 2030 WATER GOALS ARE TO REDUCE OUR OVERALL WATER USAGE BY 30% AND TO REDUCE OUR WATER USAGE IN HIGH STRESS AREAS BY 30%.

It takes a lot of energy to make water safe to drink, and to treat wastewater, so by reducing our water consumption, we are reducing our carbon footprint too. Here are some examples of the progress we have made in 2021:

→ St Marys, USA – closed loop system. Installed a cooling tower, which allows the same water to be used in cooling machines, with no change in water usage;
→ Augusta, USA – water recycling. Connected the niples used in blowing the product, to the blown water-cooling system, 5.9 million gallons of water saved annually.

TO FIND OUT MORE

Visit our website to learn more about how we are becoming a more sustainable business.

www.morganadvancedmaterials.com/sustainablebusiness
Drawing on our expertise as a leading innovator of products that reduce our customers’ GHG emissions, our focus in 2021 was on improving our own energy efficiency, procuring renewable and clean energy, and evaluating the replacement of higher-emission fuels with less-carbon-intensive fuels.

As our planet continues to be impacted by the effects of climate change and population growth, it is imperative that individuals and businesses take responsibility and reduce their environmental footprint. At Morgan Advanced Materials, lowering carbon emissions, growing our renewables and carbon-free energy portfolio and conserving water are our priorities. Procuring renewable and carbon-free energy is beneficial for the environment and can improve our long-term financial performance. In 2021, we had lowered GHG emissions by 33% against 2015 levels and continued to make significant progress.

In December 2021, Morgan Advanced Materials committed to the science-based target initiative (SBTi) and commenced the process of defining targets to align with the SBTi and reduce its climate impact. The SBTi encourages companies to demonstrate climate leadership through publicly committing to GHG reductions aligned to science-based targets. As part of our sustainability strategy, we leverage our expertise and resources to engage with our customers and stakeholders in our value chain to calculate our own climate impact.

For GHG reporting purposes, we outline its organisation on an operational basis, and our scope 1 and 2 emissions are reported on this basis. We account for 100% of our emissions from operations over which Morgan or one of its subsidiaries has operational control. Generally, scope 3 is the term used to label the indirect GHG emissions resulting from activities in our value chain. Examples are upstream emissions related to the raw materials we consume; downstream emissions from the use of our products we sell; and emissions from both upstream and downstream transportation activities. The scope 3 standard further categorises these emissions into fifteen distinct categories. However, based on our priorities, we will be focusing on key categories in the upstream and downstream.

We are actively evaluating the following areas:

- Supplier goods and services. We identified a system to evaluate our suppliers in 2021 and conducted an evaluation of key top-tier suppliers in terms of climate and other environmental, social and governance (ESG) criteria. Our next steps will be to evaluate the GHG Reporting Protocol categories deemed ‘relevant’ and to evaluate the remaining category inclusions.
- Capital goods. We anticipate having a system identified in 2022 to begin the evaluation of scope 3 emissions associated with capital goods using a Life Cycle Analysis (LCA) based method. Systems to conduct LCAs were evaluated and a LCA platform was selected in 2021.
- Fuel and energy-related activities. We are currently evaluating systems to account for scope 3 for fuel and energy-related activities (not included in scope 1 or 2). We anticipate having a plan defined in 2022 to capture this data. Scope 3 emissions associated with fuel and energy-related activities both upstream and downstream will be estimated using various tools such as the GHG Protocol Scope 3 Evacuator and IEA emission data.
- Our strategy to address scope 3 emissions is developing. In 2022, we will expand our work with our customers, suppliers, and other stakeholders in our value chain to calculate a scope 3 emissions baseline.

**SCOPE 3 EMISSIONS**

Morgan Advanced Materials recognises that assessing the Group’s value chain emissions is an important part of our long-term sustainability strategy. We aim to work with our key stakeholders and top-tier suppliers to reduce indirect emissions and this is Morgan’s preliminary step towards minimising product lifecycle impact. For GHG reporting purposes, we outline its organisation on an operational basis, and our scope 1 and 2 emissions are reported on this basis, we account for 100% of our emissions from operations over which Morgan or one of its subsidiaries has operational control. Generally, scope 3 is the term used to label the indirect GHG emissions resulting from activities in our value chain. Examples are upstream emissions related to the raw materials we consume; downstream emissions from the use of the products we sell; and emissions from both upstream and downstream transportation activities. The scope 3 standard further categorizes these emissions into fifteen distinct categories. However, based on our priorities, we will be focusing on key categories in the upstream and downstream.

**ENERGY**

We have an improvement programme underway covering energy procurement, process improvements, and behaviour changes in our plants. In 2021, the largest sustainability contribution came from procurement, where we have transitioned to carbon-free energy for a number of our sites.

1. Carbon emission factors for grid electricity are calculated according to the location-based method.
PRODUCT STEWARDSHIP 

We have seen growing demand for advanced materials, as customers push the boundaries of technology to make their processes and products more sustainable.

We supply products that, when used in compliance with product safety communications and common practice safety, will not present an unacceptable risk to human health and safety. We strive to maintain communications with stakeholders on environmental and health and safety matters to ensure transparency and alignment with their needs and expectations.

Our businesses maintain policies, programmes and practices to comply with laws and regulations, and to conform to the Group’s corporate standards regarding the products we sell.

In addition, our businesses communicate and cooperate with suppliers and customers, to conform to regulatory requirements that apply through the supply chain (such as Registration, Evaluation, Authorisation and Restriction of Hazardous Substances (REACH) and Restriction of Hazardous Substances (RoHS)). We register electronic equipment (RoHS) in the EU, and other chemicals (REACH) and restriction of chemicals (REACH) and restriction of hazardous substances (RoHS) in the EU, California Prop 65, and Conflict Minerals regulations and similar laws). We seek to minimise these impacts and seek to go beyond minimum legal requirements, by focusing on continuous improvement and establishing certified environmental management systems at our operating facilities. Our Policy and framework set minimum standards and provide guidance on what is expected of our sites. The Policy is regularly reviewed, and our priorities are communicated across all sites within the Group and applied to all businesses worldwide.

WASTE AND RECYCLING

Morgan Advanced Materials’ Environmental Policy sets out the Group’s commitment to protect and enhance the environment, to minimise the environmental impacts of our activities and to maximise the positive effects of our products and services. Our Policy is regularly reviewed and is communicated across all sites within the Group and applied to all businesses worldwide.

Our manufacturing processes have environmental impacts arising from the consumption of resources, air emissions, waste generation and water discharge. We seek to minimise these impacts and to go beyond minimum legal requirements, by focusing on continuous improvement and establishing certified environmental management systems at our operating facilities. Our Policy and framework set minimum standards and provide guidance on what is expected of our sites. The Policy is regularly reviewed, and our priorities are communicated across all sites within the Group and applied to all businesses worldwide.

Environmental performance is managed at the local level with top-level oversight by the Group. Guided by our Policy, designated EH&S personnel are responsible for compliance with local laws and regulations and for facilitating continuous improvement at a site level. The Chief Executive Officer, global business unit leadership teams and site management teams are responsible and accountable for environmental performance.

There are environmental leaders and resources in each of the global business units. Our Group-level environmental management processes include a monthly review of performance and progress in the implementation of our improvement plans by the Executive Committee and business leaders, and regular review of performance by the Board. An audit programme is conducted against the environmental framework, systems and KPIs with a focus on high-risk items.

WASTE AND RECYCLING

Our team in Ranipet, India have taken a great step forward in reducing their plastic waste by eliminating polystyrene from their ceramic blanket packaging in favour of a single, woven sack.

In 2021 our businesses increased waste intensity by 7% compared with 2020, with an overall waste generation increase of 126% (on an absolute basis). The increase compared with 2020 was primarily due to production levels resuming to normal after the 2020 COVID-19 operational restrictions.

Morgan recognises climate change as both a risk and an opportunity for our business and we fully support the implementation of the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

Climate change poses challenges to Morgan’s supply chain and production operations, as well as to our employees and customers, and as such we aim to address this as part of our corporate strategy.

This statement provides an overview of TCFD Governance, Strategy, Risk Management and Metrics and Targets. This Group complies with the requirements of LR 9.8.6R by including climate-related financial disclosures consistent with the TCFD recommendations and recommended disclosures, except for Strategy pillar C. "Describe the resilience of the organisation’s strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario”. We have not complied at this time because we are in the process of finalising our scenario analysis. We expect to finalise this modelling in Q1 2022. We will then develop contingency plans based on the results which will be used to inform the resilience of the Company’s strategy; this will be completed in 2022 and included in our 2023 Annual Report.

We intend to improve our climate-related disclosures continually across all of the pillars as we develop a deeper understanding of the potential effects on our business as the climate continues to change.

The Group has been disclosing climate risk under CDP since 2010. Our CDP climate change and water security responses provide further information on our approach to climate change. In 2021 we submitted both disclosures, placing us at the management level. This recognises that we are taking steps to assess the environmental risks of our business and acknowledges that we have implemented actions to manage those risks. Our responses are available at www.cdp.net/en.

GOVERNANCE

The Board of Directors has oversight of the climate change, environmental and corporate responsibility matters and ensures that our executive team progresses as planned to meet our commitments and goals. The Board of Directors also monitors progress against climate-related actions.

Metrics monitored include:

- Absolute scope 1 and 2 CO2e emissions;
- Water usage;
- Absolute energy use;
- Energy intensity.

Where appropriate, sustainability capital expenditure projects are reviewed.

The Chief Executive Officer is responsible for climate change, environmental and corporate responsibility matters. He is supported by the Chief Financial Officer, the Executive Committees and the Group Director for Environmental, Health, Safety and Sustainability (EH&S).

The Chief Executive Officer, Chief Financial Officer and Executive Committees are involved in the Group’s ESG materiality assessment and in the selection of key ESG priorities each year.

A Group Director of Environment and Sustainability was appointed in November 2020, reporting to the CEO, and was responsible for developing further and driving the Environmental and Sustainability Governance strategy, and managing and reporting progress to the executive team and the Board. This involves monitoring climate-related issues, driving strategy execution and reporting into monthly executive meetings on environment and sustainability matters.

The Group has reviewed activities around environmental governance and health and safety. From 1 February 2022, the roles and responsibilities for developing further and driving the Environmental and Sustainability Governance strategy, and managing and reporting progress to the executive team and the Board.

The implementation of the climate-related projects is managed at a site level across each global business unit (GBU). The GBU leads are part of the Executive Committees, reviewing progress against ESG targets, communicating and driving strategy execution within their GBUs.

The ESG strategy and communications from the Executive Team are cascaded to the wider business through monthly EHS&S leadership calls with the GBU EH&S leads, and quarterly internal updates from the Chief Executive Officer to the wider GBU and site leadership teams.

SUSTAINABILITY AND RESPONSIBILITY

during 2022, Morgan will set targets to align with a <2°C SBT and undertaken scenario analysis to build a strategy toward transition to a low carbon economy. We are conducting climate scenario analysis to evaluate the following scenarios: technology, heat stress, water scarcity, and carbon tax. We will increasingly use scenario analysis to inform the risk management process to understand the uncertainty of the risks and opportunities climate change poses to the business.

During the course of 2021, Morgan assembled a cross-business engineering team to identify and evaluate environmental projects across the business. This opportunity to collaborate and share best practice has yielded a project portfolio to complete during the next three years in order to reduce our emissions and meet our stated CO2e and water reduction targets.

Work is underway to assess the technologies we will need for the longer term (i.e. beyond 2030) to address the CO2e emissions from existing natural gas-driven production processes. A portion of our research and development resource is now dedicated to exploring low-carbon opportunities. We have partnered with the British Ceramics Confederation (BCC) and are part of the ‘Towards Net Zero’ commitment. This collaboration brings together businesses from the ceramic manufacturing sector in the UK and shares best practice approaches and proven decarbonisation technologies, helps nurture and encourage industry decarbonisation, and communicates relevant challenges for the industry. Our involvement will allow us to explore alternatives to natural gas and share best practice as part of an industry group.

Risk Management

The Board recognises the need to understand and assess climate-related risks and the inherent uncertainty therein. Risk management and internal control are fundamental to achieving the Group aim of delivering long-term sustainable growth in shareholder value. Principal and emerging risks are identified and escalated by the Board and the Executive Committee, and bottom-up through the global business units. Further details on Morgan’s processes for identifying, assessing, and managing risk can be found in the Risk Management section on page 38.

During 2022, the Group recognises the importance of climate scenario analysis and has engaged a third party to support the modelling and interpretation of results. We will be incorporated in the risk management process to identify further actions towards our 2030 strategy. Climate risk and scenario analysis awareness training was undertaken with fundamental leads from the different GBUs in December 2021. Training will also be delivered to the Executive Committee and Group finance team on TCFD, climate change and scenario analysis in Q2 2022. This will upskill the risks at Group level and across the GBUs to understand how to respond to scenario analysis, and climate change risk.

Metrics and Targets

We use GHG Protocol reporting standards to monitor CO2e intensity for scope 1 and scope 2 GHG emissions. The intensity figure is reported as tonnes of CO2e/million GBP. In addition, we monitor total water use, and water use in water-stressed areas.

In 2021, the Group committed to the science-based target initiative (SBTi) and anticipates receiving confirmation of our scope 1 and scope 2 emissions targets within the next 24 months, confirming alignment with the Paris Agreement target to limit global warming to a 2°C or lower scenario. This commitment meant that during 2021 we focused on driving energy efficiency improvements within our operations and continued to progress our renewable energy portfolio, inline with our commitment to the SBTi.

To achieve this, we established a cross-business carbon management team to track, monitor and manage our CO2e and water reduction projects, in line with the SBTi and our 2010 targets and 2020 aspirations. The group reports to the Board via the Group Director for EHS&S. Outputs from these are reported on a monthly basis to the CEO, CFO, Executive Committee and the Board.

We track scope 1 and 2 absolute CO2e on a monthly basis. The scope 1 and 2 absolute values for the year ended 31 December 2021 for the Group were as follows:

- Scope 1 emissions (metric tonnes CO2e): 122,817
- Scope 2 emissions (metric tonnes CO2e): 107,070.

In line with Streamlined Energy and Carbon Intensity (SECI) for 2021, Scope 1 and 2 emissions and energy use are disclosed in the Environment section on page 23.

We recognise that the assessment of the Group’s value chain emissions is an important part of our long-term sustainability strategy. We aim to work with our key stakeholders and top-tier suppliers to reduce indirect emissions; this is a priority step towards minimizing product lifecycle impact. For GHG reporting purposes, Morgan outlines its organisational boundary on an operational control basis, and our scope 1 and 2 emissions are reported on this basis.

The scope 3 standard further categorises these emissions into fifteen distinct categories. However, based on the Group’s priorities, we will be focusing on the key categories in the upstream and downstream.

We are evaluating the following areas:

Purchased goods and services

During 2021 we conducted a pilot on our top tier suppliers in terms of climate and other ESG criteria. We will implement a system to evaluate our suppliers during 2022. The evaluation of the associated scope 3 emissions will begin in 2022 using the GHG Protocol Scope 3 Evaluator and we expect to start reporting on them from 2023 onwards, with coverage increasing over time.

Capital Goods

We anticipate having a system identified in 2022 to begin our evaluation of scope 3 emissions associated with capital goods.

Fuel- and energy-related activities

We are currently exploring how to configure our systems to account accurately for scope 3 for Fuel- and energy-related activities (not included in scope 1 or 2). We anticipate having a plan identified in 2022 to capture this data. We anticipate these scope 3 emissions associated with fuel- and energy-related activities both upstream and downstream will be performed using various tools such as the GHG Protocol Scope 3 Evaluator and IEA emission data.

Criteria currently being evaluated include:

- Upstream transportation and distribution;
- Waste generated in operations;
- Downstream transportation and distribution;
- Processing of sold products;
- Use of sold products;
- Downstream leased assets.

In 2022, we will expand our work with our customers, suppliers and other stakeholders in our value chain to calculate an initial scope 3 emissions baseline.

In addition to this we are actively exploring product Life Cycle Assessment (LCA). Systems to conduct LCAs were evaluated in 2021, and pilot studies are planned for 2022. Product LCA information will inform scope 3 evaluation across a number of categories.

The Group’s greenhouse gas (GHG) emissions are mostly generated by the combustion of fossil fuels at various stages of our manufacturing processes. We are pleased to report that Scope 1 and 2 for 2021 have reduced by 17% compared with 2020, representing a 23% reduction compared with our 2015 baseline. Additional details of our progress towards 2030 can be found in the Environment section of this report on page 22. Scope 1 & 2 CO2e emissions continue to fall as a result of efficiency improvements driven by the cross-BUSG engineering team and increased renewable energy procurement.

We are also focusing on water reductions in areas of high or extremely high-water stress. Water withdrawal in water stressed areas accounts for 7% of our total withdrawal. Water management plans will be integrated into regular facility assessments to ensure our water use is aligned to the reduction activities to address water-related issues within the watershed of these local communities. We are pleased to report that absolute water withdrawal continues to fall across the business, being 26% lower in 2021 when compared with our 2015 baseline. Water use in high and extremely high-water stressed areas is down 12% compared with 2015.

Water withdrawal and use increased slightly from 2020, reflecting the manufacturing facilities returning to pre-pandemic levels of production. Investment is underway in 2021 to upgrade key facilities and install new equipment in 2021 to reduce water use and increase water recycling.

Additional details of our progress towards 2030 can be found in the Environment section of this report on pages 20 to 21.
SUSTAINABILITY AND RESPONSIBILITY

PEOPLE

Our people contribute to the culture and are the driving force behind our success. In return we aim to be a caring organisation where everyone feels valued and appreciated. Our key principle is that ‘it is not just what you do, but how you do it’ that is important.

We use our ‘Leadership Behaviours’ and the Morgan Code to guide the actions we take. This helps us to achieve our strategic aim of delivering performance and value creation for our stakeholders.

CULTURE

Our Board and governance systems, aligned to our purpose, safeguard our approach. There is a commitment from both the Board and the Executive Committee to demonstrate the ‘Leadership Behaviours’ and the principles of the Code, and this underpins the tone from the top.

In 2020, due to COVID-19, virtual-based focus groups were held, to ensure the Board was still able to hear direct feedback on our culture and understand the extent to which our employees were engaged. In 2021, we have continued virtual engagement sessions with employees and, as restrictions have reduced, we have held site visits in the UK.

The Board also received additional resources to help measure and monitor our culture, which included:
- Areas of culture highlighted in ethics reporting, including any terminations as a result of breach of the Morgan Code;
- Safety and environmental updates and performance metrics;
- Talent reviews with a focus on key talent retention, employee turnover, and diversity and inclusion metrics and initiatives;
- Updates on training and development programmes – including ethics, leadership development programmes and on-the-job training;
- Results of our recent engagement survey.

The feedback is giving us a better picture of our culture as a Group.

PEOPLE POLICIES

We support the UN Universal Declaration of Human Rights, and our Human Rights Policy commits us to protect the rights of everyone (who works for us) and all those who have dealings with us. The principles of the Policy cover child labour, forced labour, health and safety, freedom of association, inclusion, discrimination, discipline, working hours and compensation. The Policy is published on our website.

We do not unfairly discriminate, and we respect human rights. Our employee policies are set locally to comply with local law and are within the overall Group framework. We operate a ‘Speak Up’ hotline which enables individuals who are aware of, or suspect, issues contravening Morgan’s Human Rights Policy, or wider concerns on policy adherence, to report these confidentially. All issues are investigated, individuals responded to where contact information is given, and progress is tracked to conclusion.

We have increased the use of our internal social media channel ‘Telleri’, to reinforce messaging with employees. This has included discussions on issues that our people want to know about, such as mental health at work, safety, cyber security, inclusion, environmental matters and discussions on our executive priorities.

UK GENDER PAY GAP REPORTING

We are continuing our efforts to improve equality and transparency across the business.

The UK Government requires gender pay gap reporting for companies with more than 250 employees. In 2021, the average gender pay gap for our UK workforce was 26.0% (2020: 19.4%, 2019: 21.5%, 2018: 16.6%, 2017: 24.7%).

Our gender pay gap exists because a greater proportion of our senior leadership is male and compared to last year our gap has increased.

The gender pay gap fluctuates according to the number of male employees at the higher pay ranges relative to female employees. The percentages are sensitive to small changes.

We have set ourselves a target that 40% of our leadership population will be female by 2030.

We have launched ‘Women@Morgan’, our employee resource group to engage women and men in addressing female-specific topics that will support the development of a more gender inclusive culture. We have invested in female-specific development with a number of our high potential women.

ATTRACTION AND RETENTION

To help solve our customers’ challenges, we need to recruit and retain a diverse range of professionals, including materials scientists, engineers, functional specialists and salespeople. We are evolving our strategies for recruiting and developing talent. We are developing our employer brand to help us compete more effectively in the talent market and to attract a more diverse pool of potential employees.

In 2021 we increased the size of our internal talent acquisition team and have leveraged our direct sourcing approach to widen our senior talent pool. In addition we launched and a new talent acquisition platform, which resulted in a threshold increase in traffic to the careers section of our website. This includes a similar increase in individuals who have explicitly expressed an interest in working for Morgan Advanced Materials online. We continue to ensure that our candidate lists are diverse and have a more inclusive approach using assessment to inform decision making. We have made some key internal development moves, which have positively impacted retention of our high potential talent.

INCLUSION

We provide equal opportunities for all employees and job applicants and do not unlawfully discriminate. We make reasonable adjustments to accommodate any employee who may have a disability within the meaning of all global equality legislation, and where the Company is aware of such disability.

See also our Board Inclusion and Diversity Policy on page 80.

DEVELOPING OUR PEOPLE

We want every employee to perform at their best, reach their full potential and feel rewarded for what they do. In 2021, each employee received on average 13 hours of training (2020: 8 hours), and we have continued to increase our volume of virtual training blended with face to face (as and when COVID-19 restrictions allowed).

We have launched new language training (available to all our people) and saw a 10% take up in the first month. Our professional and functional skills development continues to expand, as we increase our investment to meet the growing demand. Approximately 12% of our population had access to personal effectiveness and functional online on-demand learning in 2021. This population has completed a total of 4,000 hours of training.

In our project management function, this has also led to a number of individuals achieving accreditations. In 2021, we will be expanding access to these resources to all our people.

We completed the conversion of our supervisor training to enable virtual and blended delivery, as well as more traditional classroom delivery. This included increased support for the line managers of participants to ensure the learning was embedded successfully into the workplace. During 2021, 277 managers and supervisors completed the training.

We have evolved our talent identification process with a more granular assessment of potential versus performance, to enable targeted and proactive actions. These improve our succession pipeline and indicate the readiness of individuals to take on more complex roles in the future. We have also reviewed the relative size and complexity of our roles, which will inform development conversations and our ability to identify moves between businesses and functions.

NEW LANGUAGES ARE HELPING US COLLABORATE

As a global company we’re helping bridge the gap between our teams.

With employees in over 25 countries, improved language skills are an important part of successfully connecting and collaborating. In 2021 we launched getFLEUENT as our online language learning platform, available to every one of our employees.

Using online learning our people are able to learn English, French, German, Italian, Mandarin, Portuguese, Spanish, Dutch or Russian, using this hyper-personalised platform.

We have had more than 700 of our people activate their learning account so far. That is 700 people taking extra steps to connect with others.

We know that investing in our people and their skills is an important part of building an environment where everyone can do their best work.

INVESTING IN PEOPLE

Investing in the development of our people enables us to invest in our future.

In 2021, we continued our online learning focus. Our online learning system Percipio was used by almost 3,000 of our people across the world for compliance training.

Our top 100 dedicated learners clocked up nearly 3,000 learning hours across the year.

Our leadership development programmes, ‘Catalysts’ and ‘Gorillas’, saw the latest cohort focused on developing their personal and professional leadership skills, to help us achieve our purpose, keep our people safe and provide meaningful work that contributes to an improved society.

We welcomed the first cohort on our new early careers programme, ‘Spark’. The programme is focused on empowering participants to take ownership of and drive their career, developing and helping prepare people to become more senior or complex roles in the future.

The programme aims to弹簧broaden their base in the early stages of their career. High potential and a commitment to self-development are the criteria for our group. Our 22 candidates in this first cohort were based in eight different countries.
PEOPLE continued

Our leadership programmes continue to add value. They have remained virtual in delivery but without any negative impact on the outcomes. In all, 37% of participants completing the programmes received a promotion, or changed or expanded their role. Business projects included as part of the programmes have informed executive and business unit management team thinking and planning.

In addition, we have relaunched our early careers programme, with an increased focus on the diversity of the cohort to build our pipeline of talent. In 2021, 45% of the cohort were female.

PERFORMANCE MANAGEMENT AND REWARD

Since 2020, all employees in professional roles participate in our globally consistent performance management process. This process measures both what is achieved and how it is achieved, through assessment against our ‘Leadership Behaviours’. We set clear expectations for our leaders and managers, aimed at driving a culture of constructive feedback, and we provide development coaching to improve performance in role. Our employees in manufacturing roles follow a job-based approach to setting expectations and providing feedback.

The principle of pay for performance underpins our compensation approach and we set compensation levels using external benchmarking and relevant commercial considerations (i.e. compensation is designed to be both competitive in the countries in which the role operates, and affordable). We also offer short-term performance incentives globally to managers and to technical and functional experts.

The Executive Committee and senior management additionally have long-term incentives tied to business performance. At manufacturing site level, most sites offer incentives to their people, with payments based on meeting locally-set performance targets. We regularly review bonus arrangements and benefits to ensure they encourage and reward commercial and personal performance. In 2022, we will be including a carbon reduction target within our long-term incentives elements to reinforce our commitment to sustainability performance.

ENGAGING OUR EMPLOYEES

Effective engagement enables our employees to contribute to improving Morgan Advanced Materials’ business performance. We keep employees informed about what is happening across the business, including Company financial results, major business decisions, and other matters which affect them. We seek to maintain constructive relationships with all trade and labour unions across the geographies in which we work. Additional details on the engagement of our workforce are included on pages 70 and 71 of the Corporate Governance Report.

In 2021, we communicated and engaged our people on our new external priorities and longer-term aspirations. The initial communication to our leadership population was delivered virtually, utilizing innovative technology to run an engaging inclusive event where all leaders could participate and explore the topics. Subsequently the priorities have been communicated by our leadership teams to all our people, using cut-down engagement sessions and through the use of posters and newsletters (site level). Our aspiration is for all employees to understand and engage with our longer-term ambitions so that they can both relate to and contribute to them. We are keeping our people updated on our progress through internal channels, such as Yammer and the intranet and through external social media.

In late 2021, we conducted our employee engagement survey ‘Your Voice’. 77% of our people participated. The overall engagement score is 50%, a reduction from 51% engagement score in a 2019 pulse survey. Engagement is broadly similar across our global business units with variation seen across regions and sites. Our action planning is a combination of a small number of company initiatives to address common feedback, and targeted actions at key locations. Responses reconfirmed the need for a continued focus on our investment in technology and infrastructure, career development and collaboration.

Employee feedback from ‘Your Voice’ showed strong employee alignment with Morgan’s purpose and good focus on the customer.

We continue to leverage the virtual engagement approaches we initiated in 2020, coupled with encouraging face-to-face engagement within country. We are now evolving to a blended approach which we will continue to use in the future.

We have increased communication with our people on key Morgan topics, such as sustainability and inclusion, where we are looking to evolve our culture. In 2022, we are investing in a global engagement app to improve our ability to communicate and engage all our people, regardless of any language barriers, to ensure a better cascade of messaging.

In November 2021 a virtual meeting of the European Employee Forum was held. We will continue to use the employee forum to engage with our employees and will return to face-to-face if COVID-19 restrictions allow in 2022.

INCLUSION AND DIVERSITY

We are creating a work environment where all employees are valued and can do their best work. Marking and celebrating global awareness days which reflect our differences, as well as our similarities, gives our teams a great opportunity to learn more about each other and foster an inclusive work environment.

We support a number of these awareness days throughout the year as a way to celebrate, educate and engage ourselves, and to highlight our desire to make a big positive difference.
SUSTAINABILITY AND RESPONSIBILITY

WELLBEING, COMMUNITY AND ETHICS

At Morgan Advanced Materials, we recognise the importance of our people, and we strive to support their wellbeing.

We have built up a grass-roots wellbeing programme called ‘Better You, Better Life’, which supports our purpose of improving quality of life. In a similar way to our Morgan safety week, the programme runs activities across the Group to promote healthy choices and encourages our people to take part.

THE IMPORTANCE OF WELLBEING

In 2021, we ran our second mental health awareness month, supporting our people to make better, healthier choices. We believe that good mental health is as important as good physical health and wellbeing. We therefore provide our people with resources and links to charities and organisations across the globe that can support them. We offer managers and colleagues practical tips on communicating with employees with mental health issues, and we are building a campaign to help break down the stigma of asking for help at work.

In 2021, we trained our first mental health first-aiders.

SUPPORTING OUR COMMUNITIES

We aim to have a positive impact on the communities we serve, from supporting job creation and skills advancement to reducing energy and water consumption at our plants. All our efforts and engagements are driven by our Morgan Code, our purpose and our Group policies.

As our sites and operations are spread across the globe, we have the opportunity to work with many communities. We get involved at a local level and look to understand each community’s priorities and concerns.

We also pride ourselves on having some of the most passionate and inspiring people working at Morgan Advanced Materials. Not only do our people have a real love of science, mathematics and technology, but many also carry passion for other aspects of their lives – by giving back to their local communities.

We want our people to have the freedom to support what they care about most. We share their stories through our internal social media platform, Yammer, where you will often see the generous spirit and nature of our employees displayed from bake sales to cultural celebrations, and from charity donations to sponsorship events.

CHARITY IN THE COMMUNITY

- Our Durham, USA site has held a food drive for Connecticut Foodshare every year for the last three years. In 2021 they scheduled a week-long volunteering event, at which nearly a third of the site employees volunteered;
- Our St. Mary’s, USA site organised a ‘back-to-school supplies’ drive for their local elementary school, with over 1,000 donated items provided to the children in support of their studies;
- Our Thaurac, France team supported local charity, ‘TAKAMAIDER’, who raise funds for children with learning difficulties;
- Our Shanghai, China site has been actively involved in the community initiative to clean up floating waste on Huangpu River;
- Our Stourport, UK site spent time at a local school, supporting the improvements of their outdoor learning space.

1,000 donated items provided to the children in support of their studies.

TAX

Morgan Advanced Materials has approximately 70 manufacturing sites across over 25 countries and about 7,800 employees. The Group’s business activities incur a substantial amount and variety of taxes including corporate income taxes, excise duties and employment and other taxes. The Group also collects and pays employee taxes and other indirect taxes such as VAT.

We are committed to complying with tax laws in the jurisdictions in which we do business. We work closely with tax authorities and support initiatives to increase trust in tax systems around the world. The Group’s tax strategy applies to all Group entities and the latest update was approved by the Board of Directors on 10 December 2021.

MENTAL HEALTH FIRST AIDERS

This fantastic scheme is another way that we’re supporting our people to access mental health support and resources, when they need them the most.

Supporting the wellbeing of our teams is a key part of building a safe and inclusive culture and we’re proud our people want to reach out, help and be there for colleagues.

‘BETTER YOU, BETTER LIFE’

In 2021, our people have been embracing our ‘Better You, Better Life’ wellbeing programme, taking part in activities from hiking in the mountains with family, to exciting aerospace commutes and cycling in the countryside.
The Morgan Code is a foundational component of our ethics and compliance programme. The Code is implemented through a suite of Group policies which set out in detail how we must conduct ourselves in support of our people, our communities, our business partners and our shareholders. It applies to all employees and extends, as appropriate, to Morgan’s business partners including agents, joint venture partners and other third-party representatives.

We require all senior employees to certify that they have read, understood and agree to comply with the Morgan Code and the supporting policies which are relevant to their role. In 2021, there were 515 such certifications recorded across the business (all of the relevant population).

**TRAINING**

We provide training to raise awareness of ethics and compliance expectations and give guidance on handling situations where the proper course of action may be unclear. New hires are required to complete mandatory online training soon after joining the Group which covers anti-bribery, anti-trust, business ethics and cyber security. During 2021, our employees were provided training during three global initiatives through our new online platform on topics including anti-bribery and anti-corruption training of the relevant population (more than 99% of the relevant employee population) completed on-line.

We are committed to providing ongoing training as an important component of our ethics and compliance programme.

**THIRD-PARTY MANAGEMENT**

We have published a new Supplier Code of Conduct which provides a set of minimum conduct standards that we expect from our suppliers globally. Our Supplier Code focuses on treating people fairly, complying with health and safety rules, protecting the environment, and adhering to important ethics and compliance obligations. In 2021, we will continue embedding the Supplier Code into our supply chain and assess conformance.

A new Conflict Minerals Policy was published in 2021 to set out Morgan’s position on avoiding the sourcing of conflict minerals including tantalum, tin, tungsten, and gold. The Policy is in place where the revenue may aid the furtherance of human rights violations and other illegal activities. We expect our suppliers to adhere to the same principle.

We recognise the importance of making informed decisions when considering new or renewed business relationships with third parties.

We began implementing a new third-party management system which will go live in early 2022. This system will strengthen our ability to assess and conduct appropriate due diligence checks on third parties such as agents and distributors.

**HANDLING CONCERNS**

We maintain a confidential ‘Speak Up’ ethics helpline operated by an independent third party where anyone can raise a concern or report a suspected violation of our policies, procedures or the law as an alternative channel to reporting concerns internally. Reporters can raise concerns by telephone, web form or email and may elect to remain anonymous. During 2021, a total of 90 concerns were raised through the channel, consistent with the 87 raised during 2020. This volume of concerns aligns with benchmarking data compiled by NAVEX Global based on the Group’s global headcount. All concerns are reviewed or investigated and necessary disciplinary or corrective action is taken as appropriate. Oversight of all cases within the external investigation programme is performed monthly by members of the leadership team and four times annually during meetings of the Audit Committee. We will continue strengthening the emphasis of speaking up as it allows us to address problems in the business and support our work to strengthen the ethical culture at Morgan.

**ANTI-BRIBERY AND ANTI-CORRUPTION**

In some parts of the world where Morgan operates, bribery and corruption present a high risk. We have a responsibility to our employees, our shareholders and the countries and communities in which we do business to be ethical and lawful in all we do. The Code explicitly prohibits engaging in bribery or corruption in any form.

A total of 2,841 employees (more than 99% of the relevant population) completed on-line anti-bribery and anti-corruption training in 2021.

This year we completed a risk assessment to better understand areas of the business that may present an elevated risk for bribery and corruption.

We reviewed the adequacy of controls in place to combat bribery and corruption. Enhanced mitigation measures and training were planned for higher risk areas of the business during 2022.

A global Gifts and Entertainment Policy is in place which requires increasing seniority of approval based on the value of the item or entertainment event. Any limited gifts and entertainment exceeding a public official’s donor threshold, whether given or received, require pre-approval by the relevant OBU President or Finance Director. An online repository is in place for employees to log any gifts or entertainment given or received and attach the appropriate pre-approval in accordance with the Policy.

**HUMAN RIGHTS**

As an international business, the Group supports the UN’s Universal Declaration of Human Rights, and the Group’s Human Rights Policy applies to all our businesses worldwide. The Policy is available on our website and covers child labour, forced labour, health and safety, freedom of association, discrimination, discipline, working hours and compensation. The Director of Human Resources reports to the Chief Executive Officer and is responsible for the development of the Human Rights Policy and related matters, with the Presidents of each global business unit having responsibility for policy implementation within their respective businesses.

The Group’s Modern Slavery Act Transparency Statement, which is published annually on our website, details action taken to support the elimination of modern slavery and human trafficking.

**PRIORITIES FOR ETHICS AND COMPLIANCE IN 2022**

We provide enhanced management information and analysis to business leaders to allow greater insight into how the ethics and compliance programme is operating within each business unit.

Further strengthen our controls related to bribery and corruption, anti-trust and third party management for higher risk areas of our business.

Increase two-way engagement with employees and middle management on relevant ethics and compliance topics and challenges.

Implement employee training and communications activities in new ways to help foster a culture of integrity.

Clarify and emphasise the important role leaders play in our ethical culture and set clear expectations of what we expect from them.
**KEY PERFORMANCE INDICATORS**

We assess our performance across a wide range of metrics. To support the Group’s strategy and to monitor performance, the Board of Directors and the Executive Committee use a number of financial and non-financial key performance indicators (KPIs).

In order to measure the organic** performance of the business, management further review the adjusted KPIs after excluding the impacts of acquisitions and foreign exchange.

**REMUNERATION**

To help align the interests of the Board and the Executive Committee with the interests of our shareholders, certain measures are used for executive remuneration.

Measures for determining employee annual bonuses are focused on both Group financial and personal performance. Measures for awarding performance shares (long-term share incentive programmes), are focused on shareholder value and future growth. For more information on Executive Directors’ remuneration please see the Remuneration Report on pages 82 to 105.

---

### FINANCIAL KPIs (STATUTORY AND ADJUSTED PERFORMANCE KPIs)

Our KPIs are a balanced set of metrics that give emphasis to both financial and non-financial measures. These help the Board and the Executive Committee assess performance and progress against our execution priorities and business plan.

Divisional and global business unit management use these and additional benchmarks and other KPIs to evaluate operating performance and make financial, strategic and operating decisions.

**Key Performance Indicators**

**Financial KPIs (Statutory and Adjusted Performance KPIs)**

Our KPIs are a balanced set of metrics that give emphasis to both financial and non-financial measures. These help the Board and the Executive Committee assess performance and progress against our execution priorities and business plan. Divisional and global business unit management use these and additional benchmarks and other KPIs to evaluate operating performance and make financial, strategic and operating decisions.

In order to measure the organic** performance of the business, management further review the adjusted KPIs after excluding the impacts of acquisitions and foreign exchange.

**Performance commentary**

Employee retention remains a challenge particularly in a number of our North American manufacturing sites where labour shortages have been exacerbated by the pandemic.
RISK MANAGEMENT

We have an established risk management methodology which seeks to identify, prioritise and mitigate risks, underpinned by a ‘three lines of defence’ model comprising an internal control framework, internal monitoring and independent assurance processes.

The Board considers that risk management and internal control are fundamental to achieving the Group’s aim of delivering long-term sustainable growth in shareholder value.

Principal risks and emerging risks are identified both ‘top down’ by the Board and the Executive Committee and ‘bottom up’ through the Group’s global business units (GBUs) and divisions.

The severity of each risk is quantified by assessing its inherent impact and mitigated probability, to ensure that the residual risk exposure is understood and prioritised for control throughout the Group.

Senior executives are responsible for the strategic management of the Group’s principal and emerging risks, including related policy, guidelines and processes, subject to Board oversight.

Throughout 2021, the Board reviewed the status of all principal and emerging risks with a significant potential impact at Group level. Additionally, the Audit Committee carried out focused risk reviews of each GBU. These reviews included an analysis of both the principal and emerging risks, together with the controls, monitoring and assurance processes established to mitigate these risks to acceptable levels.

As a result of these reviews, a number of actions were identified to continue to improve internal controls and the management of risk, including:

- Refresh of the Group’s ThinkSAFE programme, focusing on developing a caring safety culture, together with work to strengthen our safety systems.
- Increased awareness of the IT function’s ThreatSecure approach, including a cyber security month.
- Increased focus on Trade Compliance with the appointment of a Group Trade Control Director.
- Promotion of the Group’s Speak Up process.
- Further emphasis on the ethics agenda, including implementing self-certification of policy compliance and change to the Ethics & Compliance training platform.
- Driving forward the Group’s sustainability and environmental agenda.

The Board reviewed its appetite for the Group’s principal risks and concluded its appetite for these risks was unchanged from the previous year. Risk appetite is determined through management review and discussion with the Board. The Group is willing to take considered risks to develop new technologies, applications, partnerships and markets for its products and to meet customer needs. The Group strives to eliminate risks to product quality and health and safety, an approach which is essential to the success of the Company’s products and the safety of our people and contractors.

The appetite for risks in the areas of legal and regulatory compliance is extremely low and the Group expects its businesses to comply with all laws and regulations in the countries in which they operate. The Group also has a low appetite for financial risk. During the year, the Board monitored the Group’s current risk exposure relative to the Board’s appetite for different risks. There were no risks where the current risk exposure exceeded the Board’s appetite for that risk.

EMERGING RISKS

As part of the ongoing risk management process, the Board and the GBUs also identified and assessed emerging risks. None of these emerging risks are currently deemed to be significant, and they are therefore not listed amongst the Group’s principal risks below. They are identified, assessed and monitored continuously to be able to respond effectively when they crystallise.

The key emerging risk areas identified were:

- Environmental risk: climate change – including the potential impact of rising sea levels on low-lying or coastal sites and Morgan Advanced Materials’ role in protecting and enhancing the environment.
- Energy intensity and water scarcity – including ways of adjusting the Group’s production processes to reduce usage of natural resources.
- Raw materials and potential issues with their continued availability.
- Regulatory risk: manufacturing regulations – regulatory requirements for certain hazardous materials.
- Social/Societal: longer-term changes to end-markets including efforts to end-markets for example, electric vehicles, domestic heating, decentralised generation of energy.
- Business model: route to market – potential permanent change in traditional selling models requiring an accelerated shift to e-commerce.

Change in remote working models with own employees, customers and vendors.

These emerging risks have been recorded and will be monitored so that their potential impact can be understood and mitigated. They will also be considered as an integral part of the strategic planning process and form part of the focused risk review of each GBU.

The following are the Group’s principal risks and uncertainties and represent the risks that the Board feels could have the most significant impact on achieving the Group’s strategy of building a sustainable business for the long term and could impact the delivery of strong returns to the Group’s shareholders.

RISKS

OPERATIONAL RISKS

The Group operates across a range of product and technology families. These are subject to long-term market trends which may lead to either obsolescence or opportunities to further expand the Group. Failure to manage the Group’s portfolio of businesses proactively and in line with this technology profile could result in the value of the Group’s businesses being eroded over time or a failure to exploit opportunities to acquire businesses with the capability to add further value to the Group.

The Board performs regular reviews of the Group’s portfolio. During 2022, the Group launched a COVID-19-related restructuring and efficiency programme. This accelerated existing plans to simplify the Group’s portfolio and align capacity with the anticipated demand across the business.

The site closure completed in the second half of 2021. Opportunities to acquire businesses are reviewed on a continuing basis.

OVERVIEW

The Group has a dedicated technology team within each GBU which monitors relevant technology and business developments, using technology roadmaps linked to 20 major technology families, to ensure it remains at the leading edge of development. The Group also has four Centres of Excellence. These Centres focus Morgan Advanced Materials’ expertise and research resources on further developing core technologies and identifying new opportunities and applications.

The GBU leadership teams proactively monitor their technology priorities and R&D investments and have implemented a stage-gate process to manage this effectively. These projects are also regularly reviewed by the CEO and CFO.

Where Group products are designed for a specific customer, they are developed in partnership with the customer. The Group seeks to secure intellectual property protection, where appropriate via a Trade Secret standard, for its existing and emerging portfolio of products and in an in-house counsel dedicated to intellectual property protection, with the support of external advisors.

During the year, the Group continued its global leadership programme, adding an advanced programme to develop more high-potential commercial, functional and technical leaders.

Further detail on our people can be found on pages 28 to 31.

Further detail on research and development can be found on page 107.

Changes to operational processes are carefully considered by site and GBU management before implementation. Operational improvements and savings are monitored against budget by the GBUs and the Executive Committee to ensure that changes deliver the savings promised without disruption to business operations. New capital investments are approved at appropriate levels of the Group and delivery of these is overseen by GBU and Group management.

Organisational changes are assessed by the Chief Executive Officer, the Executive Committee and sometimes the Board before being implemented in line with local employment regulations.

A number of functionalisation initiatives commenced within the GBUs and IT in 2021 to align and standardise data and processes. The rollout of these projects will continue in 2022.

Changes to the global and functional structure of our GBUs are reviewed at various levels of the organisation before being implemented.

Further detail on Morgan Advanced Materials’ strategy can be found on page 10.
### RISK MANAGEMENT

**Operational Risks**

<table>
<thead>
<tr>
<th>Risk</th>
<th>Risk description, assessment and trend from 2020</th>
<th>Mitigation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Operational Risks</strong></td>
<td>The Group operates in a range of markets and geographies around the world and could be affected by political, economic, social or regulatory developments or instability, for example an economic slowdown or asset divestments to raise cash. Whilst a no-deal Brexit was avoided and new tariffs have not as yet been introduced, the UK’s exit from the EU impacts border controls, product standards and controls around the flow of data. The current value of Group’s UK exports to the EU is approximately €16 million and imports into the UK from the EU are equivalent to €56 million. We fully support the sanctions that have been put in place against Russia and we have ceased all trading with Russia. In 2021, we had €0.6 million of revenue from Russia, representing less than 0.5% of Group revenue. We have no significant dependency on material supply from Russia or Ukraine.</td>
<td>Product quality, safety and liability. Products used in applications for which they were not intended or inadequate asset control/over-commitment on customer specifications could result in products not meeting customer requirements, which could in turn lead to significant liabilities and reputational damage. Some of our products are used in potentially high-risk applications, for example in the aerospace, automotive, electric vehicle, medical and power industries.</td>
</tr>
<tr>
<td><strong>Operational Risks</strong></td>
<td>The Group operates a number of manufacturing facilities around the world. A failure in the Group’s EHS procedures could lead to environmental damage or to injury or death of employees or third parties, with a consequential impact on operations and increased risk of regulatory or legal action being taken against the Group. Any such action could result in both financial damages and damage to reputation. Given the long history of many of the operations of the Group, there is also a risk that historical operating and environmental standards may not have met today’s environmental regulations. In addition, the Group may have obligations relating to prior asset sales or closed facilities.</td>
<td><strong>IT and Cybersecurity</strong></td>
</tr>
<tr>
<td><strong>Operational Risks</strong></td>
<td>The Group has a comprehensive EHS programme managed by the Group Health and Safety Director and the Group Environment and Sustainability Director. The Group has also established a number of internal EHS-Leads, to set regular internal audits for EHS-related issues, which are reviewed by the Executive Committee. These form the basis for individual site’s own EHS priorities and plans and complement the Group’s ‘ThinkSAFE’ behavioural safety programme. EHS performance is monitored by the Group Executive Committee and the Board. EHS metrics are regularly assessed. Overall EHS performance deteriorated slightly during 2021. As at 31 December 2021, the Group was managing projects to remediate legacy contamination at a number of former operational sites in conjunction with external specialists and relevant authorities. The Group’s commitment to protecting and enhancing the environment is set out on pages 20 to 24. TCFD disclosures are set out on pages 25 to 27. Details of the Group’s provisions and contingent liabilities can be found in note 25 to the consolidated financial statements.</td>
<td>Across the industry, the impact of cyber-attacks has been growing rapidly influenced by increased connectivity, remote working and regulatory intervention and compliance. The COVID-19 pandemic resulted in a further rise in remote working and an accelerated shift to cloud platforms, thereby increasing the cyber risk severity due to threats such as email-propagated attacks (e.g. phishing, cyber-kick, impersonation, malware, ransomware). If the Group were to lose critical information (such as PI or regulatory data) or critical systems availability were affected through cyber-attacks, the business would be impacted or could suffer reputational damage. The effective management of the Group’s IT infrastructure is important in enabling our businesses to deliver customer requirements reliably. If a key business system were to fail or core systems implementation were to be insufficient, the ability of the business to deliver on its strategic goals might be impacted.</td>
</tr>
<tr>
<td><strong>Operational Risks</strong></td>
<td>Communicable diseases impact ways of working, the supply chain and the ability of employees to travel to work in affected areas. The Company’s policy is to take all actions and precautions necessary to ensure the safety and wellbeing of our employees. In all manufacturing sites, ways of working were successfully adapted to respond to the pandemic, keep people safe, introduce social distancing, hygiene measures and additional PPE. Flexible working from home was also introduced for all roles that could do so. The Company has continued to be able to supply to key customers operating in essential sectors, including healthcare and power generation. The Group has provided clear and timely communication to reinforce the importance of following safety measures in every part of the organisation.</td>
<td><strong>Supply Chain/ Business Continuity</strong></td>

**Risk appetite:** Very low

**Trend:** Unchanged

---

**Overview**

**Governance**

**Financial statements**
RISK MANAGEMENT

FINANCIAL RISKS

TREASURY

Severity: Moderate
Risk appetite: Very low
Trend: Improved

The Group’s treasury function operates on a risk-averse basis. Required controls over selection of banks, cash management and other treasury practices and payments globally are documented in Morgan Advanced Materials’ Treasury Policy and related procedures. The Group treasury team manages the Group’s funding, liquidity, cash management, interest rate, foreign exchange, counterparty credit and other treasury-related risks. Treasury matters are regularly reviewed by the Board and Audit Committee.

At 31 December 2021, the Group had an undrawn revolving credit facility of £200m which matures in September 2024. Headroom on committed facilities increased during the period to £327.9m (2020: £275.8m) providing protection against future refinancing risk and ensuring sufficient funds are available to support the Group’s activities. Further detail on the Company’s Treasury Policy is set out in the Group Financial Review, which can be found on page 52.

PENSION FUNDING

Severity: High
Risk appetite: Very low
Trend: Unchanged

The Group sponsors several defined benefit pension arrangements (the Schemes), whose liabilities are subject to fluctuating interest rates, investment values and inflation. This coupled with the increased longevity of members and a tougher regulatory funding regime will result in increased funding burdens on the Group in the future. The deficit in Morgan Advanced Materials’ global defined benefit pension schemes calculated on the basis required for IAS 19 accounting disclosures decreased from £176.3 million as at 31 December 2020 to £102.7 million as at 31 December 2021.

The Group also participates in two multi-employer defined benefit schemes in the USA, both of which have significant funding deficits. Morgan’s primary means of mitigating pensions funding risk is a proactive approach to the management of risk in the Schemes’ investment portfolios, significantly reducing their underlying interest and inflation rate exposure. Following the most recent Scheme valuations in March 2019, Company contributions increased to £16.5 million pa from 2020 (further increasing by 2.75% each year) for the length of the current Scheme. In consultation with the Company, the Trustees have adopted a proactive integrated pension strategy focusing on funding, investment and benefit risk. This involves both internal management within the Group and also external management through the Schemes’ trustees, corporate actuaries and professional advisors.

In the UK, both Schemes are closed to the future accrual of benefits. In consultation with the Company, the Trustees have adopted a proactive approach to the management of risk in the Schemes’ investment portfolios, significantly reducing their underlying interest and inflation rate exposure. Following the most recent Scheme valuations in March 2019, Company contributions increased to £16.5 million pa from 2020 (further increasing by 2.75% each year) for the length of the current Scheme. The next valuations will be commenced in March 2022 with funding arrangements reviewed.

Risk for both of the defined benefit Pension Plans in the US has been reduced. One completed a full legal termination (in June 2016). For the other Scheme, a formal offer of a present-value-equivalent, lump-sum cash payment was made to members. Following a $36 million additional contribution (in December 2017) and a move to a significantly de-risked investment portfolio, this Scheme is now almost fully funded on an accounting basis.

A liability management strategy for both of the US multi-employer plans has been agreed and a proposal for withdrawal made to the Trustees of the more severely underfunded arrangement.

No significant funding obligations exist in any other individual country although German legacy defined benefit schemes are unfunded, in accordance with local practice. The recent risk review identified no significant liability increases were likely in foreseeable future.

LEGAL AND COMPLIANCE RISKS

CONTRACT MANAGEMENT

Severity: High
Risk appetite: Very low
Trend: Unchanged

As a global advanced materials business, supplying components for critical applications, the Group may be exposed to liabilities arising from the use of its products. Ineffective contract management could result in significant liabilities for the Group and could damage customer relationships.

The Group has an in-house legal function supplemented by specialist external lawyers.

The Group Legal Policy requires in-house legal review of high-value or high-risk contracts to ensure they contain appropriate protections for the Group. The Policy requires Chief Executive Officer approval before a business can enter into an unlimited liability contract or one where the liability cap exceeds £5 million. The Legal Policy has been updated, focusing on clarifying understanding and the position on high-risk purchase contracts. A training programme is in place.

The Group has product liability insurance that would respond to product liability claims (up to policy limits) to the extent this is not limited contractually.

The Group operates in many jurisdictions around the world and could be affected by changes in tax laws and regulations within the complex international tax environment.

The OECD Base Erosion and Profit Shifting (BEPS) framework is generating additional obligations and filing requirements for the Group as countries continue to implement the actions in the framework. These could have an impact on the tax paid by the Group.

The Group’s tax function, working in conjunction with external specialists as required, closely monitors fiscal developments and changes such as BEPS to ensure that the Group’s tax arrangements and practices continue to comply with the requirements of all relevant jurisdictions whilst also enabling efficient management of the tax liability. The Group’s Head of Tax reports to the Audit Committee on key tax issues and initiatives.

The Group has published its tax strategy on its website in line with UK corporate governance requirements.

www.morganadvancedmaterials.com/en-gb/sustainability-responsibility/governance/

The Group is committed to the highest standards of corporate and individual behaviour. To support this, in 2018 the Group issued the Morgan Code, which has been continuously in force since then. The Code defines the Group’s approach to doing business ethically and confirms Morgan Advanced Materials’ commitment to high standards of ethical behaviour. The Code is supported by a range of documents and mechanisms: policies, standards and guidance; training materials; the provision of an ethics hotline for employees; and systems to support effective screening of and due diligence on third parties. In 2021, the Company introduced the Supplier Code of Conduct. Mandatory ethics training for staff covers topics including anti-bribery and anti-corruption, anti-trust, harassment and bullying and trade controls. The Group’s ‘Speak Out’ methods enable staff to report concerns anonymously.

The Group has a Global Ethics and Compliance Director overseeing and leading the Group’s activities and programmes. The Group also has a Global Trade Compliance Director whose role is dedicated to ensuring compliance with trade controls.

In addition to Group-level compliance specialists, the businesses are required to establish compliance officer roles, which are responsible for supporting local training and monitoring. Morgan also employs country-specific trade and export compliance specialists in higher-risk businesses and jurisdictions.

Further details on ethics and compliance can be found on page 34 to 35.
In the current year, the Group disposed of its 35% shareholding in Jemmtec Limited, and the business assets associated with the Latrobe business during the year. These disposals generated a profit of £7.2 million and a loss of £0.1 million, respectively. Refer to note 2 for further information.

BUSINESS CLOSURE AND EXIT COSTS
A £3.2 million charge has been recognised relating to the liquidation of businesses in Europe and Asia.

2020 IMPAIRMENT OF NON-FINANCIAL ASSETS
Technical Ceramics, Asia
Impairment charges of £4.8 million and £1.5 million have been recognised after assessing the viability of two development assets in Europe and North America, respectively. The European asset was not deemed viable as we were unable to commission it safely and the American asset was not deemed to be commercially viable.

Technical Ceramics, Europe and North America
Impairment charges of £11.9 million and £3.9 million have been recognised after assessing the viability of two development assets in Europe and North America, respectively. The European asset was not deemed viable as we were unable to commission it safely and the American asset was not deemed to be commercially viable.

Thermal Ceramics, North America
An impairment charge of £0.6 million has been recognised relating to assets associated with closed manufacturing lines within Thermal Ceramics.

RESTRICTURING CREDIT
A net credit of £0.1 million has been recognised in the current year, representing £2.1 million of further redundancy and closure costs related to the Group’s restructuring programme, offset by a £2.2 million release of restructuring provisions booked last year in relation to this programme. Whilst the Group’s restructuring programme was completed in 2021, we retain restructuring provisions of £11.8 million for the Group’s obligations at the balance sheet date (2020: £17.5 million). This provision includes remaining lease exit costs and multi-employer pension obligations for two sites which have been closed during the year. The cash outflows relating to the pension obligations may continue for up to 20 years, subject to any settlement being reached in advance of that date. Refer to note 25 for further information.

NET PROFIT ON DISPOSAL OF BUSINESS
The Group disposed of its 35% shareholding in Jemmtec Limited and the business assets associated with the Latrobe business during the year. These disposals generated a profit of £7.2 million and a loss of £0.1 million, respectively. Refer to note 2 for further information.

PROFIT ON DISPOSAL OF BUSINESS
On 15 June 2020 the Group announced the closure of its Suzhou manufacturing facility in China and recognised a £1.1 million charge relating to the impairment of property, plant and equipment.

Technical Ceramics, China
On 15 June 2020 the Group announced the closure of its Suzhou manufacturing facility in China and recognised a £1.1 million charge relating to the impairment of property, plant and equipment.

Thermal Ceramics
Reduced demand in the aerospace, automotive and industrial market segments in 2020 resulted in impairment losses of £35.7 million in Thermal Ceramics, which related to the closure of sites and under-utilised product lines, as well as the impairment of intangible assets recognised upon the acquisition of Porextherm in Germany in 2014.
DIVISIONAL AND GLOBAL BUSINESS UNIT PERFORMANCE

THERMAL PRODUCTS

HIGHLIGHTS
- The Thermal Products division’s 2021 reported revenue was £412.4 million (2020: £385.5 million), an increase of 7.0% compared with 2020.
- On an organic constant-currency* basis, revenue increased by 11.9%, compared with 2020.
- Divisional operating profit was £69.8 million (2020: loss £12.6 million) and divisional operating profit margin was 16.6% (2020: loss 3.3%), with improvement driven by the delivery of the restructuring programme and volume growth. Details of the specific adjusting items of £1.8 million (2020: £63.3 million) are included in note 6.
- Divisional adjusted operating profit* was £68.3 million (2020: £29.9 million) and divisional adjusted operating profit margin* was 17.7% (2020: 7.9%).

BUSINESS DESCRIPTION
This Thermal Products division comprises the Thermal Ceramics and Molten Metal Systems global business units.

Thermal Ceramics manufactures advanced ceramic materials, products and systems for thermal insulation in high-temperature environments. We engineer systems for the safety of people and equipment in demanding applications. Our products help customers, especially those operating energy-intensive processes, to reduce energy consumption, emissions and operating costs.

Our products are used in high-temperature industrial processing of metals, petrochemicals, cement, ceramics and glass, and by manufacturers of equipment for aerospace, automotive, marine and domestic applications. Our core strength is our ability to address individual customer problems, using our materials and our applications expertise to design, manufacture and install optimum thermal solutions.

Our product range includes high-temperature insulating fibre products, microporous products, bricks, monolithic products, heat shields, fired refractory shapes and structural block insulation products.

Molten Metal Systems manufactures an extensive range of high-performance crucibles and foundry consumables for non-ferrous metal melting applications. We provide melting solutions for foundries, die-casters and melting facilities, working with zinc, precious metals, aluminium, copper, brass, bronze and other non-ferrous metals.

With its extensive applications experience and process knowledge, Molten Metal Systems helps customers put together the optimal system for their needs. The global business unit works with customers in non-ferrous castings, metal powder production, refining and recycling of precious metals, and the production of pure aluminium for electronics applications.

Our product range includes crucibles and foundry products.

FOOTPRINT
As at 31 December 2021 Thermal Products comprised 28 operating sites employing approximately 2,830 people, with manufacturing sites across the world. It also has a comprehensive network of sales offices allowing immediate access to and facilitating direct working with end-users. Some sales, particularly for the insulating fibre and crucible product ranges, are made through a well-established distributor network.

PERFORMANCE AND BUSINESS REVIEW
Revenue for Thermal Products for the year was £412.4 million, representing an increase of 7.0% compared with £385.5 million in 2020. On an organic constant-currency* basis, year-on-year revenue increased by 11.9%. Divisional adjusted operating profit* for Thermal Products was £68.3 million (2020: £29.9 million) with a divisional adjusted operating profit margin* of 17.7% (2020: 7.9%) with improvement driven by the delivery of the restructuring programme and volume growth. Divisional operating profit was £69.8 million (2020: loss £12.6 million).

Revenue for Thermal Ceramics for the year was £29.9 million, representing an increase of 7.0% compared with £26.7 million in 2020. On an organic constant-currency* basis, year-on-year revenue increased by 9.8%. Revenue was higher due to a recovery in the industrial markets and energy segments and growth in healthcare and automotive segments.

Thermal Ceramics’ 2021 adjusted operating profit* was £62.0 million (2020: £26.7 million) with adjusted operating profit margin* of 11.5% (2020: 7.8%). Margin improvement was driven by higher volumes and the delivery of efficiency actions from the restructuring programmes.

Revenue for Molten Metals Systems for the year was £167.7 million, an increase of 15.8% compared with £141.2 million in 2020. On an organic constant-currency* basis, year-on-year revenue increased by 20.8%. Revenue growth is driven by a strong demand in the aluminium and copper segments.

Molten Metals Systems’ 2021 adjusted operating profit* was £6.3 million (2020: £3.2 million) with adjusted operating profit margin* of 13.2% (2020: 7.8%). During 2021, margins improved due to the higher volumes and cost control actions.

STRATEGY
The priorities for the division remain in line with the execution priorities of the Group. We have put increased emphasis on growth markets where we bring clear technological differentiation. We have invested in changes in our customer-facing organisation to improve our understanding of customer needs and market drivers and to develop sales effectiveness as a distinctive capability.

We recognise the key advantages we have in the markets we serve and will build on these: our global manufacturing footprint, broad product range, application experience, and technological advancements. We will continue to drive operational excellence through lean manufacturing, process efficiency, and automation.

We are investing in product and process technology to optimise our products and processes to serve the challenging performance needs of our customers. We will continue to invest in this differentiation, as we see increasing competition which is putting pressure on margins for our standard products.
The business's components often help to extend the operating life of customers' equipment and make it more energy-efficient. The main markets served are specialist applications in the oil and gas, automotive, industrial, water pump, aerospace and home appliance sectors. Our product range includes seals, bearings and general pump components (shafts, vanes, rotors and washers).

Technical Ceramics engineers high-performance functional and structural ceramic materials, component sub-assemblies and sub-assemblies to address customer-specific technical challenges. The business employs advanced materials science and applications expertise to produce parts that enhance reliability or improve the performance of its customers' products. Much of what the global business unit makes is used in demanding, harsh or critical environments. The global business unit works in selected segments of the semiconductor, energy, healthcare, industrial, petrochemicals, security and transport markets, typically in close collaborative customer relationships.

Our product range includes structural ceramic components, engineered coatings, ceramic-to-metal assemblies including brazed and metallised assemblies, ceramic cones, brake abrasives and ceramic tubes and rollers.

As at 31 December 2021 the Carbon and Technical Ceramics division comprised 44 operating sites employing approximately 4,700 people, with manufacturing sites across the world. As a result of the customer-specific nature of most of the products sold and the importance of staying very close to the market, most sales are made directly to distributors. The global spread of operating sites supplemented by a comprehensive network of sales offices allows immediate access to and facilitates direct working with customers and the products’ end-users.

Revenue for the Carbon and Technical Ceramics division was £66.5 million (2020: £15.4 million), representing an increase of 2.5% compared with £64.0 million in 2020. On an organic constant-currency* basis, year-on-year revenue increased by 9.7%. Divisional operating profit was £6.6 million (2020: £15.4 million), Divisional adjusted operating profit** for the Carbon and Technical Ceramics division was £22.9 million (2020: £27.5 million), with divisional adjusted operating profit margin*** of 15.3% (2020: 12.5%).

Revenue for the Electrical Carbon global business unit in 2021 was £164.9 million, representing an increase of 2.5% compared with £151.4 million in 2020. On an organic constant-currency* basis, year-on-year revenue improved by 13.1%. The increase in revenue has been driven by growth in the industrial, renewable energy and semiconductor market segments. Electrical Carbon's adjusted operating profit** was £32.8 million (2020: £23.6 million) with an adjusted operating profit margin*** of 19.9% (2020: 15.6%). Adjusted operating profit margins were expanded through operational efficiency, cost reduction actions and increased volume.

Revenue for the Seals and Bearings global business unit in 2021 was £33.9 million, representing a decrease of 7.2% compared with £36.4 million in 2020. On an organic constant-currency* basis, year-on-year revenue decreased by 3.1%. The business decline was driven by an unexpected reduction of contract awards in ceramic armour (2021: £29 million; 2020: £49 million). This was largely offset by growth in the industrial, petrochemicals and transportation market segments.

Seals and Bearings' adjusted operating profit** was £2.9 million (2020: £7.3 million), with an adjusted operating profit margin*** of 16.9% (2020: 18.8%). The margin decline has resulted from lower ceramic armour volume.

Revenue for the Technical Ceramics global business unit in 2021 was £237.3 million, an increase of 4.4% compared with £227.4 million in 2020. On an organic constant-currency* basis, year-on-year revenue increased by 1.6%, primarily driven by growth in the industrial, semiconductor, healthcare, energy and aerospace market segments.

The business's components often help to extend the operating life of customers' equipment and make it more energy-efficient. The main markets served are specialist applications in the oil and gas, automotive, industrial, water pump, aerospace and home appliance sectors. Our product range includes seals, bearings and general pump components (shafts, vanes, rotors and washers).

Technical Ceramics engineers high-performance functional and structural ceramic materials, component sub-assemblies and sub-assemblies to address customer-specific technical challenges. The business employs advanced materials science and applications expertise to produce parts that enhance reliability or improve the performance of its customers' products. FOREIGN CURRENCY IMPACT
The principal exchange rates used in the translation of the results of overseas subsidiaries were as follows:

<table>
<thead>
<tr>
<th>Currency</th>
<th>2021 Average rate</th>
<th>2020 Average rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>USD dollar</td>
<td>1.35</td>
<td>1.38</td>
</tr>
<tr>
<td>Euro</td>
<td>1.19</td>
<td>1.16</td>
</tr>
</tbody>
</table>

The potential impact of changes in foreign exchange rates is given in note 22 to the consolidated financial statements on page 157. Retranslating the 2021 5.8% year results at the January 2022 closing exchange rates would lead to revenue of £954.6 million and adjusted operating profit of £164.6 million.

For illustrative purposes, the table below provides details of the impact on 2021 revenue and Group adjusted operating profit. If the actual reported results, calculated using 2021 average exchange rates were restated for GBP weakening by 10 cents against the USD dollar in isolation and 10 cents against the Euro in isolation:

</tbody>
</table>

The Board has committed to grow the Ordinary share capital of the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

Together with the interim dividend of 3.2 pence per share paid on 19 November 2021, the final dividend of 9.1 pence per share (2020: 5.5 pence per share) will represent a dividend cover of adjusted EPS of 3.0 times.

Curtailments and settlements
The European Schemes’ deficit decreased by £68.6 million to £51.7 million (2020: £102.7 million) following a £68.6 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The UK Schemes’ deficit decreased by £68.6 million to £31.7 million (2020: £203.3 million) following a £68.6 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The European Schemes’ deficit decreased by £6.8 million to £29.9 million (2020: £36.7 million) following a £6.8 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The Group pension deficit has decreased by £73.6 million since last year end to 102.7 million on an AS 19 (revised) basis, largely driven by higher corporate bond yields in the UK leading to a higher discount rate and employer contributions.

The UK Schemes’ deficit decreased by £68.6 million to £31.7 million (2020: £203.3 million) following a £68.6 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The US Schemes’ deficit decreased by £2.6 million to £22.4 million (2020: £25.0 million) following a £2.6 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The European Schemes’ deficit decreased by £0.9 million to £29.0 million (2020: £30.9 million) following a £0.9 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The rest of World Schemes’ deficit increased by £2.4 million to £43.3 million (2020: £40.9 million) following a £2.4 million contribution by the Group, payable on 20 May 2022 to Ordinary shareholders on the register at the close of business on 29 April 2022. The ex-dividend date is 28 April 2022.

The most recent full actuarial valuations of the UK schemes were undertaken as at March 2019 and resulted in combined assessed deficits of £103.3 million. Further details can be found in note 23 to the consolidated financial statements on page 161. On the basis of these full valuations, the Trustees of the UK schemes, having consulted with the Group, agreed past service deficit recovery payments totalling £6.5 million a year from January 2020, increasing by 2.75% pa until 2023, with further payments to the Morgan Pension Scheme for 2026 and 2027.

CAPITAL STRUCTURE
At the year-end total equity was £294.6 million (2020: £207.1 million) comprising net bank and other short-term assets of £96.5 million (2020: £155.6 million), with no term debt.

Non-current assets were £481.9 million (2020: £510.5 million), representing a net debt to EBITDA ratio excluding lease liabilities of 0.7 times.

The European Schemes’ deficit decreased by £5.8 million to £39.0 million (2020: £44.8 million) following a £5.8 million contribution by the Group, payable on 20 May 2020 to Ordinary shareholders on the register at the close of business on 29 April 2020. The ex-dividend date is 28 April 2020.

The rest of World Schemes’ deficit increased by £2.4 million to £43.3 million (2020: £40.9 million) following a £2.4 million contribution by the Group, payable on 20 May 2020 to Ordinary shareholders on the register at the close of business on 29 April 2020. The ex-dividend date is 28 April 2020.

The most recent full actuarial valuations of the UK schemes were undertaken as at March 2019 and resulted in combined assessed deficits of £103.3 million. Further details can be found in note 23 to the consolidated financial statements on page 161. On the basis of these full valuations, the Trustees of the UK schemes, having consulted with the Group, agreed past service deficit recovery payments totalling £6.5 million a year from January 2020, increasing by 2.75% pa until 2023, with further payments to the Morgan Pension Scheme for 2026 and 2027.
**GROUP FINANCIAL REVIEW**

**TREASURY POLICIES**

The following policies were in place across the Group throughout the year. The manager of each global business unit is required to confirm compliance as part of the year-end process.

**Financial Risk Management and Treasury Policy**

Group Treasury works within a framework of policies and procedures approved by the Audit Committee. It acts as a service to Morgan Advanced Materials' businesses, not as a profit centre and manages and controls risk in the treasury environment through the establishment of such procedures.

Group Treasury seeks to align treasury goals, objectives and philosophy to those of the Group. It is responsible for all of the Group’s funding, liquidity, cash management, interest rate risk, foreign exchange risk and other treasury business. As part of the policies and procedures, there is strict control over the use of financial instruments to hedge foreign currencies and interest rates. Specialist trading in derivatives and other financial instruments is not permitted.

**Foreign exchange risks**

Currency transaction exposures exist as a result of the global nature of the Group. The Group has a policy in place to hedge all material firm commitments and a proportion of highly probable forecast foreign currency exposures in respect of sales and purchases over the following 12 months and achieves this through the use of the forward foreign exchange markets.

A significant proportion of the forward exchange contracts have maturities less than one year after the balance sheet date. The Group continues its practice of not hedging income statement translation exposure. There are exchange control restrictions which affect the ability of a small number of the Group’s subsidiaries to transfer funds to the Group. The Group does not believe such restrictions have had or will have any material adverse impact on the Group as a whole or on the ability of the Group to meet its cash flow requirements.

**Capital investment**

The Group has well-established formal procedures for the approval of investment in new businesses and for capital expenditure, to ensure appropriate senior management review and sign-off.

**Borrowing facilities and liquidity**

All of the Group’s borrowing facilities are arranged by Group Treasury with Morgan Advanced Materials plc as the principal obligor. In a few cases operating subsidiaries have external borrowings but these are supervised and controlled centrally. Group Treasury seeks to obtain certainty of access to funding in the amounts, diversity of maturities and diversity of counterparties as required to support the Group’s medium-term financing requirements and to minimise the impact of poor credit market conditions.

The Group’s debt and its maturity profile are detailed in notes 21 and 22 to the consolidated financial statements on page 151.

**Credit risk**

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Group is exposed to credit risk on financial instruments such as liquid assets, derivative assets and trade receivables.

Cash balances held by companies representing over 65% of the Group’s revenue are managed centrally through a number of pooling arrangements. Credit risk is managed by investing in liquid assets and acquiring derivatives in a diversified way from high-credit-quality financial institutions. Counterparties are assessed through the use of credit agencies, systemic risk considerations, and regular review of the financial press. Credit risk is further discussed in note 22 to the consolidated financial statements on page 151.

**GOING CONCERN STATEMENT**

The Group’s business activities, together with the factors likely to affect its future development, performance and position are set out in the Strategic Report on pages 2 to 57. The financial position of the Group, its cash flows, liquidity position and borrowing facilities, are described earlier in this Group Financial Review. In addition, note 22 to the consolidated financial statements, includes the Group’s policies and processes for managing financial risk, details of its financial instruments and hedging activities and details of its exposures to credit risk and liquidity risk.

The Group meets its day-to-day working capital requirements through local banking arrangements underpinned by the Group’s £200 million unsecured multi-currency revolving credit facility, which matures in September 2024. As at 31 December 2021 the Group had significant headroom on its covenants and available liquidity with the Group’s £200 million multi-currency revolving credit facility being undrawn. Total committed borrowing facilities were £177.6 million, none of which is due to mature in the following 12 months. The amount drawn under these facilities was £177.6 million, which together with cash and cash equivalents of £127.3 million, gave a total headroom of £52.3 million.

The principal borrowing facilities are subject to covenants and covenants in June and December, being net debt to EBITDA of a maximum of 3x and interest cover of a minimum of 4x, based on measures defined in the facilities agreements which are adjusted from the equivalent IFRS amounts.

The tax strategy is aligned to the Group’s business strategy and ensures that tax affairs have strong commercial substance. Tax risks are set out in the Risk Management section on page 43.

**VIABILITY STATEMENT**

In accordance with provision 31 of the UK Corporate Governance Code, the Directors have assessed the prospects of the company over a period significantly longer than 12 months. The Directors have extended the period of the viability assessment to five years to 31 December 2026 in the line with impairment review testing and the strategic planning process which was also extended as a result of reduced uncertainty in the markets operated in. The Directors consider this an appropriate period over which to provide its viability statement based on management’s reasonable expectations of the position and performance of the company and the dynamics in the markets in which it operates. Taking into account the Group’s current position and the potential impact of the principal risks documented on pages 38 to 40 of the Annual Report, the Directors have a reasonable expectation that the Company will be able to continue in operation and meet its liabilities as they fall due over the period to 31 December 2026.

To allow the Directors to make this assessment, a business case has been built up, initially using a detailed, bottom-up approach, and then applying what the Directors consider to be an appropriate set of assumptions in respect of growth, margins, working capital flows, capital expenditure, dividends, refocusing of borrowing facilities and all other matters that could have a significant impact on the financial performance and liquidity of the Group. The resulting base case provides the Directors with EBITDA, net debt, and the adequacy of the financial headroom, relative to a severe but plausible combination of principal risks crystallizing that could threaten the viability of the company. The Directors also considered the likely effectiveness of the potential mitigations that management reasonably believes would be available to the company over this period.

**Governance**

The Board and Executive Committee have regular reporting and review processes in place in order to closely monitor the ongoing operational and financial performance of the Group. As part of the ongoing risk management process, principal and emerging risks are identified and reviewed on a regular basis. This process includes the ongoing review of the impact of the pandemic on the Group and its stakeholders. Potential uncertainties in demand remain across the countries that the Group operates in as a result of COVID-19, despite these uncertainties the Group saw a robust recovery in most of its end markets, leading to a return to growth for the 2021 financial year. In addition, the Directors have assessed the risk of climate change and do not consider that it will impact the Group’s ability to operate as a going concern for the period under consideration.

The Board fully recognises the challenges that lie ahead but, after making enquiries, and in the absence of any material uncertainties, the Directors have a reasonable expectation that the Company can raise the capital necessary to meet its business goals over the long-term. In addition, the Directors have considered the potential impact of the COVID-19 pandemic on the Group’s expected financial performance.

The Directors have also reviewed the Group’s reverse stress testing performed to demonstrate how much headroom is available on covenant levels in respect of changes in net debt, EBITDA, and underlying revenue. Based on the assessment, a combined reduction in EBITDA of 80% and an increase in net debt of 80% would still allow the Group to operate within its financial covenants.

The Directors do not consider either of these scenarios to be plausible given the diversity of the Group’s end markets and its broad manufacturing base.

**Overview**

The Board and Executive Committee have regular reporting and review processes in place in order to closely monitor the ongoing operational and financial performance of the Group. As part of the ongoing risk management process, principal and emerging risks are identified and reviewed on a regular basis. This process includes the ongoing review of the impact of the pandemic on the Group and its stakeholders. Potential uncertainties in demand remain across the countries that the Group operates in as a result of COVID-19, despite these uncertainties the Group saw a robust recovery in most of its end markets, leading to a return to growth for the 2021 financial year. In addition, the Directors have assessed the risk of climate change and do not consider that it will impact the Group’s ability to operate as a going concern for the period under consideration.

The Board fully recognises the challenges that lie ahead but, after making enquiries, and in the absence of any material uncertainties, the Directors have a reasonable expectation that the Company can raise the capital necessary to meet its business goals over the long-term. In addition, the Directors have considered the potential impact of the COVID-19 pandemic on the Group’s expected financial performance.

The Directors have also reviewed the Group’s reverse stress testing performed to demonstrate how much headroom is available on covenant levels in respect of changes in net debt, EBITDA, and underlying revenue. Based on the assessment, a combined reduction in EBITDA of 80% and an increase in net debt of 80% would still allow the Group to operate within its financial covenants.

The Directors do not consider either of these scenarios to be plausible given the diversity of the Group’s end markets and its broad manufacturing base.

**Directors’ Statements**

The Board and Executive Committee have regular reporting and review processes in place in order to closely monitor the ongoing operational and financial performance of the Group. As part of the ongoing risk management process, principal and emerging risks are identified and reviewed on a regular basis. This process includes the ongoing review of the impact of the pandemic on the Group and its stakeholders. Potential uncertainties in demand remain across the countries that the Group operates in as a result of COVID-19, despite these uncertainties the Group saw a robust recovery in most of its end markets, leading to a return to growth for the 2021 financial year. In addition, the Directors have assessed the risk of climate change and do not consider that it will impact the Group’s ability to operate as a going concern for the period under consideration.

The Board fully recognises the challenges that lie ahead but, after making enquiries, and in the absence of any material uncertainties, the Directors have a reasonable expectation that the Company can raise the capital necessary to meet its business goals over the long-term. In addition, the Directors have considered the potential impact of the COVID-19 pandemic on the Group’s expected financial performance.

The Directors have also reviewed the Group’s reverse stress testing performed to demonstrate how much headroom is available on covenant levels in respect of changes in net debt, EBITDA, and underlying revenue. Based on the assessment, a combined reduction in EBITDA of 80% and an increase in net debt of 80% would still allow the Group to operate within its financial covenants.

The Directors do not consider either of these scenarios to be plausible given the diversity of the Group’s end markets and its broad manufacturing base.

**Viability Statement**

In accordance with provision 31 of the UK Corporate Governance Code, the Directors have assessed the prospects of the company over a period significantly longer than 12 months. The Directors have extended the period of the viability assessment to five years to 31 December 2026 in the line with impairment review testing and the strategic planning process which was also extended as a result of reduced uncertainty in the markets operated in. The Directors consider this an appropriate period over which to provide its viability statement based on management’s reasonable expectations of the position and performance of the company and the dynamics in the markets in which it operates. To allow the Directors to make this assessment, a business case has been built up, initially using a detailed, bottom-up approach, and then applying what the Directors consider to be an appropriate set of assumptions in respect of growth, margins, working capital flows, capital expenditure, dividends, refocusing of borrowing facilities and all other matters that could have a significant impact on the financial performance and liquidity of the Group. The resulting base case provides the Directors with EBITDA, net debt, and the adequacy of the financial headroom, relative to a severe but plausible combination of principal risks crystallizing that could threaten the viability of the company. The Directors also considered the likely effectiveness of the potential mitigations that management reasonably believes would be available to the company over this period.

**Morgan Advanced Materials**

Annual Report 2021

**Morgan Advanced Materials**

Annual Report 2021
DIRECTORS' STATEMENTS

While the review has considered all the principal risks identified by the Group, the following were focused on for enhanced stress testing:

**IT and cyber security**
The effective management of the Group’s IT infrastructure is important in enabling our businesses to deliver customer requirements reliably. If a key business system were to fail or core systems implementation were to be ineffective, the ability of the business to deliver on its strategic goals might be impacted. The sensitivity analysis performed considered the impact of a loss of access to the Group’s main ERP system.

**Compliance breach**
The Group operates in a number of different jurisdictions and must comply with a range of national and international laws and regulations including those related to bribery and corruption, human rights, trade/export compliance and competition/anti-trust activities. The impact of a regulatory fine or penalty has been considered.

**Coronavirus (COVID-19) pandemic**
Due to the geographical spread of the Group, it is exposed to disruption as a result of COVID-19 in multiple markets. An increase in the rate of infection or new variant could impact ways of working, the supply chain, and the ability of employees to work in affected areas.

As part of the ongoing risk management process, principal and emerging risks are identified and reviewed on a regular basis. There are a number of mitigating actions the Group takes to manage and reduce risk. Further details of which can be found in the Risk Management section on pages 38 to 43.

The Group has significant financial resources including committed and uncommitted banking and debt facilities, as outlined in the Going concern statement. In assessing the Group’s viability, the Directors have assumed availability of debt capital markets and that the existing banking and debt facilities will remain in place or mature as intended.

Whilst this review does not consider all of the possible risks that the Group could face, the Directors consider that the approach adopted, and the work performed is reasonable in the circumstances of the inherent uncertainty involved and that it allows the Board to confirm that they have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the period to 31 December 2026.

DEFINITIONS AND RECONCILIATIONS OF NON-GAAP MEASURES TO GAAP MEASURES

Reference is made to the following non-GAAP measures throughout this document. These measures are shown because the Directors consider they provide useful information to shareholders, including additional insight into ongoing trading and year-on-year comparisons. These non-GAAP measures should be viewed as complementary to, not replacements for, the comparable GAAP measures. As defined in the basis of preparation section on page 131, these measures are calculated on a continuing basis.

**ADJUSTED OPERATING PROFIT**
Adjusted operating profit is stated before specific adjusting items and amortisation of intangible assets. Specific adjusting items are excluded on the basis that they distort trading performance. Amortisation is excluded, consistent with previous years.

ORGANIC GROWTH
Organic growth is the growth of the business excluding the impacts of acquisitions, divestments and foreign currency impacts. This measure is used as it allows revenue and adjusted operating profit to be compared on a like-for-like basis.

Commentary on the underlying business performance is included as part of the Review of Operations on pages 44 to 49.

---

**Group EBITDA**

Group EBITDA is defined as operating profit before specific adjusting items, depreciation and amortisation of intangible assets. The Group uses this measure because it is a key metric in covenants over debt facilities. The Group EBITDA includes the following:

- **Operating profit/loss**
- **Add back: specific adjusting items**
- **Add back: depreciation**
- **Add back: amortisation of intangible assets**

The Group discloses this measure of free cash flow as it provides readers of the consolidated financial statements with a measure of the cash flows from the business before corporate-level cash flows (acquisitions, disposals and dividends).

A reconciliation of operating profit to Group EBITDA is as follows:

- **2021**
- **2020**

---

**Free cash flow before acquisitions, disposals and dividends**

Free cash flow before acquisitions, disposals and dividends is defined as cash generated from continuing operations less net capital expenditure, net interest (interest paid on borrowings, overdrafts and lease liabilities, net of interest received), tax paid and lease payments.

The Group discloses this measure of free cash flow as it provides readers of the consolidated financial statements with a measure of the cash flows from the business before corporate-level cash flows (acquisitions, disposals and dividends).

A reconciliation of cash generated from continuing operations to free cash flow before acquisitions, disposals and dividends is as follows:

- **2021**
- **2020**

---

**Net cash and cash equivalents**

Net cash and cash equivalents is defined as cash and cash equivalents less bank overdrafts. The Group discloses this measure as it provides an indication of the net short-term liquidity available to the Group.

---

**Return on invested capital**

Return on invested capital (ROIC) is defined as the 12-month Group adjusted operating profit (operating profit excluding specific adjusting items and amortisation of intangible assets) divided by the 12-month average adjusted net assets (third-party working capital, plant and equipment, land and buildings, right-of-use assets, intangible assets and other balance sheet items). This measure excludes long-term employee benefits, deferred tax assets and liabilities, current tax payable, provisions, cash and cash equivalents, borrowings, overdrafts and lease liabilities.

---

**Adjusted earnings per share**

Adjusted earnings per share is defined as operating profit adjusted to exclude specific adjusting items and amortisation of intangible assets, plus share of profit of associate less net financing costs, income tax expense and non-controlling interests, divided by the weighted average number of Ordinary shares during the period. This measure of earnings is shown because the Directors consider it provides an indication of adjusted performance, which is less impacted by adjusting items and therefore reflects the underlying performance trends in the business.

A reconciliation from IFRS profit to the profit used to calculate adjusted earnings per share is included in note 10 to the consolidated financial statements on page 141.

**Constant-currency revenue and adjusted operating profit**

Constant-currency revenue and adjusted operating profit are derived by translating the prior year results at current year average foreign exchange rates. These measures are used as they allow revenue to be compared excluding the impact of foreign exchange rates. Page 157 provides further information on the principal foreign currency exchange rates used in the translation of the Group’s results to constant-currency at average exchange rates.

This Strategic Report, as set out on pages 2 to 57, has been approved by the Board.

On behalf of the Board

Stephanie Mackie

Company Secretary

3 March 2022
DEAR SHAREHOLDER

I reported to you last year that Morgan’s governance framework served the Company well during 2020. In some ways 2021 proved even more challenging, with a bounce back in trading and resumption of growth in the business, the reintroduction of improvement initiatives that had been put on hold during 2020, and the launch of the next phase of our strategy – all whilst continuing to deal with the challenges of the COVID-19 pandemic.

My fellow Directors and I continued to support and guide executive management and worked collaboratively to navigate through competing priorities against a challenging trading and environmental backdrop.

The report which follows explains the governance framework and the workings of the Board and Committees and demonstrates how the Board continued to perform effectively.

Apart from the priorities I discussed in my introductory statement to this Report the key governance priorities for the Board during 2021 were:

BOARD’S OVERSIGHT OF STRATEGY

The Board undertook an essential role in overseeing the development of the next phase of the Group’s strategy with the identification of three new execution priorities, explained in detail in the Strategic Report. When debating the strategic direction of the Group, the Board is mindful of the Company’s wider role in society and our desire to conduct our business responsibly and with respect to the environment.

ENGAGEMENT WITH THE WORKFORCE AND OTHER KEY STAKEHOLDERS

During 2021, we held a number of engagement sessions with small groups of employees, both virtually and in person, which provided a forum for the non-executive Directors to listen to employees and hear about the issues that are important to them. These sessions have also afforded the non-executive Directors an insight into whether employees are aligned with the Group’s purpose and how employees experience the Group’s culture.

ENHANCING BOARD DISCUSSION

The Board’s role in both supporting and challenging executive management has been even more important during 2021, as the Group navigated a return to robust growth. Every Board meeting reviewed the health and safety performance of the Group to ensure the continued safety of our people. The lost time accident trend increased during 2021 and the Board has been closely engaged with the development and deployment of our updated approach to safety training and management. The Board supported the completion of the restructuring programme started in 2020 and has continued to review the continuing operational challenges caused by the economic and geopolitical environment. Discussions during Board meetings have focused on the immediate challenges whilst also having regard to the future of the Group.

BOARD EFFECTIVENESS

During 2021, the Board undertook a thorough evaluation of its own performance with the assistance of an external facilitator. The overall conclusion of the review was that the Board is operating effectively, however, the process proved insightful and highlighted a number of recommendations which were discussed by the Board. The key areas for improvement are set out in the Corporate Governance Report.

BOARD CHANGES

In May 2021, Peter Turner announced his intention to retire, and he will step down from the Board in June 2022. Following a selection process conducted by the Nomination Committee, the Board has appointed Richard Armitage who will join the Board on 30 May 2022 and will take over from Peter as Chief Financial Officer.

SECURING OUR FUTURE

As I reflect on the role of the Board in this time of challenge and change, I believe that the governance framework that we have in place has enabled the Board to achieve the right balance between monitoring the performance of executive management, identifying the risks and opportunities that are relevant to the Group’s future success, setting the strategic direction for the Group, whilst ensuring that we take care of our employees, customers and shareholders.

Douglas Caster CBE FIET
Chairman
1. DOUGLAS CASTER CBE FIE
Non-executive Chairman
APPOINTED: Non-executive Director in February 2014, Non-executive Chairman and Nomination Committee Chairman on 1 January 2019.

SKILLS AND CONTRIBUTION: Douglas has significant experience and a strong track record of managing and driving growth within electronics businesses.

CAREER AND EXPERIENCE: Douglas began his career as an electronics design engineer with the Racal Electronics Group in 1975, before moving to Schlumberger in 1986 and then to Dowty as Engineering Director of Sonar & Communication Systems in 1988. In 1992, he became Managing Director of that business and, after participating in the management buy-out that formed Ultra Electronics, joined the Board in October 1993. In April 2000, he became Managing Director of Ultra’s Information & Power Systems division. In April 2004 he was appointed Chief Operating Officer and became Chief Executive in April 2005. He was appointed Deputy Chairman in April 2010 and was Chairman of Ultra from April 2011 until 28 January 2019. Douglas was non-executive Chairman of Mabey Limited from January 2015 until June 2019.

Douglas was Morgan Advanced Materials plc’s Senior Independent Director from January 2015 until December 2017. He was appointed to the role of Chairman in January 2019.

ADDITIONAL APPOINTMENTS: None.

COMMITTEES:

2. PETER RABY
Chief Executive Officer
APPOINTED: August 2015.

SKILLS AND CONTRIBUTION: Pete has a strong track record of driving improved business performance in multiple large-scale and complex organisations.

CAREER AND EXPERIENCE: Peter joined Morgan Advanced Materials plc in April 2016 as Chief Financial Officer. Before this, Peter was Finance Director at Smiths Group plc from 2010 to 2015. During this time, he was responsible for driving restructuring programmes across the Group to enhance operating margins, with a strong focus on improving operating cash flow. Prior to Smiths, Peter was Finance Director from 2007 to 2009 at Venture Production plc before it was acquired by Centrica plc in 2009. From 1995 to 2006, Peter held several senior positions at The ROC Group plc, including Finance Director of the Industrial and Special Products division. Peter started his career as an auditor at Price Waterhouse. He holds a degree in chemistry from Oxford University.

ADDITIONAL APPOINTMENTS: None. Peter will step down as Morgan’s Chief Financial Officer on 30 May 2022 and from the Board in June 2022.

3. PETER TURNER
Chief Financial Officer
APPOINTED: April 2012.

SKILLS AND CONTRIBUTION: Peter has significant financial experience combined with a strong track record of driving improved business performance in multiple large-scale and complex organisations.

CAREER AND EXPERIENCE: Peter joined Morgan Advanced Materials plc in April 2016 as Chief Financial Officer. Before this, Peter was Finance Director at Smiths Group plc from 2010 to 2015. During this time, he was responsible for driving restructuring programmes across the Group to enhance operating margins, with a strong focus on improving operating cash flow. Prior to Smiths, Peter was Finance Director from 2007 to 2009 at Venture Production plc before it was acquired by Centrica plc in 2009. From 1995 to 2006, Peter held several senior positions at The ROC Group plc, including Finance Director of the Industrial and Special Products division. Peter started his career as an auditor at Price Waterhouse. He holds a degree in chemistry from Oxford University.

ADDITIONAL APPOINTMENTS: None. Peter will step down as Morgan’s Chief Financial Officer on 30 May 2022 and from the Board in June 2022.

4. JANE AIKMAN
Independent Non-executive Director
APPOINTED: Non-executive Director in February 2016, Remuneration Committee Chair on 1 January 2019.

SKILLS AND CONTRIBUTION: Jane brings to the Board significant financial experience and knowledge of growing manufacturing and technology businesses gained in a variety of senior executive positions. Jane brings a valuable perspective from her current executive role in the technology marketing and advertising sector.

CAREER AND EXPERIENCE: Jane has been Group Chief Financial Officer of Inside Ideas Group Limited since July 2020. Up until May 2019, Jane was Chief Financial Officer of Arqiva Group Limited, a communications infrastructure company. Prior to this, she was the Chief Financial Officer of ECOM Group plc, a listed communications services and IT solutions provider. She was Chief Financial Officer and Chief Operating Officer of Phoenix IT Group plc until its acquisition by Daisy Group in 2015. Jane has also held Chief Financial Officer positions at Infinis plc, Wilson Bowden plc and Pressac plc. From 1995 to 2006, Prior to Smiths, Peter was Finance Director from 2007 to 2009 at Venture Production plc before it was acquired by Centrica plc in 2009. From 1995 to 2006, Peter held several senior positions at The ROC Group plc, including Finance Director of the Industrial and Special Products division. Peter started his career as an auditor at Price Waterhouse. He holds a degree in chemistry from Oxford University.

ADDITIONAL APPOINTMENTS: None. Peter will step down as Morgan’s Chief Financial Officer on 30 May 2022 and from the Board in June 2022.

ADDITIONAL APPOINTMENTS: Non-executive Director; H&H & Smith Holdings PLC.

5. HELEN BUNCH
Independent Non-executive Director
APPOINTED: Non-executive Director in February 2016, Remuneration Committee Chair on 1 January 2019.

SKILLS AND CONTRIBUTION: Helen has significant experience of driving business performance and building businesses in new markets. Helen also brings to the Board a valuable perspective from her current executive role leading a business in the construction sector.

CAREER AND EXPERIENCE: At the start of her career, Helen spent 17 years working in global businesses serving a wide variety of industries from automotive to household products, including 11 years with ICI and the remainder with a successor company, Lucite International Ltd. In 2006, Helen joined Wates Group, the privately-owned construction and property services company, as Group Strategy Director, and became Managing Director of Wates Retail Limited in January 2011. From 2011 to July 2019 Helen was Managing Director of Wates Smartspace Limited, the enlarged property services business following a merger with another Wates company and the acquisition of a facilities management business. In July 2020, Helen became Executive Managing Director of Wates Residential.

ADDITIONAL APPOINTMENTS: Executive Managing Director of Wates Residential.

COMMITTEES:

6. LAURENCE MULLIEZ
Senior Independent Director
APPOINTED: Non-executive Director in May 2016, Senior Independent Director in December 2017.

SKILLS AND CONTRIBUTION: Laurence has significant experience in growing, simplifying and unifying complex international and industrial manufacturing businesses, and brings valuable knowledge of the energy (including renewables), steel and infrastructure industries, and insight into some of Morgan’s key markets.

CAREER AND EXPERIENCE: Laurence joined Banque Nationale de Paris in 1988, followed by B&M Pars Inc. in 1992, and then Amaco Chemical Inc. in 1993, which was acquired by BP (p.l.c. in 1998. She spent a further 11 years at BP in a variety of roles including Chief Executive of Castrol Industrial Lubricants and Services. Laurence was Chief Executive of independent power producer Eoxis UK Limited from 2010 to 2013.

ADDITIONAL APPOINTMENTS: Chair of Voltalia S.A. and of Globeleq Ltd, member of the supervisory board of SBM Offshore N.V. and member of the supervisory board of Siemens Energy AG.

COMMITTEES:

7. CLEMENT WOON
Independent Non-executive Director
APPOINTED: May 2019.

SKILLS AND CONTRIBUTION: Clement has broad managerial experience in globally operating technology and consumer-related industries. He has a strong track record of renewing traditional industries and revitalising growth through strategic interventions, and in-depth experience and knowledge of markets within the Asia Pacific region.

CAREER AND EXPERIENCE: From August 2016 to May 2020, Clement was Group CEO of Saurer Intelligent Technology Co. Ltd, a €7 billion technology and components business listed on the Shanghai Stock Exchange. Clement continued to serve on the board as non-executive director until August 2021. Prior to this, from April 2014 to July 2016, Clement was Advisor and Co-CEO of Tianying Industry Co. Ltd, an industrial company in China with diverse interests including biotech, automotive and textiles. Previously Clement held various senior positions at companies based in Switzerland and Singapore including Division CEO of Laiwa Geosystems AG, President & CEO of SARTS Ltd and CEO Tectonics Division of CC, Darken AG. Clement has an MBA in Technology Management from Nanyang Technological University, Singapore, an MSc in Industrial Engineering and a BEng in Electrical Engineering from the National University of Singapore.

ADDITIONAL APPOINTMENTS: Chairman of PFI Foods Industries Pte Ltd.

COMMITTEES:
Non-executive directors should have sufficient time to meet their board responsibilities. They should provide constructive challenge and

The board should ensure that the necessary resources are in place for the company to meet its objectives, and measure performance against them. The board should also establish a framework of prudent and effective controls, which enable risk to be assessed and managed.

The board should ensure that the board's approach to stewardship is in line with the company’s values and support its long-term sustainable success. The workforce should be able to raise any matters of concern. The board should also have a framework of prudent and effective controls, which enables risk to be assessed and managed.

The board should ensure that workforce policies and practices are consistent with the company’s values and support its long-term sustainable success. The workforce should be able to raise any matters of concern.

Annual evaluation of the board should consider its composition, diversity and how effectively members work together to achieve objectives. Individual evaluation should demonstrate whether each director contributes effectively to the board.

The board should also ensure that the necessary resources are in place for the company to meet its objectives, and measure performance against them.
A strong corporate governance framework underpins the activities of the Board.

THE ROLE OF THE BOARD
The Board is collectively and ultimately responsible to the Company’s shareholders for the long-term sustainable success of the Company, and oversees how the organisation generates and preserves value. It establishes the Group’s purpose, sets the strategic direction and monitors Morgan Advanced Materials’ culture to ensure this is aligned to the strategic vision.

The Board engages with key stakeholders, including shareholders and employees, and sets the tone from the top by operating with the utmost integrity in decision-making and business conduct.

The Board supervises and monitors progress against execution priorities, whilst ensuring that there are robust and effective controls which enable risks and emerging risks to be identified, assessed, and managed.

The Board operates within a clear framework consisting of matters reserved for the Board as well as an established structure of committees, each with distinct terms of reference and delegated authorities. The key areas of responsibility for the Board and each of its Committees are detailed on pages 64 and 65.

MATTERS RESERVED FOR THE BOARD
- Overall leadership, purpose, strategic aims and long-term objectives and risk appetite of the Group;
- Alignment of the Group’s culture with purpose and values and monitoring implementation of the Morgan Code;
- Any changes relating to Group capital and corporate structure;
- Oversight and approval of full-year and half-year financial results, including approval of the Annual Report and ensuring a ‘fair, balanced and understandable’ presentation of the Group’s financial position;
- Approval of dividend policy and any significant changes to accounting, treasury and tax policies;
- Approval of contracts and expenditure as specified in the Limits of Authority schedule;
- Stakeholder communication and engagement;
- Appointment of the external auditor;
- Approval of arrangements with financial institutions;
- Review Board and Committee composition;
- Lead on Board succession planning;
- Monitor progress in relation to the Board’s Inclusion and Diversity Policy and have oversight of the Group’s overall inclusion and diversity aims.

PRINCIPAL COMMITTEES OF THE BOARD
(And key responsibilities)

AUDIT COMMITTEE
- Ensure the integrity of, and review processes for financial reporting and the narrative information presented to stakeholders;
- Monitor and ensure the effectiveness of the external audit;
- Ensure the effectiveness of the internal audit function;
- Review the management of the Group’s principal risks;
- Ensure the effectiveness of internal controls;
- Oversee implementation of, and compliance with, the Morgan Code.

REMUNERATION COMMITTEE
- Set, review and monitor the remuneration policy and ensure it is aligned with strategy;
- Agree the remuneration for the Chairman, executive Directors and certain senior executives;
- Oversee incentive structure and target setting;
- Set and review the policy for post-employment shareholding requirements;
- Determine the policy for pension arrangements;
- Consider wider workforce remuneration and the alignment of executive remuneration with this.

NOMINATION COMMITTEE
- Lead on Board succession planning;
- Review Board and Committee composition;
- Lead the process for appointments to the Board;
- Monitor the process for the induction of new Directors;
- Monitor progress in relation to the Board’s Inclusion and Diversity Policy and have oversight of the Group’s overall inclusion and diversity aims.

EXECUTIVE COMMITTEE
- Drive Group and business unit strategic implementation;
- Deliver operational, financial and non-financial performance;
- Review health, safety and environmental performance, drive improvement and embed the safety culture;
- Approve Group policies and review their implementation and effectiveness;
- Lead on assessment and control of risk;
- Approve prioritisation and allocation of resources.

DISCLOSURE COMMITTEE
- Assist in informing the Board concerning the identification of inside information;
- Recommend how and when the Company should disclose such information;
- Ensure any such information is managed and disclosed in accordance with all applicable legal and regulatory requirements.

GENERAL PURPOSES COMMITTEE
- Approve opening of/changes to bank accounts;
- Approve arrangements with financial institutions;
- Approve guarantees and indemnities;
- Approve substantive intra-Group loans;
- Approve intra-Group dividends and capital restructuring;
- Approve awards under the Company’s share schemes (after Remuneration Committee approval) and any Employee Benefit Trust-related loans.
The Committee meets as required. A non-executive Director must be present. To a General Purposes Committee, at which specific matters including routine approvals are considered. The membership of the Disclosure Committee comprises the Directors and the Company Secretary, but meetings are generally attended by the executive Directors and the Company Secretary. In 2021, the Disclosure Committee met twice.

**BOARD SIZE AND COMPOSITION**
Throughout 2021, the Board comprised five non-executive Directors (including the Chairman) and two executive Directors. This is considered to be the appropriate number of members for the Board, given the scale of the Group’s operations at this time. Biographies of the Directors in post at the date of this Report, including details of their skills, career and experience and any other significant external commitments, are set out on pages 60 and 61.

The Board delegates day-to-day management of the Group and operational matters to the Executive Committee. This Committee is led by the Chief Executive Officer and its membership comprises the Chief Financial Officer, the Group Human Resources Director, the Group General Counsel, the Chief Information Officer and the Presidents of each of the global or divisional business units. In 2021, the Executive Committee met at least monthly to discuss a variety of matters including: development of Morgan Advanced Materials’ execution priorities, ESG performance, talent management and succession planning, diversity and inclusion, financial performance, and the review of Group policies. It also held monthly dedicated meetings on health and safety and on ethics and compliance. The Company Secretary acts as Secretary to the Committee and attends all meetings.

The Board delegates authority for certain other specific matters including routine approvals to a General Purposes Committee, at which a non-executive Director must be present. The Committee meets as required.

The Disclosure Committee meets on an ad-hoc basis during the year to assess whether information which directly concerns the Group is inside information (as defined by the Market Abuse Regulation), and to discharge other responsibilities relating to the control and disclosure of inside information. The membership of the Disclosure Committee comprises the Directors and the Company Secretary, but meetings are generally attended by the executive Directors and the Company Secretary. In 2021, the Disclosure Committee met twice.

**THE COMPANY’S GOVERNANCE FRAMEWORK**
Each Committee has terms of reference which set out its membership, duties and how it operates. The individual reports of each of the principal Committees can be found on pages 74 to 78, 79 to 81, and 104.

The Board delegates the day-to-day management of the Group and operational matters to the Executive Committee. This Committee is led by the Chief Executive Officer and its membership comprises the Chief Financial Officer, the Group Human Resources Director, the Group General Counsel, the Chief Information Officer and the Presidents of each of the global or divisional business units. In 2021, the Executive Committee met at least monthly to discuss a variety of matters including: development of Morgan Advanced Materials’ execution priorities, ESG performance, talent management and succession planning, diversity and inclusion, financial performance, and the review of Group policies. It also held monthly dedicated meetings on health and safety and on ethics and compliance. The Company Secretary acts as Secretary to the Committee and attends all meetings.

The Board delegates authority for certain other specific matters including routine approvals to a General Purposes Committee, at which a non-executive Director must be present. The Committee meets as required.

The Disclosure Committee meets on an ad-hoc basis during the year to assess whether information which directly concerns the Group is inside information (as defined by the Market Abuse Regulation), and to discharge other responsibilities relating to the control and disclosure of inside information. The membership of the Disclosure Committee comprises the Directors and the Company Secretary, but meetings are generally attended by the executive Directors and the Company Secretary. In 2021, the Disclosure Committee met twice.

**BOARD SIZE AND COMPOSITION**
Throughout 2021, the Board comprised five non-executive Directors (including the Chairman) and two executive Directors. This is considered to be the appropriate number of members for the Board, given the scale of the Group’s operations at this time. Biographies of the Directors in post at the date of this Report, including details of their skills, career and experience and any other significant external commitments, are set out on pages 60 and 61.
Board meeting/activities
In 2021, the Board met formally on nine occasions. Due to the COVID-19 pandemic, Board meetings were held by a mixture of attendance in person and video conference attendance.

Attendence at meetings
The attendance of each Director at Board, Audit, Remuneration and Nomination Committee meetings is set out below:

<table>

| Following recommendation from the Nomination Committee, new CFO’s appointment approved; |
| Reports from the chair of the Remuneration, Audit and Nomination Committees considered; |
| Half-year and full-year financial results approved; |
| Consideration given to whether the Annual Report and Accounts are fair, balanced and understandable given; |

Board’s monitoring and assessment of culture and workforce engagement
As set out in greater detail on pages 28 to 35 in the Sustainability and Responsibility section, Morgan Advanced Materials objective is to build an organisation where collaboration and empowered decision-making at all levels of management (rather than in isolation locally) is more prevalent, and where the right outcomes are reached, in the right way (ethically, safety and inclusively). The Morgan Leadership Behaviours support the ethos that “It is not what you do, but how you do it that counts.” The Board continues to monitor and assess the development of the Group’s culture to ensure this is aligned with Morgan’s purpose and strategy.

The Board has developed its approach to the monitoring and assessment of culture by building on the work already undertaken to embed a foundation of ethics, safety and inclusion whilst enabling the Board to set the tone from the top. The Board uses a range of qualitative and quantitative measures, supplemented by opportunities for Board members to experience the culture for themselves, which include:

- Ethics reporting including the monitoring of compliance with the Morgan Code, reports on certain areas investigated and the effectiveness of the ‘Speak Up’ hotline;
- Regular safety performance reviews which include the “thinkSAFE” programme, and updates on safety metrics and performance against targets;
- Regular discussion and monitoring of ways to achieve the objective of a zero-harm culture;
- Annual talent review of leadership development, with added focus on promoting diversity and inclusion;
- Presentations to the Board by each global business unit on strategy;
- Presentations to the Board by members of the Executive Committee, representatives from the businesses and functional leaders. Virtual meetings have enabled a wider range of presenters to take part to discuss a greater breadth of topic; and
- Insight from the results of the all-employee engagement survey, “Your Voice”, which was conducted in November 2021.

EMBEDDING A SAFETY CULTURE

The Board considers the safety of employees to be a top priority. During 2021, the Board had oversight of a fresh approach to safety which is set out in detail on pages 18 to 19 in the Health and Safety section of the Sustainability and Responsibility report.

A number of additional mechanisms will be employed in 2022 to progressively embed the Group’s desired culture as follows:

- Voluntary employee resource groups to be established to further develop employee participation in areas they are passionate about;
- Development of a set of Group-wide core values and their communication to employees;
- Definition and reinforcement of the behaviours required in the role of the Group’s leaders;
- Training for all employees on behavioural safety and the Group’s safety commitments;
- Implementation of actions arising from insights gained from the all-employee engagement survey; and
- Further employee engagement sessions by the non-executive Directors within various areas of the business/groups of employees.

Workforce engagement

For the purposes of workforce engagement, the Board defines the workforce as all employees directly employed by the Group.

The Board has reviewed the three methods suggested for employee engagement in the UK Corporate Governance Code and has concluded the most effective approach for its workforce is a combination of methods (which is also permitted under the Code). This approach has been chosen by the Board as it recognises the global reach of the Group with operations in over 25 countries, with varied working conditions and with many employees in operational and manufacturing roles without internet access in the workplace. A hybrid approach to workforce engagement enables flexibility to ensure all employees in all locations are considered.

The mechanisms selected by the Board to engage with the workforce primarily comprise a number of dedicated meetings between the non-executive Directors and small groups of employees (without senior management present), to hear the views of the workforce directly, as well as taking other opportunities for informal engagement.

Due to the COVID-19 pandemic, which restricted international travel, all the employee engagement sessions that took place in 2021 were virtual, apart from one in-person meeting at the Group’s manufacturing site in Rugby, UK where Directors also had a tour of the site and met employees who demonstrated operations and explained their roles, and received a presentation from site leadership. The virtual meetings were held via video conferencing where all participants could see each other, and where required a professional interpreter was employed to ensure effective communication between all participants.

HOW THE BOARD ENGAGES WITH SHAREHOLDERS

The Board engages with shareholders in a manner which enables it to understand their views and concerns. Engagement enables flexibility to ensure the shareholder community is kept informed of the Company’s key corporate messages and the Board is aware of shareholder views and any concerns.

The Board is satisfied that the combination of:

(i) dedicated engagement sessions with diverse groups of employees, encouraging meaningful discussion and frank feedback;
(ii) meetings with employees in their place of work during Board visits to Morgan facilities; and
(iii) the varied encounters with employees during other Morgan events gives a real insight into the working conditions of employees and provides a range of effective mechanisms with which to engage with employees.

Feedback from employees indicated they appreciate these interactions, which promote a feeling of being valued and listened to by the Board.

Engagement with stakeholders

The Board is responsible for and oversees ‘Morgan Advanced Materials’ dialogue and communication mechanisms with shareholders. It recognises that it is important that communication is two-way, to ensure the shareholder community is kept informed of the Company’s key corporate messages and the Board is aware of shareholder views and any concerns.

Ways in which the Board engages with shareholders and listen to their views include:

- Results presentations and trading updates
- Roadshows
- Broker presentations
- Annual General Meeting (AGM)

Other engagement methods

- Other methods used to provide shareholders with up-to-date information include regulatory announcements, press releases, the Annual Report and Accounts, presentations and webcasts.

Chairman and Senior Independent Director

Any shareholder who has concerns which cannot be addressed in another way may contact the Chairman or the Senior Independent Director. To do so please write in the first instance to the Company Secretary. To date, no shareholder has found this method of engagement necessary.
CORPORATE GOVERNANCE

Relations with customers

The Group makes sure that all interactions with customers through regular reports from the Chief Executive Officer as well as meetings with the Group’s senior management, as well as the Board reviews. The Group seeks to foster long-term relationships with customers, built on trust and openness. In occasion, the Board reviews and approves the entering into, or renewal of long-term agreements with customers.

Relations with suppliers

Morgan Advanced Materials ensures its interactions with suppliers are always ethical, by applying the Morgan Code and specific Group policies. Suppliers are held to an ethical, and due diligence. The Company seeks to ensure that all its suppliers operate in a responsible manner, by fostering long-term relationships built on trust, being truthful in communications, and meeting agreed payment terms. During 2021, the Board revised and approved the publication of a new Supplier Code of Conduct, which seeks to ensure that new suppliers operate in a responsible way, and that their workers are safe and treated fairly. We ensure that environmental and social impacts are taken into consideration during our process for sourcing new suppliers.

Also in 2021, a new Conflict Minerals Policy was published which sets out Morgan’s position on avoiding the sourcing of conflict minerals involving taxation, its, tungsten and gold from areas where the revenue may aid the furtherance of human rights violations and other illegal activities. Further detail of the Group’s policies on Conflict and Conflict Minerals Policy may be found on page 34 of the Responsibility and Sustainability section.

Morgan publishes its Modern Slavery Act Transparency Statement annually, step-by-step broken down by the Group to seek that there are no incidents of modern slavery within the business, and its supply chain, in accordance with the requirements under the Modern Slavery Act 2015. The Board reviews the Group’s operational, legal and compliance framework to prevent modern slavery in its supply chain, which includes employee training, contractual terms and conditions, and due diligence processes. The Transparency Statement can be found on pages 106 to 109 in the Other Disclosures section.

Engagement with pension trustees

The Board met the Independent Trustee of the UK defined benefit pension scheme in February 2022 and had the opportunity to ask questions. The Director of Pensions and the Chief Financial Officer also provide regular updates to the Board on pension issues and funding and regulatory developments affecting the Company’s main defined benefit schemes around the world. Including those in the USA where the UK, there are a significant number of pensioner members.

Informal decision-making and Board support

The Company Secretary with the Chair, ensures the Board has full and timely access to necessary information, with Board papers being made electronically available at least five working days prior to each Board and Committee meeting to enable informed decision-making. Non-executive Directors also receive information and updates between formal Board meetings. The Company Secretary attends all Board meetings and all Directors have access to her advice and if necessary professional advice at the Company’s expense to assist them in fulfilling their duties as Directors. Should a Director have concerns about the running of the Company or a proposed action, such concerns would be recorded in the Board minutes. In 2021 no such concerns were raised or recorded. This ensures that appropriate directors’ and officers’ liability insurance cover is in place for the Board.

Time commitment of the Board

Before an individual joins the Board, discussions are held with them to ensure they will have sufficient availability and time to meet the needs of the Company. The number of external directorships already held is taken into account to ensure overbooking issues do not arise. In addition, prior to undertaking any additional external roles, the Chairman and non-executive Directors are asked to confirm whether that they will continue to have sufficient time to fulfil their commitments to the Company. In accordance with the Code, Directors are asked to seek Board approval prior to accepting any additional external appointments and in 2021, 2 Directors sought approval from the Board prior to accepting the position as non-executive Director at P&I Foods Industrial Ltd. The Directors are also asked to confirm, on an annual basis, whether there has been any change to the directorships they hold.

Despite the extra burdens caused by the COVID-19 pandemic, it is pleasing to note that during 2021 no availability or time commitment issues were experienced.

Conflicts of interest

The Board met the Independent Trustee of the UK defined benefit pension scheme in February 2022 and had the opportunity to ask questions. The Director of Pensions and the Chief Financial Officer also provide regular updates to the Board on pension issues and funding and regulatory developments affecting the Company’s main defined benefit schemes around the world, including those in the USA where the UK, there are a significant number of pensioner members.

The Company has procedures in place to ensure any conflicts of interest which arise are captured, assessed and declared. If a Director declare a conflict of interest the Board will consider the matter and, if necessary, the conflict of interest will be recorded and the Director excluded from being provided with any further information or being involved in any further discussion or decision-making associated with affected topics. The Directors are also asked to review and declare any conflicts of interest and outside interests on an annual basis. The review for 2021 confirmed that no actual or potential conflicts of interest had occurred during the year.

Board balance, experience, diversity and independence

The size, structure and composition of the Board is reviewed annually taking into account the skills and experience of existing Board members and the requirements of the business, to ensure there is a good balance of skills and global experience drawn from a variety of backgrounds. The Nomination Committee agrees that the number of Directors on the Board is appropriate for the scale of the Group’s operations. The importance of having Board members from a diverse background is also recognised and succession plans are in place for key top and mid-level leadership positions to ensure the Group continues to retain and develop the necessary skills and business knowledge required.

In May 2021, Morgan announced the retirement of Peter Turner from the Company as Chief Financial Officer and Group Company Secretary, since 1989. The retirement of Peter Turner from the Board is expected to take place during 2022; the Board wishes to thank him for his contributions to the Group over the years and wishes him well in his retirement.

The Board has overall responsibility for the implementation of the strategy and the strategic objectives of the Group, and for carrying out the functions of the Group as a whole. The Board has defined its responsibilities for the implementation of the strategy, and the Board is responsible for the oversight of the Group’s strategy in accordance with the Government Code of Corporate Governance. The Board monitors the Group’s performance against the strategy and reviews the Group’s strategy and its performance on a regular basis.

The Board has overall responsibility for ensuring that the Group’s strategy is aligned with the Group’s purpose, values and culture, and for ensuring that the Group’s strategy is delivered in a manner consistent with the Group’s purpose, values and culture.

The Board has overall responsibility for ensuring that the Group’s strategy is aligned with the Group’s purpose, values and culture, and for ensuring that the Group’s strategy is delivered in a manner consistent with the Group’s purpose, values and culture. The Board has overall responsibility for ensuring that the Group’s strategy is aligned with the Group’s purpose, values and culture, and for ensuring that the Group’s strategy is delivered in a manner consistent with the Group’s purpose, values and culture. The Board has overall responsibility for ensuring that the Group’s strategy is aligned with the Group’s purpose, values and culture, and for ensuring that the Group’s strategy is delivered in a manner consistent with the Group’s purpose, values and culture.
This Report gives an insight into the responsibilities, activities and workings of the Audit Committee and how it discharged its duties during 2021.

DEAR SHAREHOLDER

I am pleased to present the Audit Committee’s report for 2021. Following 2020, which was an exceptional year for the Group, the Committee’s work in 2021 was more routine, however, the Committee continued to challenge management and the external auditor across a number of key areas of focus, including key accounting judgements and control issues.

The Committee’s primary function is to ensure the integrity of the Group’s financial reporting and external audit processes and the maintenance of sound internal control and risk management procedures.

The Audit Committee reports to the Board of Directors on whether the Annual Report and Accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the Group’s position and performance, business model and strategy. The Committee’s role is to ensure that management’s disclosures reflect the supporting detail or to challenge them to explain and justify their interpretation and, if necessary, re-present the information.

The Committee has provided assurance to the Board that the Group’s financial statements faithfully represent the Group’s financial performance. Where adjusted, non-statutory performance measures have been disclosed, the Committee is satisfied that they provide useful, additional insight into the Group’s ongoing trading. They are considered to be complementary to the comparable statutory measures, without undue prominence, and their definitions and the reconciliations to statutory measures are clearly disclosed.

In addition, the Committee monitored the systems of internal control to ensure that these continued to operate effectively. In particular, the Committee reviewed the progress of the internal audit plan and the effectiveness of the internal audit function and was pleased that the function has adapted its processes to be able to operate effectively despite the continuation of some restrictions on travelling to Morgan sites.

This is the second Annual Report to be audited by Deloitte LLP following their appointment after the audit tender process which concluded in 2019. Last year, the Committee monitored the successful transition to a new audit approach and has scrutinised the performance and effectiveness of the external audit and found it to be effective.

Feedback was provided to the audit partner and the Committee reviewed the scope and content of the FY2021 audit plan.

The Committee has monitored the reports raised through the ethics hotline and ensured that executive management has responded to these quickly and appropriately. The Committee has overseen improvements in the case management of reports and has received the key themes and trends in the number, type and source of these reports to gain an understanding of how effectively the Morgan Code of Conduct is embedded. This information has been used by the Board of Directors as part of its assessment of Morgan’s culture.

The Committee continues to monitor and address any changes in governance and reporting requirements. The landscape in which audit services are provided is likely to change in the near future and we await the recommendations following the Government’s consultation on Restoring Trust in Audit and Corporate Governance.

The role of the Audit Committee will remain in sharp focus in the year ahead and we continue to be committed to meaningful disclosure of the Committee’s activities.

COMMITTEE MEMBERS

JANE AIKMAN (CHAIR)  
HELEN BUNCH  
LAWRENCE NULIEZ  
CLEMENT WOON

Jane Aikman has chaired the Committee since July 2017 and has recent and relevant financial experience and competence in accounting and auditing gained from her current executive role and her previous Chief Financial Officer role.

The Committee as a whole has competence in the sectors in which the Group operates. All Committee members are independent non-executive Directors. Biographies of the Committee members including details of relevant sector experience are set out on pages 60 to 61.

The Committee has an annual cycle of business which is designed to ensure it discharges in full its responsibilities over the course of each reporting year. This plan includes a number of standing agenda items, such as:

- Scheduled financial reporting updates which enable the Committee to monitor the integrity of the consolidated financial statements, agree the content of the full-year and half-year announcements relating to the Company’s financial performance, and review all significant financial reporting judgements;
- Review of the PricewaterhouseCoopers’ most recent Annual Review and Year-end Letter and consideration of the proposed focus areas;
- Reports from the external auditor covering their views on key judgements and accounting estimates, and progress against the agreed audit plan;
- Review and discussion of the external audit plan and strategy for the 2022 year end;
- Approval of the audit engagement letter and audit fee, and confirmation of auditor independence;
- Updates presented by the Head of Internal Audit covering progress against the internal audit annual plan, management reports on internal financial control and risk management systems, and the implementation of management actions to address any control weaknesses that have been identified;
- Review the internal audit plan for the coming year;
- Annual review of the effectiveness of the internal audit function;
- Ethics and compliance updates, including reports on whistleblowing and investigations;
- On behalf of the Board, annual review of the effectiveness of the whistleblowing reporting line; and
- Review of the Committee’s terms of reference.

MEETINGS

The Committee met four times during the year, with the timing and the agenda of the meetings closely linked to key points in the annual reporting cycle.

The Chairman of the Board, the executive Directors and key members of senior management attended the meetings by invitation, as did senior representatives of the external auditor.

At the end of each meeting, Committee members meet the external auditor, the Head of Internal Audit and the Director of Ethics and Compliance without the executive Directors or other members of management present.

Between meetings, the Chair of the Audit Committee keeps in contact with the Chairman of the Board, the Chief Executive Officer, the Chief Financial Officer, the Group Financial Controller, the external auditor, the Head of Internal Audit and the Director of Ethics and Compliance as necessary.

INFORMATION AND SUPPORT

The Committee may request the attendance at meetings of any Director or employee as may be considered appropriate by the Committee. Committee members receive appropriate and timely information on matters needed to enable the Committee to fulﬁl its responsibilities. Training and development information is made available to Committee members as appropriate.

AUDIT COMMITTEE TERMS OF REFERENCE

The Committee supports the Board in its responsibilities in relation to corporate reporting, risk management and internal controls, and manages the relationship with the Group’s external auditor. The Committee provides regular reports to the Board. The Committee’s terms of reference, reviewed during the year, are available on the Company’s website.

KEY ACTIVITIES DURING 2021

During 2021, the key areas of focus for the Committee were:

- Receiving reports on progress in relation to the internal audit plan, providing guidance and ensuring continuous improvement of the function;
- Conducting a robust review of the scope, remit and effectiveness of the internal control environment and ensuring risk management procedures are appropriate and effective;
- Overseeing the Group’s ethics and compliance programme and monitoring progress in compliance with the Morgan Code across the Group;
- Reviewing the management of all reports made to the ‘Speak Up’ hotline, or to management on ethics and compliance matters, considering the findings and recommended actions, including whether the Board should be notified of any investigations;
- Reviewing the trends arising from the ethics and compliance investigations to draw conclusions on control areas for improvement;
- Assessing the key areas of significant judgement in relation to the 2021 consolidated financial statements, which were: pensions, environmental provisions and contingent liabilities, the impairment of non-financial assets (excluding goodwill), recognition of deferred tax assets and the presentation of specific adjusting items;
- Considering the appropriateness of management’s assessment of going concern and the viability statement;
- Reviewing the Company’s draft 2021 Annual Report and Accounts and recommending to the Board that the document be approved. The review included specific consideration of whether the document was fair, balanced and understandable and whether alternative performance measures were appropriately defined and reconciled to statutory reporting measures, and were not given undue prominence;
- Reviewing the effectiveness of the external audit process;
- Receiving annual risk presentations from the Thermal Ceramics global business unit, the Technical Ceramics global business unit, the Electrical Carbon global business unit, the Seals and Bearings global business unit and the Metal Matrix Systems global business unit;
- Receiving an update from the Director of Group Tax on taxation issues;
- Recommending the tax strategy for Board approval; and
- Approving the appointments of both the Director of Ethics and Compliance and the Head of Internal Audit.

The Committee’s report is presented on pages 74 to 77.
The significant areas of judgement considered by the Directors, as a result of the inherent limitations of their review, and that their review is conducted by a diverse IT landscape and the Group's geographical breadth, as such, there is a heavy reliance on central review controls. The Directors are satisfied that an appropriate amount of time and consideration is devoted to the review and challenges of results, judgements and estimates – both by the global business units and the Group leadership team.

The main features of the Group's system of internal control and for assessing the potential risks to which the Group is exposed are summarised as follows:

Control environment
The Group’s control environment is underpinned by the Group’s policies and guidelines. The Group policies cover financial procedures; environmental, health and safety procedures; for example anti-bribery and anti-corruption, anti-trust and anti-competitive behaviour and trade compliance; and other areas such as IT and HR. There is a Limits of Authority Policy, which describes the parameters for authorising financial transactions and authorises the senior and other management, where there is a concern regarding ethical conduct. The reports investigated have included: the Group’s business model, solvency and liquidity, the Group’s principal and emerging risks at least twice a year. The identification and mitigation of such risks are regularly reviewed by the Executive Committee and the Board. These risk factors are further discussed in the Risk Management section on pages 38 to 43.

Internal audit
The Board and the Executive Committee hold regular, scheduled meetings, at which they monitor performance and consider a comparison of forecast and actual results, including cash flows and comparisons against budget and the prior comparable periods. The Committee receives reports from the President and Finance Directors of each of the divisions and global business units. The Group’s specific key risks, how these risks are managed and an assessment of the control environment, on an annual basis. The Committee oversees the Group’s compliance programme and the Group internal audit function, which present updates to the Committee. The Committee must maintain adequate resources in place for the function to carry out the plan. The Committee receives reports showing the ratings and key findings from each audit. The Committee chair is responsible for the Group’s internal control and risk management processes.

Performance monitoring
The Committee monitors the results of its reviews and takes into account the comments from the reviews and reports to the Board. The Committee must maintain adequate resources in place for the function to carry out the plan. The Committee receives reports showing the ratings and key findings from each audit. The Committee chair is responsible for the Group’s internal control and risk management processes.

REPORT OF THE AUDIT COMMITTEE

The Committee considers the internal audit function to be effective, with the quality, experience and expertise appropriate to the business.

External auditor, including independence and Non-Audit Services Policy

The external auditor, Deloitte LLP, has processes in place to safeguard its independence and objectivity, including specific safeguards where it is providing permissible non-audit services, and has confirmed in writing to the Committee that, in its opinion, it is independent.

In addition, the Company has a policy on the provision of non-audit services by the external auditor which was revised in 2019 and is in line with the FRC’s revised Ethical Standard 2019 which took effect on 15 March 2020.

- Certain non-audit services may not be provided. The external auditor may not review their own work, make any management decisions, create a mutuality of interest, and/or put themselves in the position of advocate.
- Any permissible non-audit work proposed to be placed with the external auditor with a total fee between £50,000 and £200,000 must be approved in advance by the Chair of the Audit Committee. Projects in excess of £200,000 must be approved in advance by the Audit Committee, with any such proposal being submitted in writing to the Chief Financial Officer, who would in turn seek approval from the Audit Committee. All permissible non-audit work, regardless of value, must be approved by the Group Financial Controller. Work which includes multiple phases is treated as a single project for approval purposes.
- The prior approval of the Audit Committee is required for any non-audit work which, when added to the fees paid for other non-audit work, would total more than 60% (previously 80%) of the audit fee;
- The value of non-audit fees must not under any circumstances exceed 70% of the average Group statutory audit fee incurred in the last three consecutive financial years.

To safeguard the objectivity and independence of the external auditor, the Company ensures that any non-audit services to be provided by the auditor are given prior approval by the Audit Committee where required under the Policy.

In the opinion of the Committee the auditor’s objectivity and independence were safeguarded despite the provision of a limited number of non-audit services by Deloitte LLP during 2021.

In 2021, the proportion of the auditor’s fees for non-audit work relative to the audit fee was 0.7% (or £28,000, 2020: 8.0%).

Auditor effectiveness

The Committee discussed the quality of the audit during the year and considered the performance of the external auditor as a separate agenda item at the meeting in February 2022. The Committee conducted a full review following the 2021 year end to gather feedback and look for continuous improvement opportunities.

The Committee considered all aspects of the auditor’s performance, based on a review of the effectiveness of the external audit process, which was conducted through a questionnaire taking into consideration relevant and professional and regulatory requirements. The questionnaire was completed by each GBU finance director and nine Group functional teams. In addition to the questionnaire, the following external auditor areas were reviewed:
- Independence verification;
- Audit methodology, use of component auditors and audit scope and coverage;
- Assessment of materiality and areas of audit focus, consideration of appropriate audit procedures, professional scepticism, appropriate management challenges, clarity and careful in reporting; and
- The FRC’s Audit Quality Review findings for Deloitte for the 2020/21 cycle of reviews and Deloitte’s proposed actions to address these findings as a firm.

The Committee confirmed Deloitte’s independence before recommending its reappointment for approval by shareholders at the Annual General Meeting (AGM) scheduled for May 2022.

External audit rotation

Deloitte LLP was appointed by shareholders as the Group’s statutory auditor in 2020 following a formal tender process. The external audit contract will be put out to tender at least every 10 years. The Committee considers that it would be appropriate to conduct an external audit tender by no later than 2030.

The Company has complied with the provisions of the Competition and Markets Authority’s Order on statutory audit services.

REPORT OF THE NOMINATION COMMITTEE

The Committee monitors the Board’s succession plans and considers appointments to the Board in support of the strategy and long-term success of the Group.

NOMINATION COMMITTEE ROLE

The Nomination Committee is responsible for:
- Keeping under review the composition of the Board and its successions, and regularly reviewing the balance of skills, knowledge, experience, independence and diversity of the Board and its Committees.
- Revising succession planning for the Executive Committee and overall talent strategy for senior leadership positions, by reference to Morgan’s Board Inclusion and Diversity Policy, which sets the overall tone for the Group’s approach to diversity.
- The Committee leads the process for appointments to the Board and ensures plans are in place for orderly succession to both the Board and senior management positions and to oversee a diverse pipeline for succession.
- The Committee’s formal role is set out in its terms of reference, which are available to view on the Company’s website.

NOMINATION COMMITTEE ACTIVITY IN 2021

On behalf of the Nomination Committee, I present our report for 2021. The Committee met three times during 2021 and members’ attendance is set out in the table on page 68.

The Committee performs a vital role in reviewing the composition and balance of skills and experience on the Board, enabling it to lead the process for appointments to the Board, keep under review the leadership needs of the Group, and ensure plans are in place for orderly succession to Board and senior management positions. During 2021, the Committee reviewed Board succession and assessed whether the objectives of the Board’s Inclusion and Diversity Policy, including how it supports Morgan’s strategy, had been implemented and what progress has been achieved. During the year, the Board reviewed succession planning and talent strategy for the Executive Committee and its direct reports, with a particular lens on our aim to foster diversity within the leadership population and increase the female leadership population to 40% by 2030.

In May 2021, the Company announced Peter Turner’s retirement as Chief Financial Officer. The Committee identified his successor, Richard Armaggia, who will join the Board on 30 May 2022 after a thorough search process which is set out in this Report.

The Nomination Committee remains conscious that to execute on Morgan’s execution priorities of Big Positive Difference, Innovate to Grow and Delight the Customer, building our talent pool with individuals whose skill sets and thinking can drive Morgan’s strategy and shape our culture is critical to the Group’s long-term success.

Douglas Caster CBIE
 Committee Chair

MAIN AREAS OF WORK DURING 2021

During 2021, the Committee’s key activities included:
- Considering the skills mix on the Board, including diversity of gender, ethnicity and geographical representation;
- Recommending the appointment of a new Chief Financial Officer;
- Reviewing how the objectives of the Board’s Inclusion and Diversity Policy, and its support of the Group’s strategy, have been implemented, and assessing progress against the objectives;
- Reviewing the structure, size and composition of the Board and its Committees, ensuring that they remain appropriately balanced;
- Reviewing the results of the annual performance evaluation of the Committee;
- Considering whether each Director continued to be able to allocate sufficient time to discharge their responsibilities effectively;
- Considering the Directors’ annual re-election at the 2021 Annual General Meeting (AGM);
- Overseeing the development of a diverse succession pipeline for Executive Directors and other senior leaders;
- Considering Board succession planning, taking each non-executive Director’s tenure into account; and
- Reviewing the Committee’s terms of reference.

SKILLS, SIZE AND COMPOSITION OF THE BOARD

The Committee reviews the Board’s composition, including the length of tenure of non-executive Directors, to ensure that it has the correct balance of skills, experience, knowledge and diversity required for the leadership of the Group, to support the delivery of the Group’s strategy, and to comply with the UK Corporate Governance Code. The Committee considers that the Board members have a range of experience in safety, customer focus, environmental sustainability, global business management and operations, strategy execution, finance, and risk management, from a variety of sectors, including engineering, global technology, manufacturing, construction, energy, and marketing which will be relevant in overseeing the delivery of Morgan’s strategy and execution priorities.
During the year, the Committee reviewed and agreed that the composition of the Board and its Committees, including the non-executive Director/executive Director split, was appropriate for the current period. The current Board and Committee structure remained appropriate, and all non-executive Directors should continue to be members of the main Committees (with the exception that the Chairman of the Board and a member of the Audit Committee). The Committee considers that the members of the Board and Committees have the appropriate mix of skills, experience, diversity, and knowledge of the Company, and that undue reliance was not placed on any particular individual(s).

The Committee will review the balance of skills and experience on the Board when considering future changes to the Board.

DIVERSITY AND INCLUSION

The Board recognizes the benefits that diversity and inclusion bring at all levels of the Company and firmly believes diversity is an important factor in enabling good decision-making at Board level.

Morgan continues to foster greater diversity and inclusion and remains committed to, and ambitious about, making Morgan a more diverse place to work. During 2021, the Board reviewed succession planning and talent strategy for the Executive Committee and its direct reports, with a particular lens on our aim to foster diversity and inclusion within the leadership of the Company.

Morgan’s Board Inclusion and Diversity Policy reflects the Group’s inclusion and diversity aspirations and includes objectives which the Committee monitors progress against these objectives. The Nomination Committee reviews the composition of the Board and considers the balance of competencies to ensure alignment with the Company’s strategic, talent development and supports management in its wider commitment to promoting diversity.

The Committee takes diversity into account in broader discussions on succession planning and talent development and supports management in its wider commitment to promoting diversity. The Company submitted data to both the FTSE Women Leaders Review and the Parker Review during 2021.

The Board has agreed objectives for achieving gender, ethnic and cultural diversity on the Board, and places high emphasis on ensuring the development of diversity both in senior management roles and the workforce in general within the Company.

To promote diversity and inclusion the Board will:
- Consider all aspects of diversity when reviewing the composition and effectiveness of the Board;
- Only engage with executive search firms which are accredited under the Enhanced Code of Conduct for Executive Search Firms, or which have a proven track record in sourcing diverse candidates, when seeking to make new appointments;
- Ensure that candidate lists include individuals from a broad and diverse range of backgrounds and that all candidates with the requisite skills and capability are considered, including those with less traditional track records than the corporate mainstream;
- Agree new Board appointments based on merit against the objective criteria set, taking account of the unique benefits each candidate can bring;
- Review senior executive succession planning annually and monitor the development of a diverse pipeline of future senior leaders, reflecting the composition of Morgan’s workforce;
- Set the tone and provide visible support for the Group’s diversity and inclusion objectives, including the fostering of an inclusive culture which allows individuals to bring their whole selves to work, role modelling and promoting inclusive leadership;
- Reviewing and challenging the goals and progress of executive management in improving inclusion and diversity.

Looking at progress against the objectives set out in this strategy and Diversity Policy during the year, the diversity of the Board’s membership remained unchanged with 49% women and one more non-executive Director of South East Asian origin. Going forward, with the new target for 2022, the Portfolio and Sustainability Policy will inform and steer the Committees in identifying candidates and set the tone for the wider Group’s diversity commitments, in particular in the context of developing its leadership population.

SUCCESSION PLANNING

The Committee has responsibility for the Board’s composition, including the length of tenure of non-executive Directors, to ensure that it fulfills the correct balance of skills, experience, knowledge, and diversity required for the leadership of the Group. It supports the delivery of the Group’s strategy, and to comply with the UK Corporate Governance Code.

The Board receives reports on the development of internal talent and reviews the talent pool for senior leadership opportunities.

The usual process for selection of a non-executive Director is described below. For 2022 and future years, the Committee will re-evaluate and update Morgan’s processes for Board and senior management appointments by reference to the aims and objectives of the Board Inclusion and Diversity Policy, and will report on progress in future annual reports.

- The Committee formulates a candidate specification for the role, taking into account the balance of skills, knowledge, experience, diversity and geographical representation on the Board, and considering the desired skills and experience required to complement the existing membership and to support the implementation of the Group’s strategy;
- The external search agent produces a long-list of candidates for the role, taking the identified requirements into consideration;
- Interviews with members of the Nomination Committee take place with short-listed candidates;
- Interviews with other Board members take place with the final candidate(s);
- The Committee makes a recommendation for the appointment to the Board, taking into account the views of the Board members;
- Any new Director appointed by the Board must be elected by shareholders at the next AGM following the formal re-election process.

Non-executive Directors, including the Chairman, are asked to confirm that they will allocate sufficient time to meet their commitments to the Company and that their other appointments and significant time obligations are disclosed to the Board prior to appointment, with an indication of the level of time commitment involved. The Board is informed of any subsequent changes, and additional commitments must be disclosed before they are accepted.

COMMITTEE PERFORMANCE

The Committee’s performance was reviewed as part of the Board evaluation (see page 73) for 2021, which was externally facilitated in 2021 by Claire Chalmers. It was concluded that the Committee had operated effectively during the period under review.

TIME COMMITMENT

The time commitment of each of the Chairman, Chair of Board Committees and non-executive Directors are set out in their respective letters of appointment. Non-executive Directors are expected to spend at least two days per month, more if they act as Chair of a Board Committee, on Company business; and the Chairman is expected to spend at least 50 days per annum on Company business. During the year, the Committee considered that each Board member fulfilled his or her respective commitment, both in respect of Board and Committee meetings and for employee engagement sessions. Details of meeting attendance by Board members are set out on page 68.

ANNUAL RE-ELECTION OF DIRECTORS

All Directors are subject to annual re-election under the Code. Peter Turner is retiring from the Board in June 2022 and will therefore stand for re-election at Morgan’s 2022 AGM with his impending retirement. His successor Richard Armitage will be re-elected at the AGM following his forthcoming appointment in May 2022.

Clement Woon is serving his first three-year term as Director, and Jane Aikman, Helen Burch, Sally Dynevor and Mark Horsman serve their second three-year term. Dougla Castor is serving his third three-year term on the Board. In line with Provision 14 of the Board’s lexicon, the Directors compare the reasons why each Director’s contribution is, and continues to be, important to the Company’s long-term sustainable success have been set out in this year’s Notice of AGM, to accompany the formal re-election request.

During the year, the Chairman reviewed the performance of each Director and has confirmed their continued effectiveness. A formal review of the Chairman’s performance was conducted as part of Morgan’s Board evaluation process in 2019, concluding with individual meetings between the Chairman and each non-executive Director. The Senior Independent Director also hosted a meeting of the non- executive Directors without the Chairman present in December 2021 to discuss the Chairman’s performance.
Statement to shareholders from the Chair of the Remuneration Committee.

COVID-19 remains a significant issue in many of the countries Morgan Advanced Materials operates in, with impacts still being observed across the global economy. Despite this, Morgan has seen a robust recovery in most of its end-markets, leading to a return to growth, delivering 10.3% organic revenue* growth for the 2021 financial year. We have continued to take appropriate actions to control costs, improve cash flow and increase liquidity, which, along with continued further investment in the wider business to support sustainable long-term growth, has helped Morgan to emerge stronger from the crisis.

Within the context of the UK Corporate Governance Code, and the requirement to put the Remuneration Policy to a binding vote at the 2022 AGM, the Committee conducted a Purlough review in 2021 of the current Remuneration Policy (approved by 97% of shareholders at the 2019 AGM). This review concluded that the current framework continues to support Group strategy and culture, as well as providing strong alignment of executive Director and shareholder interests. It also highlighted the appropriateness of making several amendments to reflect changes in the external landscape and as such, I wrote to our largest shareholders in October 2021 to consult on the changes that are being proposed to the Remuneration Policy for 2022 onwards.

2021 COMMITTEE ACTIVITY

During the year, the Committee met six times. Its activities included determination of current incentive outcomes and 2022 incentive structure and targets, remuneration packages for the executive Directors, and a review of the Group’s Remuneration Policy. Further details regarding the activities of the Committee can be found in the ‘Remuneration governance’ section at the end of this Report on page 104.

2021 REMUNERATION OUTCOMES

In reviewing performance in 2021, the Committee determined that payouts of 97% of the 2021 annual bonus opportunity for the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) were appropriate. The 2019 LTIP award will partially vest, resulting in a 32.2% achievement of the maximum. These outcomes are consistent with the Group’s performance, details of which are summarised later in this Report. The Committee has not felt it appropriate to adjust performance targets during the year and felt that no discretion needed to be applied for 2021 remuneration outcomes as they were considered to appropriately reflect the underlying performance of the Group.

IMPLEMENTATION OF POLICY IN 2022

The Remuneration Committee decided that, taking into account the improved performance of the Group in 2021, labour market conditions, and average range of salary increases in the wider workforce, the appropriate level of salary increase for the CEO would be 2.5%. The current CFO will be retiring from the Company in June 2022 and as such no salary increase has been awarded for 2022. The process for reviewing executive Director salaries takes into account individual and Group performance, demonstration of the defined Leadership Behaviour and salary position relative to the relevant market, which is consistent with the approach taken for the entire professional population. There will also be an increase to the fees for the Chairman and non-executive Directors of 2.5% for 2022, as determined by the Committee (for the Chairman) and the Chairman and executive Directors (for the non-executive Directors).

The Committee also reviewed the structure of the annual bonus and LTIP plans to ensure that the framework remains appropriately aligned with our strategic aims and culture, motivates and rewards management for delivering sustainable performance, and supports retention. No changes are proposed to the performance linkage of the annual bonus for 2022 as measures remain aligned to Morgan’s key objectives, including ESG (environmental, social and governance) measures being covered in the executive Directors’ personal objectives and therefore reflected in the personal performance element of bonus. For the LTIP, it is proposed to add an ESG measure (carbon reduction) to the structure, to align more closely with Morgan’s strategy and priorities. The proposed ESG targets are 5% to 15% carbon reduction over the three-year performance period, reflecting our stated longer-term ambition to reduce carbon emissions by 50% by 2030 (from a 2015 baseline). The proposal is to decrease the EPS targets from 15% - 22% to 6% - 13% over the three-year performance period, the targets having been temporarily increased last year to take into account the reduced base level resulting from the impact of the pandemic on earnings. The Committee considers that to be appropriately challenging in the context of the Group’s strategic plan, external market factors and broader forecasts. No changes are proposed to the TSR benchmarks and relative TSR performance range (median-upper quartile). It is proposed to maintain the ROIC* range for that element of the executive Directors’ 2022 LTIP at 17%-20%, to reflect our latest expectations for performance over the three-year performance period. For the annual bonus, the width of the performance ranges have been reduced to ±7.5% of target, however they remain slightly wider than in pre-pandemic years to reflect the ongoing uncertainty of the pandemic and its potential impact on performance outcomes. Annual bonus targets are considered to be commercially sensitive at this time but will ordinarily be disclosed in next year’s Remuneration Report.

PROPOSED CHANGES TO REMUNERATION POLICY IN 2022

In line with the remuneration reporting regulations, the Directors’ Remuneration Policy must be submitted for shareholder approval at least every three years. The Policy was last approved by shareholders at the 2019 AGM, and therefore is required to be put to a new binding vote at the 2022 AGM.

During 2021, the Committee reviewed the Remuneration Policy for executive Directors in the context of our remuneration philosophy, the UK Corporate Governance Code, and recent developments in remuneration governance. The Committee concluded from its review that the 2019 Policy Framework continues to reinforce our strategy and culture and provides strong alignment of executive Director and shareholder interests. However, the Committee recognised that the remuneration governance landscape, and the views of some shareholders on the subject of executive remuneration, continue to evolve at pace. Accordingly, I wrote to our largest shareholders in October 2021 to consult on the changes that are being proposed to the Remuneration Policy for 2022 onwards, which are:

→ Aligning pension contributions for current executive Directors with those for the UK workforce from 31 December 2022 onwards;
→ Reducing the upper LTIP grant limit to 200% of salary, and increasing the CEO’s annual award value to this level (to deliver a total package that is in line with relevant benchmarks); and
→ Adding an ESG measure to the LTIP structure in alignment with Morgan’s strategic priorities.

Further details on the proposed 2022 Policy are set out in the ‘Policy report’ section beginning on page 88 of this Remuneration Report.

This Report is consistent with the current reporting regulations for executive remuneration and, as in prior years, includes a ‘Remuneration at a glance’ section summarising the key elements of executive Director remuneration. I hope we have been successful in continuing to achieve the clarity and transparency that will be of help to our shareholders.

Performance measures weighting

- Operating profit
- Strategic personal objectives

Policy

- Executive Directors’ salaries are generally reviewed each January, with reference to individual and Group performance, experience and salary levels at companies of similar sector size and complexity.

Implementation

- The monetary value of the pension allowance for the current executive Directors was fixed at the 2018 value from 2019 onwards, to help align executive Director pensions with those of the wider workforce over time. From 31 December 2022 executive Director pension allowances will be fully aligned to pension contribution levels available to the UK workforce (2% based on UK population). Richard Armitage’s pension allowance will be aligned to that available to the workforce on appointment.

LTIP

<table>

</tr>
</tbody>
</table>

Performance measures weighting

- TSR vs. FTSE All-Share
- EPS growth
- ESG (carbon reduction)

Policy

- Maximum award opportunity: 150% of base salary
- Performance measures are set by the Committee at the start of the year and are weighted to reflect a balance of financial and strategic objectives. 67% of any annual bonus paid is delivered in cash with the remainder deferred into shares and released after a further period of three years. 50% of the bonus opportunity is paid for on-target performance.

Implementation

- The award levels and performance conditions on which vesting depend are reviewed prior to the start of each award cycle to ensure they remain appropriate. Proposed Policy changes to be approved at the 2022 AGM introduce an ESG measure in addition to the current measures of TSR, EPS and ROIC. Vested shares are subject to a post-vesting holding period of two years. The vesting of awards is usually subject to continued employment and to the Group’s performance over a three-year performance period: 25% of an award vests for achievement of the threshold level of performance.

Shareholding requirements

- Pete Raby (CE0) 200% of salary (current shareholding 261.7%)
- Peter Turner (outgoing CEO) 200% of salary (current shareholding 328.0%)
- Richard Armitage (incoming CFO) 200% of salary (current shareholding 328.0%)

1. Pete Turner will be leaving in June 2022 and Richard Armitage will join as CFO on 30 May 2022. All figures above are annualised and will be pro-rated according to service in the year.
2. Peter Turner will not receive a 2022 LTIP Award as he will be retiring from the Company in June 2022.
3. Excludes health insurance – value of premium to be calculated on joining and will be disclosed in 2022 Annual Report.

The Committee will also consider changes to the shareholding requirements for new executive Directors with that available to the UK workforce. Proposed Policy change to be approved at the 2022 AGM introduces an ESG measure in addition to the current measures of TSR, EPS and ROIC. Vested shares are subject to a post-vesting holding period of two years. The vesting of awards is usually subject to continued employment and to the Group’s performance over a three-year performance period: 25% of an award vests for achievement of the threshold level of performance.
This Report covers the period 1 January 2021 to 31 December 2021 and provides details of the Remuneration Committee and how the Remuneration Policy, approved by shareholders at the 2019 AGM, has been implemented for the year under review. The Policy Report sets out the Policy that is proposed to apply for up to the next three years from 3 May 2022, subject to shareholder approval. The proposed implementation of this Policy for the 2022 financial year is summarised in the section of the Annual Report on Remuneration titled ‘Implementation of Remuneration Policy for 2022’.

I. POLICY REPORT

KEY PRINCIPLES OF THE REMUNERATION POLICY

The Remuneration Committee aims to ensure that all executive remuneration packages offered by Morgan Advanced Materials are competitive and designed to promote the long-term success of the Company by ensuring that Morgan is able to attract, retain and motivate executive Directors and senior executives of the right calibre to create value for shareholders.

The Committee ensures that a significant proportion of the total remuneration opportunity is performance-related, with an appropriate balance between short-term and long-term performance, and is based on the achievement of measurable targets that are relevant to, and support, the business strategy through the execution of the Policy.

The Remuneration Committee will keep the Remuneration Policy under periodic review to ensure it remains aligned with the Group’s strategy, reinforces the Group’s culture, and is in line with the principles set out in the UK Corporate Governance Code in relation to directors’ remuneration. This includes ensuring that performance-related elements are transparent, stretching and rigorously applied, as well as reflecting the views and guidance of institutional investors and their representative bodies.

SUMMARY OF MORGAN ADVANCED MATERIALS PLC’S PROPOSED 2022 REMUNERATION POLICY

This section of the Report sets out the proposed Remuneration Policy for executive Directors and non-executive Directors. This Policy will be submitted for approval by shareholders at the Company’s AGM on 5 May 2022. If approved, it is intended that this Policy be effective for a period of up to three years from that date.

The Committee has developed the 2022 Policy to be consistent with the six factors outlined in Provision 40 of the Code, as set out below:

- **Clarity:** Our Policy is clear, and disclosures on our decision-making (in relation to policy and its implementation) are transparent. The Committee also engages regularly with shareholders and employees to facilitate a greater understanding on a range of subjects, including remuneration.
- **Simplicity:** The Policy and the Committee’s approach to implementation is simple and well understood. The performance measures used in the incentive plans are well aligned to the Group’s strategy.
- **Risk:** The Committee has ensured that remuneration arrangements do not encourage and reward excessive risk taking by setting targets to be stretching and achievable, with discretion to adjust formulaic bonus and LTIP outcomes.
- **Predictability:** The range of outcomes under our Policy are quantifiable, clearly linked to defined performance outcomes, and capped.
- **Proportionality:** The link of the performance measures to strategy and the setting of targets ensures outcomes are proportionate to performance, and importantly do not reward poor performance.
- **Culture:** The Policy is consistent with the Group’s culture, driving behaviours that promote the long-term and sustainable success of the Group for the benefit of all stakeholders.

Proposed Remuneration Policy for executive Directors

The key changes to the proposed Remuneration Policy for executive Directors that will be submitted for approval at the 2022 AGM are:

- Align pension contributions for current executive Directors with those for the wider workforce from 31 December 2022 onwards.
- Reduce the upper LTIP grant limit to 200% of salary and increase the CEO’s annual grant value to this level (to deliver a total package that is in line with relevant benchmarks), and
- Add an ESG measure to the LTIP structure in alignment with Morgan’s strategic priorities.

</tbody>
</table>
Annual bonus

Provides a direct link between annual performance and reward.

Incentivises the achievement of key specific goals over the short term that are also aligned to the long-term business strategy.

Deferred bonus supports retention and provides additional alignment with the interests of shareholders.

Malus and Clawback Policy

Malus and clawback relate to the annual bonus and LTIP (as set out on page 88) in cases of error in determining performance, corporate failure, misconduct or misstatement in the published results of the Group or where, as a result of an inappropriate level of accountability, a participant has been deemed to have caused in full or in part a material loss to the Group as a result of gross negligence or willful acts or erroneous judgments, fraud, or other acts which may cause serious reputational damage. Cash bonuses will be subject to malus and clawback with deferred shares subject to malus over the deferral period. LTIP awards are subject to malus and clawback over the vesting period to the 5th anniversary of grant.

Payments under existing awards

The Company will honour any commitment entered into, and Directors will be eligible to receive payment from any award granted, prior to the approval and implementation of the Remuneration Policy detailed in this Report (i.e. before 5 May 2022), even if these commitments and/or awards fall outside the above Policy. The Company will also honour any commitment entered into at a time prior to an individual becoming a Director if, in the opinion of the Committee, it was not in the interests of the individual becoming a Director of the Company. Details of these awards will be disclosed in the Annual Report on Remuneration.

Dissolution and vesting

Under the policy, the LTIP provides for a conditional award of shares up to an annual limit of 200% of salary. 25% of an award vests for achievement of the threshold level of performance.

The vesting of awards is usually subject to continued employment and the Company’s performance over a three-year performance period. Subject to shareholder approval, this will be based on a combination of TSR, EPS, ROIC and ESG measures.

The Committee has discretion to extend the performance period and adjust the measures, their weighting, and performance targets prior to the start of each cycle, to ensure they remain aligned with the Group’s strategy.

The Committee also retains discretion to adjust the vesting outcome if it considers that the level of vesting is inconsistent with the Company’s underlying performance when taking into account any factors it considers relevant.

Details of further awards are set out in the Annual Report on Remuneration on pages 99 to 105.

Malus and Clawback Policy

Malus and clawback relate to the annual bonus and LTIP (as set out on page 88) in cases of error in determining performance, corporate failure, misconduct or misstatement in the published results of the Group or where, as a result of an inappropriate level of accountability, a participant has been deemed to have caused in full or in part a material loss to the Group as a result of gross negligence or willful acts or erroneous judgments, fraud, or other acts which may cause serious reputational damage. Cash bonuses will be subject to malus and clawback with deferred shares subject to malus over the deferral period. LTIP awards are subject to malus and clawback over the vesting period to the 5th anniversary of grant.

Payments under existing awards

The Company will honour any commitment entered into, and Directors will be eligible to receive payment from any award granted, prior to the approval and implementation of the Remuneration Policy detailed in this Report (i.e. before 5 May 2022), even if these commitments and/or awards fall outside the above Policy. The Company will also honour any commitment entered into at a time prior to an individual becoming a Director if, in the opinion of the Committee, it was not in the interests of the individual becoming a Director of the Company. Details of these awards will be disclosed in the Annual Report on Remuneration.

Dissolution and vesting

Under the policy, the LTIP provides for a conditional award of shares up to an annual limit of 200% of salary. 25% of an award vests for achievement of the threshold level of performance.

The vesting of awards is usually subject to continued employment and the Company’s performance over a three-year performance period. Subject to shareholder approval, this will be based on a combination of TSR, EPS, ROIC and ESG measures.

The Committee has discretion to extend the performance period and adjust the measures, their weighting, and performance targets prior to the start of each cycle, to ensure they remain aligned with the Group’s strategy.

The Committee also retains discretion to adjust the vesting outcome if it considers that the level of vesting is inconsistent with the Company’s underlying performance when taking into account any factors it considers relevant.

Details of further awards are set out in the Annual Report on Remuneration on pages 99 to 105.

Malus and Clawback Policy

Malus and clawback relate to the annual bonus and LTIP (as set out on page 88) in cases of error in determining performance, corporate failure, misconduct or misstatement in the published results of the Group or where, as a result of an inappropriate level of accountability, a participant has been deemed to have caused in full or in part a material loss to the Group as a result of gross negligence or willful acts or erroneous judgments, fraud, or other acts which may cause serious reputational damage. Cash bonuses will be subject to malus and clawback with deferred shares subject to malus over the deferral period. LTIP awards are subject to malus and clawback over the vesting period to the 5th anniversary of grant.

Payments under existing awards

The Company will honour any commitment entered into, and Directors will be eligible to receive payment from any award granted, prior to the approval and implementation of the Remuneration Policy detailed in this Report (i.e. before 5 May 2022), even if these commitments and/or awards fall outside the above Policy. The Company will also honour any commitment entered into at a time prior to an individual becoming a Director if, in the opinion of the Committee, it was not in the interests of the individual becoming a Director of the Company. Details of these awards will be disclosed in the Annual Report on Remuneration.

Dissolution and vesting

Under the policy, the LTIP provides for a conditional award of shares up to an annual limit of 200% of salary. 25% of an award vests for achievement of the threshold level of performance.

The vesting of awards is usually subject to continued employment and the Company’s performance over a three-year performance period. Subject to shareholder approval, this will be based on a combination of TSR, EPS, ROIC and ESG measures.

The Committee has discretion to extend the performance period and adjust the measures, their weighting, and performance targets prior to the start of each cycle, to ensure they remain aligned with the Group’s strategy.

The Committee also retains discretion to adjust the vesting outcome if it considers that the level of vesting is inconsistent with the Company’s underlying performance when taking into account any factors it considers relevant.

Details of further awards are set out in the Annual Report on Remuneration on pages 99 to 105.

Malus and Clawback Policy

Malus and clawback relate to the annual bonus and LTIP (as set out on page 88) in cases of error in determining performance, corporate failure, misconduct or misstatement in the published results of the Group or where, as a result of an inappropriate level of accountability, a participant has been deemed to have caused in full or in part a material loss to the Group as a result of gross negligence or willful acts or erroneous judgments, fraud, or other acts which may cause serious reputational damage. Cash bonuses will be subject to malus and clawback with deferred shares subject to malus over the deferral period. LTIP awards are subject to malus and clawback over the vesting period to the 5th anniversary of grant.

Payments under existing awards

The Company will honour any commitment entered into, and Directors will be eligible to receive payment from any award granted, prior to the approval and implementation of the Remuneration Policy detailed in this Report (i.e. before 5 May 2022), even if these commitments and/or awards fall outside the above Policy. The Company will also honour any commitment entered into at a time prior to an individual becoming a Director if, in the opinion of the Committee, it was not in the interests of the individual becoming a Director of the Company. Details of these awards will be disclosed in the Annual Report on Remuneration.

Dissolution and vesting

Under the policy, the LTIP provides for a conditional award of shares up to an annual limit of 200% of salary. 25% of an award vests for achievement of the threshold level of performance.

The vesting of awards is usually subject to continued employment and the Company’s performance over a three-year performance period. Subject to shareholder approval, this will be based on a combination of TSR, EPS, ROIC and ESG measures.

The Committee has discretion to extend the performance period and adjust the measures, their weighting, and performance targets prior to the start of each cycle, to ensure they remain aligned with the Group’s strategy.

The Committee also retains discretion to adjust the vesting outcome if it considers that the level of vesting is inconsistent with the Company’s underlying performance when taking into account any factors it considers relevant.

Details of further awards are set out in the Annual Report on Remuneration on pages 99 to 105.
Pay-for-performance: scenario analysis

The graphs below provide detailed illustrations of the potential future reward opportunity for executive Directors, and the potential mix between the different elements of remuneration under four different performance scenarios: ‘Below threshold’, ‘Target’, ‘Stretch’ and ‘Stretch with 50% share price appreciation’. These have been updated to illustrate the potential opportunity under the 2022 packages proposed for executive Directors.

Peter Raby (CEO)

Overview

Pay-for-performance: scenario analysis

The potential reward opportunities illustrated above are based on the Policy, which will be submitted for approval at the 2022 AGM, applied to the annual base salary in effect at 1 January 2022. Annualised figures are shown for the incoming and outgoing CFOs, these will be pro-rated based on time served. For the annual bonus, the amounts illustrated are those potentially receivable in respect of performance for 2022 (before mandatory deferral into shares).

The LTIP is based on the face value of awards to be granted in 2022 (200% of salary for the CEO and 150% for the incoming CFO; Peter Turner will not receive a 2022 LTIP award as he will be retiring from the Company in June 2022). It should be noted that any awards granted under the LTIP in a year do not normally vest until the third anniversary of the date of grant. This illustration is intended to provide further information to shareholders on the relationship between executive pay and performance. The value of the LTIP assumes no change in the underlying value of the shares once an award is made, apart from in the ‘Stretch with 50% share price appreciation’ scenario. The following assumptions have been made in compiling the above charts:

- Relationships between executive pay and performance.
- The value of the LTIP assumes no change in the underlying value of the shares once an award is made, apart from in the ‘Stretch with 50% share price appreciation’ scenario.

The graphs below provide detailed illustrations of the potential future reward opportunity for executive Directors, and the potential mix between the different elements of remuneration under four different performance scenarios: ‘Below threshold’, ‘Target’, ‘Stretch’ and ‘Stretch with 50% share price appreciation’. Financial statements

**Internal promotion to the Board**

In cases of appointing a new executive Director via internal promotion, the Policy will be consistent with that for external appointments detailed above. Where an individual has contractual commitments made prior to their promotion to executive Director, the Company will continue to honour these arrangements even if there are no instances where they would not otherwise be consistent with the prevailing executive Director Remuneration Policy at the time of promotion.

1. Douglas Caster received a subsequent letter of appointment on 18 December 2018.

**CONSIDERATION OF STAKEHOLDER VIEWS**

The Executive Management team seeks to promote and maintain good relations with employee representative bodies—including trade unions and works councils—as part of its broader employee engagement strategy and consults on matters affecting employees and business performance as required in each case by law and regulation in the jurisdictions in which the Group operates. When making decisions on executive remuneration, the Committee considers the pay and employment conditions across the Group and is considering additional means of engaging with the workforce on remuneration matters. Engagement with employees on remuneration is currently achieved through non-executive Director employee engagement sessions where employees have the opportunity to raise issues, with pay and benefits having been discussed during the 2021 sessions. Specific remuneration-related questions are also included in the all employee engagement survey, “Your Voice”, with the intent of engaging with employees on pay and benefits and providing them with the opportunity to share feedback. In the UK, engagement is facilitated by the Sharesave programme, which enables UK employees to become shareholders and provides them with voting rights in relation to resolutions for approval at the AGM which include executive remuneration matters. Prior to the annual salary review, the Committee is provided with pay increase data that individual business units consider when deciding local pay awards for their specific businesses and countries. The Committee is also kept fully informed of remuneration policy and implementation decisions affecting the wider workforce. This important context forms part of the Committee’s considerations for determining executive Director remuneration. See also the People section on pages 28 to 31.

The Committee considers shareholder views received during the year and at the AGM each year, as well as guidance from investor representative bodies more broadly, in shaping its Remuneration Policy. The Committee keeps the Remuneration Policy under regular review, to ensure it continues to reinforce the Group’s long-term strategy and aligns executive Director’s interests with those of shareholders. It is the Committee’s policy to consult with major shareholders prior to any major changes to its executive Remuneration Policy.

**2. ANNUAL REPORT ON REMUNERATION**

The following section provides details of how the Remuneration Policy was implemented during the year.

**SINGLE TOTAL FIGURE OF REMUNERATION FOR EXECUTIVE DIRECTORS**

The auditor is required to report on the information in this table.

The table below sets out a single figure for the total remuneration received by each executive Director for the year ended 31 December 2021 and the prior year. For 2020, the table reflects the position with and without the 30% salary reduction volunteered by the executive Directors from 1 April to 31 December 2020, in response to the pandemic.

<table>
<thead>
<tr>
<th>Name</th>
<th>2021 (actual with reduction)</th>
<th>2020 (actual with reduction)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pete Raby</td>
<td>£1,039,768</td>
<td>£1,359,924</td>
</tr>
<tr>
<td>Peter Turner</td>
<td>£1,039,768</td>
<td>£1,359,924</td>
</tr>
</tbody>
</table>

The figures have been calculated as follows:

1. Basic salary (or amount earned for the year). Figures for 2020 (actual with reduction) column reflects actual salary earned.
2. Pension: the figure is a cash allowance in lieu of pension.
3. Benefits: the taxable value of benefits received in the year. Includes private medical insurance and a company car (or car allowance). 2020 private medical insurance has been trued up from the number included last year’s annual report, based on October policy renewal.
4. Bonus: the total bonus earned on performance during the year (before any mandatory deferral into shares).
5. LTIP: the estimated value on 31 December 2021 of 2019 LTIP shares vesting in 2022, subject to performance over the three-year period ended 31 December 2021. The figure for 2020 has been based up from that disclosed in last year’s Remuneration Report to reflect this share price on the vesting date (22 March 2021) of 31.2.1. The impact of share price movement on the vesting value (as the CEO and CFO’s 2019 LTIP award in both years.

**Value of awards vesting using share price at award (31.2.1)**

^a For the cash generation and profit metrics there was a straight line payout between the threshold and maximum figures. All figures were calculated using 2021 budgeted exchange rates.

Peter Raby's personal objectives for 2021 were: (1) Continue to develop and embed the safety culture of the business (actively engaging our employees) and reinforce the importance of the environmental responsibility of the business, (2) Develop an ESG strategy and programme, with accompanying goals, that drives improvements across the key ESG dimensions: Environment, Social, health and safety, diversity and inclusion, values and culture, and Governance, and deliver improvements on key goals by the end of the year, (3) Understand our baseline and develop and start the execution of plans to create a diverse and inclusive workforce where people are excited, engaged, and can do their best work to high ethical standards, (4) Develop the 2030 ambition for the Group and develop the Group-wide execution priorities to deliver on it, (5) Develop plans to enhance the customer focus of the Group, improving the customer experience and increasing innovation to meet customers’ needs, (6) Refresh our investor proposition and communications (including the ESG strategy) and deliver to investors through the year and through a specific capital markets event.

Performance of our leaders is assessed against all expectations of the role, specific personal objectives that are set and how outcomes are delivered with the overall objective of making the business more customer centric.

Peter Turner’s personal objectives for 2021 were: (1) Continue to develop and embed the safety culture of the business (actively engaging our employees) and reinforce the importance of the environmental responsibility of the business, (2) Understand our baseline and develop and start the execution of plans to create a diverse and inclusive workforce where people are excited, engaged, and can do their best work to high ethical standards, (3) Develop the 2030 ambition for the Group and develop the Group-wide execution priorities for the first three years (2021-23) to deliver on it, (5) Improve the operational efficiency of the Group through further structural cost reductions and enhancement of CI activity. Considering Peter’s performance against these objectives, for example he has driven operational efficiency programmes, delivering savings and improving robustness as a Group, as well as the Leadership Behaviours he has exhibited, the personal performance element of his bonus has been assessed at 85% of the maximum.

Performance against the objectives above is referred to in the Chairman’s statement and elsewhere within the Annual Report.

2018 Deferred Bonus Plan vesting

In 2018, 11% of the annual bonus results for Pete Raby and Peter Turner (for performance in the 2017 financial year) were deferred into shares under the Deferred Bonus Plan (DBP), in line with Morgan’s Remuneration Policy. Dividends accrued over the deferral period on the deferred shares that vested, and the dividends were paid in shares at the end of the vesting period. Details of the DBP vesting for the executive Directors are set out in the table below:

<table>
<thead>
<tr>
<th>Director</th>

</tbody>
</table>

2019 LTIP award vesting

Awards granted to executive Directors in 2019 were subject to relative TSR performance, EPS growth and Group ROIC® over a three-year period ending 31 December 2021. The EPS target (applying to one-third of each award) required three-year EPS growth of 4% for 25% of that element to vest, rising to full vesting for EPS growth of 11% or higher. Given the per share Morgan Advanced Materials plc’s actual EPS growth was 0.81% and accordingly the EPS element of the award would not vest.

The TSR element (applying to one-third of each award) required Morgan Advanced Materials plc’s three-year TSR performance to rank at median against two comparator groups (equally split) – the FTSE All-Share Industrials Index and a tailored comparator group comprising 15 listed international carbon, ceramics and other materials companies – for 25% of that element to vest, rising to full vesting for Morgan Advanced Materials plc’s TSR ranked at or above the upper quartile against these two comparators.

Morgan Advanced Materials plc’s TSR was 37.1%, which was at the 55th percentile versus the FTSE All-Share Industrials Index and the 87th percentile versus the tailored comparator group. Accordingly, this results in a 22.98% vesting for the TSR element of the award.

The Group ROIC® target (applying to the remaining one-third of each award) required three-year Group ROIC® of 17% for 25% of that element to vest, rising to full vesting for Group ROIC® of 20% or higher. Morgan Advanced Materials plc’s Group ROIC® was 15.9%, and accordingly the results fell in a 29.19% vesting for the ROIC® element of the award.

This combined performance resulted in a partial vesting of the 2019 awards based on 52.17% achievement of maximum. The vesting outcome is considered by the Committee to appropriately reflect the impact of the COVID-19 pandemic on business results.

Details of the awards to executive Directors are set out in the table below:

<table>

1. GSOP refers to the Company Share Option Plan – further information is included in the ‘Details of plans’ section later in this report.

For the purposes of the 2019 LTIP award (and consistent with the approach taken in previous years), the financial results were adjusted to neutralise the effects of closed businesses in 2020 and acquisitions in 2021.

PENSION

The auditor is required to report on this information.

Peter Raby and Peter Turner each received a cash allowance in lieu of pension, fixed at the 2018 values of £104,000 and £80,120 respectively.

NON-EXECUTIVE DIRECTOR FEES

The auditor is required to report on the information in this table.

The table below sets out the fees received by each non-executive Director in respect of the year ended 31 December 2021 and the prior year. The 2020 figures reflect the 30% fee reduction volunteered (in response to the pandemic) from 1 April to 31 December, mentioned earlier in this document, with the effects of closed businesses in 2020 and acquisitions in 2021.

The auditor is required to report on this information.

Non-executive Directors do not receive any other fixed or variable pay, or benefits, in addition to their fees. Figures shown are inclusive of £8,000 Senior pre-reduction fee levels shown in brackets.

The table below sets out the fees received by each non-executive Director in respect of the year ended 31 December 2021 and the prior year. The 2020 figures reflect the 30% fee reduction volunteered (in response to the pandemic) from 1 April to 31 December, mentioned earlier in this document, with the effects of closed businesses in 2020 and acquisitions in 2021.

The auditor is required to report on this information.
### Implementation of Remuneration Policy for 2022

#### Base salary

In line with the Remuneration Policy, executive Directors' salaries were reviewed by the Committee and the CEO's salary was increased for 2022 consistent with the average range of increases awarded to the wider workforce. The table below shows the base salaries in 2021, and those that took effect from 1 January 2022, or on appointment for the incoming CFO Richard Armitage:

- **Peter Ruby**
  - 2021: £536,000
  - 2022 (from 1 January 2022): £581,175
  - Increase: 8.5%

- **Peter Turner**
  - 2021: £426,160
  - 2022 (from 1 January 2022): £426,160
  - Increase: 0%

- **Richard Armitage**
  - 2021: £415,000
  - 2022 (from 1 January 2022): n/a
  - Increase: n/a

For the 2021 performance year, the Group maintained the formal link between performance and pay within the senior leadership population. Specifically, the process considers individual and Group performance, as well as salary relative to the relevant market.

The increase awarded to Peter Ruby was calibrated in line with this. The Committee considered Peter Ruby's continued strong performance in his role as well as the market positioning of his salary, in determining to increase his salary in line with the average range of increases for UK-based employees. Peter Turner's salary has not been increased for 2022 as he will retire in June 2022. The rationale for any future increases will be disclosed in the relevant Annual Report on Remuneration.

#### Pension

While Peter Ruby and Peter Turner will continue to receive a cash allowance in lieu of pension in 2022, the monetary value remains fixed at the 2018 level disclosed in the table on page 93. From 31 December 2022 all executive Director pension allowances will be fully aligned to pension contribution levels available to the wider workforce (8% based on UK population). The incoming CFO, Richard Armitage, will receive an 8% pension contribution on appointment.

**Annual bonus in respect of 2022 performance**

The maximum bonus opportunity remains at 150% of salary (with the payout for on-target performance continuing to be 50% of the maximum).

33% of any bonus result will ordinarily be deferred into shares for a further three-year period. The performance measures attached to the annual bonus remain unchanged from 2021, as follows:

- **Headline operating profit** – 40%
- **Cash generation** – 40% (measured against quarterly cumulative targets as well as over the complete financial year. For every quarter target that is missed, the payout warranted for full-year performance under this element will be reduced by 10%)
- **Strategic personal objectives** – 20%

The actual performance targets set at the beginning of the performance period are not disclosed as they are considered commercially sensitive at this time, given the close link between performance measures and the Group’s longer-term strategy. This is particularly relevant in the context of some of the Group’s close and unrelated competitors who are not required to disclose such information, and for whom the assumptions in our targets would provide valuable information in the current trading year. These targets will be disclosed retrospectively, at such time as they have become less commercially sensitive, and within three years of the end of the performance year.

### 2022 LTIP awards

In May 2022, Peter Ruby will be granted an award under the 2022 LTIP with a face value of 209% of his base salary for 2022. The incoming CFO, Richard Armitage, will also be granted a 2022 LTIP award of 150% of base salary once appointed. Voting outcomes will continue to be assessed to ensure they reflect business performance and will be adjusted as appropriate. The three-year performance period over which performance will be measured began on 1 January 2022 and will end on 31 December 2024. Further details of the awards will be disclosed in next year’s Remuneration Report.

The performance measures are detailed below:

- Each TSR element will operate independently, with vesting determined based on Morgan’s TSR rank relative to constituents of each TSR benchmark.
- The performance range for each element will remain median to upper-quartile.
- The EPS performance range will be decreased to 6% – 13%, last year’s range having been temporarily increased to take into account the previously reduced base level resulting from the impact of the pandemic on financials. The ROIC** range will remain unchanged at 17%–20%. The Committee believes these ranges appropriately support the Group’s strategy for sustainable long-term growth over the next three years whilst continuing to represent suitably demanding targets.
- The new ESG measure (carbon reduction) will have a performance range of 5% to 15% carbon reduction (scope 1 and 2 emissions) over the three-year performance period, to support the Group’s overall sustainability goals and its stated 2030 target to reduce scope 1 and 2 CO2 emissions by 50%.
- For all four measures, awards will continue to vest on a straight-line basis between threshold and maximum, with 15% of each element vesting at threshold.
- For the 2022 LTIP cycle, executive Directors will be required to hold any vested 2022 LTIP awards for an additional two-year period. Vested awards that are subject to the holding period will remain subject to clawback in line with our Policy but will not be forfeitable on cessation of employment.
## Chairman and non-executive Directors

The Chairman’s and non-executive Directors’ fees were reviewed in December 2021. The table below shows the fees in 2021, and those that will apply in 2022:

<table>

<td>74:1</td>
<td>42:1</td>
<td>41:1</td>
</tr>
</tbody>
</table>

1. Figures in brackets reflect percentage increase from original 2020 salary prior to reductions implemented in response to the pandemic.
2. Percentages reflect the temporary Board salary and fee reductions implemented in response to the pandemic. All figures are based on full-time equivalent comparisons.
3. Benefits fee and bonuses include private medical insurance and company share option schemes. The personal performance element of bonus reflects the reduction in private medical premium resulting from the Company’s transition to a new provider.
4. Non-executive Directors do not receive any additional benefits or bonus payments.
5. Decrease reflects change in type of medical cover required by individual employees.
6. Executive Director bonus reflects 2021 bonus paid in 2022. Employee average bonus based on an estimate of 2021 bonus paid in 2022 (that bonus award data was not available at the time of publication). The personal performance element of 2022 bonus was calculated after the year-end bonus (a result of the pandemic), contributing to the higher percentage increase in 2021 bonus for executive Directors compared to other employees.

Of the three reporting options available to companies, Morgan has applied Option B, where the most recent gender pay gap reporting data has been used to identify the 25th, 50th and 75th percentile employees. The 25th, 50th and 75th percentile pay ratios are based on the remuneration of a representative employee who falls on each of these pay percentiles. Option B has been used to calculate the CEO pay ratios, as Option A requires the ability to calculate a single total remuneration figure for each UK employee, and Morgan does not currently have the systems in place to support this methodology. The ‘fixed equivalent’ employees identified using the gender pay gap information are representative of the 25th, 50th and 75th percentiles of Company remuneration, since base pay constitutes a large proportion of the remuneration package for the majority of employees, so it is likely that a similar set of employees would have been identified using Option A. The calculation covers base pay, annual bonus, pension and where applicable share awards and benefits including car allowance and private medical insurance. Total remuneration figures used in the calculation for 25th, 50th and 75th percentile employees include annual bonus relating to 2021 performance, in order to be consistent with the methodology used for the CEO’s total remuneration figure.

As disclosed in the 2020 remuneration report, 2020 CEO pay ratios were significantly lower than those in 2019 as a consequence of the CEO’s temporary salary reduction, cancellation of the CEO’s personal performance bonus element in response to the COVID-19 pandemic, and also due to the pandemic’s impact on business results (and therefore on levels of variable pay). As a result of the CEO’s salary and personal performance element of bonus being reimputed for 2021, and based on significantly improved business (and therefore variable pay) results, (with the CEO having a higher proportion of variable pay compared to the wider workforce) the 2021 CEO pay ratios are higher than in 2020.

Notwithstanding the year-on-year change in pay ratio, pay and benefits for the CEO and wider employee population are based on the same philosophies, for example driving pay for performance and alignment to external benchmarks, in order to promote consistency, fairness and equity across all levels in the organization. As the same methodology underpins the remuneration used in the above calculations, the resulting median pay ratio is consistent with the Company’s wider policies on employee pay, reward and progression. Pay ratios are significantly reduced when variable pay elements are excluded, and so the gap between CEO and employee pay is largely attributable to non-fixed pay elements, some of which (e.g. share awards) the majority of the wider workforce would not typically be eligible for in the external market. The diversity of different levels and types of roles found in a manufacturing environment such as at Morgan may result in a higher CEO pay ratio than companies which have predominantly professional and/or more senior staff. It is therefore important to compare Morgan’s data to companies in similar industries.

### Termination arrangements for outgoing CFO

As announced in 2021, Peter Turner will leave the Board in June 2022. As Peter Turner is retiring, he will not receive any severance payment when he leaves the Company, however he will be treated as a ‘good leaver’ for variable pay purposes. Salary, bonus and outstanding incentive awards will be treated in accordance with the shareholder-approved Remuneration Policy.

Full disclosure of all payments made upon cessation will be included in the 2022 Annual Report on Remuneration.

### Remuneration arrangements for incoming CFO

Richard Armitage will join Morgan Advanced Materials as Chief Financial Officer on 30 May 2022 and will be an executive Director. A summary of his remuneration is set out below:

<table>
<thead>
<tr>
<th>Remuneration element</th>
<th>Summary of treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual bonus</td>
<td>2021 bonus – 67% paid in cash and the balance deferred into shares and released after a further period of three years, subject to Group and personal performance. 2022 bonus – paid wholly in cash at normal payment date, pro-rated for time, and subject to Group and personal performance.</td>
</tr>
<tr>
<td>LTIP Awards</td>
<td>Awards will be pro-rated for time and will vest based on performance over the original performance period, vesting on the normal vesting date. NRS LTIP award will be granted in 2022.</td>
</tr>
</tbody>
</table>

### Remuneration arrangements for outgoing CFO

</tr>
</tbody>
</table>

CEO pay ratios are calculated excluding variable pay elements such as bonus and share awards.
Relative importance of spend on pay

The graphs below show shareholder distributions (i.e. dividends and share buybacks) and total employee pay expenditure for the financial years ended 31 December 2020 and 31 December 2021.

Following the reduction in shareholder distributions in 2020 in response to the COVID-19 pandemic, the Company resumed dividend payments during 2021, at lower levels than those paid historically, pre-pandemic. Total employee pay across the Group has decreased by 0.3% to £333.6 million (2020: £334.6 million), continuing to be impacted by measures taken as a result of the pandemic.

Comparison of Company performance

The graph below shows the value, at 31 December 2021, of £100 invested in Morgan Advanced Materials plc’s shares on 31 December 2011 compared with the current value of the same amount invested in the FTSE 350 Index. The FTSE 350 Index – of which the Company is a constituent – has been chosen because it is widely followed by the UK’s investment community and easily tracked over time.

The table below details the CEO’s ‘single figure’ of remuneration over the 10-year period to 31 December 2021.

<table>

<td>LTIP – CSOP</td>
<td>LTIP 2019: The award to the CFO was structured as LTIP awards in the form of a conditional award of free shares. The CFO’s award was structured as an Approved Performance Share Plan (APSP) and comprised three elements: (i) HMRC-approved options (CSOP) over shares to the value of up to £30,000 with an exercise price of 268.12 pence per share; (ii) an LTIP award in the form of a conditional award of free shares to the value of the remainder of the award above this limit; and (iii) a funding award, also in the form of a conditional award of free shares, over such numbers of shares whose value at exercise of the approved option equates to £30,000. The award is also subject to malus and clawback provisions. The provisions of these CSOP options, funding awards and LTIP awards were linked, so that the maximum aggregate number of shares that could be acquired on exercise of LTIP and CSOP awards (the funding award being used to pay the exercise price arising on exercise of the CSOP) was limited to that number of shares that had a market value on the date of the awards equal to 150% of Pete Raby’s 2019 annual salary. Vested funding awards were not transferable to the participant. LTIP 2020: The award to the CEO was structured as LTIP awards in the form of a conditional award of free shares. The CFO’s award was structured as an Approved Performance Share Plan (APSP) and comprised three elements: (i) HMRC-approved options (CSOP) over shares to the value of up to £30,000 with an exercise price of 234.70 pence per share; (ii) an LTIP award in the form of a conditional award of free shares to the value of the remainder of the award above this limit; and (iii) a funding award, also in the form of a conditional award of free shares, over such numbers of shares whose value at exercise of the approved option equates to £30,000. The award is also subject to malus and clawback provisions. The provisions of these CSOP options, funding awards and LTIP awards were linked, so that the maximum aggregate number of shares that could be acquired on exercise of LTIP and CSOP awards (the funding award being used to pay the exercise price arising on exercise of the CSOP) was limited to that number of shares that had a market value on the date of the awards equal to 150% of Peter Turner’s 2020 annual salary. Vested funding awards were not transferable to the participant. LTIP 2021: The awards to the CEO and CFO were structured as LTIP awards in the form of a conditional award of free shares. Sharesave HMRC-approved all-employee Sharesave scheme. Exercise price set at 20% discount to share price on date of grant. Options mature after the three-year savings period and must be exercised within six months of vesting. Details of options held by Directors under Sharesave are outlined in the individual Director shareholding tables above.</td>

Other transactions involving Directors are set out in note 27 (Related parties) to the consolidated financial statements. This Report was approved by the Board on 3 March 2022.
**Remuneration Governance**

**Remuneration Committee role**

The Remuneration Committee determines and agrees with the Board the framework and Policy for the remuneration, including pension rights and any compensation payments, of the Group’s executive Directors and the Chairman. The Committee also reviews the remuneration in relation to other senior executives and is kept fully informed of remuneration policy decisions impacting the wider workforce. The Committee’s terms of reference are available on the Group’s website.

The Remuneration Committee consults the Chief Executive Officer and invites him to attend meetings when appropriate. The Group Human Resources Director, the Group Head of Reward and Ellason LLP, the Committee’s independent advisor, attend meetings of the Committee by invitation.

The Committee also has access to advice from the Chief Financial Officer. The Company Secretary acts as secretary to the Committee. No executive Director or other attendee is present when his or her own remuneration is being discussed.

**Remuneration Committee membership**

The Remuneration Committee is currently composed of five non-executive Directors. Each of the non-executive Directors is regarded by the Board as independent, except the Chairman of the Company who was considered independent upon appointment. The Remuneration Committee met six times during the year. Attendance at meetings by individual members is detailed in the Corporate Governance Report on page 68.

**Key activities during 2021**

During 2021, the key areas of focus for the Committee were:

- Reviewing the Remuneration Policy ahead of presenting it to shareholders for approval at the 2022 Annual General Meeting, including reviewing whether the Policy remains appropriate and relevant in supporting the Company’s strategy and promoting long-term sustainable success;
- Consulting with shareholders on the proposed changes to the Remuneration Policy;
- Determining whether targets for the 2020 bonus and 2018 LTIP were achieved, and, if so, to what extent;
- Having reviewed the remuneration of the wider workforce, determining remuneration for executive Directors and other senior executives, applying consistent guidance principles;
- Reviewing whether the measures and structure for the bonus and share incentive schemes remain appropriate, as well as reviewing the overall effectiveness of such schemes;
- Reviewing and agreeing executive Director personal objectives for 2022;
- Receiving reports on share awards to employees, and employee participation in the Save As You Earn scheme;
- Reviewing feedback from institutional investors ahead of the Company’s 2021 Annual General Meeting;
- Reviewing executive Director share ownership guidelines, and Directors’ holdings against the guidelines;
- Receiving regulatory and governance updates, and receiving reports on external market remuneration practices;
- Reviewing and discussing the Company’s annual Gender Pay Gap Report;
- Appraising the independent remuneration advisor’s performance and reviewing the terms of engagement;
- Approving the Chairman’s 2022 fees;
- Reviewing performance targets for the 2022 bonus and share incentive schemes;
- Approving the remuneration of the Company’s incoming CFO, and reviewing the terms of the outgoing CFO’s retirement; and
- Reviewing the Committee’s terms of reference.

**Committee performance evaluation**

The Committee’s performance was reviewed as part of the Board evaluation (see page 71 for details), which was externally-facilitated in 2021 by Clare Chalmers Ltd. It was concluded that the Committee had operated effectively during the period under review.

**Committee advisor**

Ellason LLP has been the Committee’s executive remuneration advisor since 1 January 2021. Ellason specialises in executive remuneration advice and during 2021 provided independent advice on remuneration policy, performance measurement, the setting of incentive targets, TSR analysis and the structure of long-term incentives, and provided market data in respect of senior executive remuneration and non-executive Director fees. Ellason reports directly to the Chair of the Remuneration Committee and does not provide any non-remuneration-related services to the Group, and is considered to be independent.

Ellason is a signatory to the Remuneration Consultants Group’s voluntary Code of Conduct.

Fees paid during the year to advisors for advice to the Remuneration Committee, charged on a time and materials basis, were as follows:

The Directors’ Report is required to be produced by law. The Financial Conduct Authority (FCA) Disclosure, Transparency and Transparency Rules (DTRs) and Listing Rules (LRs) also require the Company to make certain disclosures.

Pages 58 to 109 inclusive (together with the sections of the Annual Report incorporated by reference) constitute a Directors’ Report that has been drawn up and presented in accordance with applicable law, and the Listing Rules. The Directors in connection with that Report are subject to the limitations and restrictions provided by that law.

THE COMPANY
Legal form of the Company
Morgan Advanced Materials plc is a company incorporated in England and Wales with company number 284773.

Name change
The Company changed its name to Morgan Advanced Materials plc (from The Morgan Crucible Company plc) on 27 March 2013.

Annual General Meeting (AGM)
The Company’s 2022 AGM will be held on Thursday 5 May 2022, commencing at 10:30am at York House, Sheet Street, Windsor SL4 1DD. A circular incorporating the 2022 Notice of AGM and the 2022 Notice of Resolution will be sent to each shareholder of the Company whose name appears in the register of members of the Company at the close of business on 29 April 2022.

Morgan Advanced Materials plc is a company incorporated in England and Wales with company number 284773. The Company’s constitution, known as the Articles of Association, is a contract between the Company and its shareholders covering many aspects of the management of the Company. It deals with matters such as the rights of shareholders, the appointment and removal of Directors, the conduct of the Board and general meetings and any other matters required by the Company.

The Articles may be amended by special resolution of the Company’s shareholders.

Appointments and replacement of Directors
This Article provides that the Company may by ordinary resolution at a general meeting appoint any person to act as a Director, provided that notice has been given of the resolution identifying the proposed person by name and that the Company receives written confirmation of that person’s willingness to act as a Director if he or she has not been recommended by the Board. The Articles also empower the Board to appoint as a Director any person who is willing to act as a Director.

The maximum possible number of Directors under the Articles is 15. The Articles provide that the Company may by special resolution, or by ordinary resolution of which special notice is given, remove any Director before the expiration of his or her period of office. The Articles also set out the circumstances in which a Director shall vacate office. The Articles require that at each AGM any Director who was appointed after the previous AGM must be proposed for election by the shareholders. Additionally, any other Director who has not been elected or re-elected at one of the previous two AGMs must be proposed for re-election by the shareholders. The Articles also allow the Board to select any other Director to be proposed for re-election. In each case, the rules apply to Directors who were acting as Directors on a specific date selected by the Board. This is a date not more than 14 days before, and no later than, the date of the Notice of AGM.

Notwithstanding the provisions of the Articles, all the Directors will stand for election at the annual general meeting in accordance with the provisions of the UK Corporate Governance Code (the Code). Details of the skills, experience and career history of Directors in post as at the date of the Report, and the Board Committees on which they serve, can be found on pages 60 to 61.

RESULTS AND DIVIDENDS
The total profit for the year was £113.1 million (2020: £950.5 million) and the profit for the year after taxation was £78.0 million (2020: £684.4 million). Please refer to note 19 on page 73 for more details on the calculation of gross profit and loss.

The profit for the period arises principally as a result of improved volumes and delivery of the benefits from the Group’s restructuring programme. Profit before taxation for the same period was £104.3 million (2020: £93.1 million).

The total dividend declared in respect of the year ended 31 December 2021 was 3.2 pence per share (2020: 2.4 pence per share). The total dividend declared for the year ended 31 December 2020 was 2.4 pence per share (2019:2.1 pence per share). The Directors have declared a dividend of 3.2 pence per share for the year ended 31 December 2021. The Directors also declared a final dividend of 6.4 pence per share for the year ended 31 December 2020 (2019: 5.5 pence per share).

SHARE CAPITAL AND RELATED MATTERS
The Company’s share capital as at 31 December 2021 is set out in note 41 on page 180. The rights attaching to those shares are set out in note 28 on page 91.

EMPLOYMENT OF DISABLED PEOPLE
Morgan has a range of employment policies which set out the standards, processes, expectations and responsibilities of its people and the organisation. These policies are designed to ensure that everyone, including those with existing or new disabilities, are dealt with fairly and have equal opportunity. Further details of the People policies are set out on pages 28 to 31.

.RESEARCH AND DEVELOPMENT
The Group has spent £85.9 million in expense in respect of research and development (2020: £80.8 million). The Group did not capitalise any development costs in 2021 (2020: £14.0 million). Morgan has established four Centres of Excellence (CoEs), which are dedicated to driving materials development, to exciting customer specifications, and delivering performance through materials and production process innovation. The CoEs focus on the execution priorities of the global business units and the Group.

GREENHOUSE GAS EMISSIONS, ENERGY CONSUMPTION AND ENERGY EFFICIENCY
Details of the Group’s annual greenhouse gas emissions, energy consumption and energy efficiency performance in the Environment section on pages 20 to 24.

POLITICAL DONATIONS
No political donations were made by the Group.

Employee share and share option schemes
The Group operates a number of employee share and share option schemes. Details of outstanding share awards and share options are given in note 24 on page 166. All the Company’s share schemes contain provisions relating to a change of control. Outstanding options and awards would normally vest and become exercisable on a change of control, subject to being pro-rated for time and to the satisfaction of any performance conditions at that time.

The trustees of the Morgan General Employee Benefit Trust have absolute and unfettered discretion in relation to the shares held in the Trust at any general meeting. Their policy is not to vote the shares. If any offer is made to shareholders to acquire their shares, the Trustees will have absolute and unfettered discretion as to whether they will accept the offer in respect of any shares held by them.
Major shareholdings

As at the date of this report, the Company had been notified of the following, in accordance with DTR 5, from holders of notifiable interests representing 3% or more of the issued Ordinary share capital of the Company:

TRANSACTIONS, CONTRACTUAL ARRANGEMENTS AND POST BALANCE SHEET EVENTS

Significant agreements – change of control

The Group has a number of borrowing facilities provided by various financial institutions. The facility agreements generally include change of control provisions which, in the event of a change in ownership of the Company, could result in their renegotiation or withdrawal. The most significant of such agreements are the UK £200 million multi-currency revolving credit facility, which was signed on 26 September 2018, and the privately placed Note Purchase and Guarantee Agreements signed on 27 October 2016 and 20 March 2017, for which the aggregate outstanding loan amounts are US$317.6 million and €385 million. There are a number of other agreements that would take effect, alter or terminate upon a change of control of the Company following a takeover bid, such as commercial contracts and joint venture agreements. No such individual contract is considered to be significant in terms of its potential impact on the business of the Group as a whole.

Post balance sheet events

There were no reportable subsequent events following the balance sheet date.

REPORTING, ACCOUNTABILITY AND AUDIT

Statement of Directors’ responsibilities

The Directors are responsible for preparing the Annual Report and the Group and Parent company financial statements in accordance with applicable law and regulations.

Prepare the financial statements on the going concern basis of accounting unless they intend to liquidate the Group or the Parent company or to cease operating or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group company’s transactions and disclose with reasonable accuracy at any time the financial position of the Parent company and enable them to ensure that its financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

Under applicable law and regulations, the Directors are also responsible for preparing a Strategic Report, Directors’ Report, Remuneration Report and Corporate Governance Statement that comply with that law and those regulations.

The Directors are responsible for the maintenance and integrity of the corporate and financial information on the Company’s website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

In its reporting to shareholders, the Board is satisfied that the Annual Report and Accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the Group’s performance and position, business model and strategy as required by the Code.

The Directors as at the date of this Report, whose names and functions are set out on pages 60 to 61, confirm that, to the best of their knowledge:

The Group’s consolidated financial statements, which have been prepared in accordance with United Kingdom adopted international accounting standards, give a true and fair view of the assets, liabilities, financial position and profit of the Group;

The management report (comprising the Directors’ Report and the Strategic Report) includes a fair review of the development and performance of the business and the position of the Group, together with a description of the principal risks and uncertainties that it faces.

Scape of the reporting in this Annual Report

The Board has prepared a Strategic Report which provides an overview of the development and performance of the Group’s business in the year ended 31 December 2021.

For the purposes of DTR 4.1.3R(2) and DTR 4.1.8, the Directors’ Report on pages 58 to 109 and the Strategic Report on pages 2 to 57 comprise the management report, including the sections of the Annual Report and consolidated financial statements incorporated by reference.

Each Director holding office at the date of approval of this Directors’ Report confirms that, so far as he or she is aware, there is no relevant audit information of which the Company’s auditor is unaware, and that he or she has taken all steps that he or she ought to have taken as a Director to make himself or herself aware of any relevant audit information and to establish that the Company’s auditor is aware of that information.

The Strategic Report, the Directors’ Report and the Remuneration Report were approved by the Board on 3 March 2022.

For and on behalf of the Board

Stephanie Mackie

Company Secretary

3 March 2022

INDEPENDENT AUDITOR’S REPORT

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

TO THE MEMBERS OF MORGAN ADVANCED MATERIALS PLC

1. OPINION
In our opinion,

→ The financial statements of Morgan Advanced Materials plc (the ‘Parent company’ and its
subsidaries (the ‘Group’) give a true and fair view of the state of the Group’s and of the
Parent company’s affairs as at 31 December 2021 and of the Group’s profit for the year
then ended.
→ The Group financial statements have been properly prepared in accordance with United
Kingdom adopted international accounting standards and International Financial
Reporting Standards (IFRS) as issued by the International Accounting Standards Board
(IASB).
→ The Parent company financial statements have been properly prepared in accordance
with United Kingdom Generally Accepted Accounting Practice, including Financial
Reporting Standard (10) ‘Reduced Disclosure Framework’;
→ The financial statements have been prepared in accordance with the requirements of the
Companies Act 2006.

We have audited the financial statements which comprise

→ The Consolidated income statement;
→ The Parent company financial statements;
→ The Group financial statements;
→ The materiality that we used for the Group financial statements was £5.0m

We now consider this uncertainty has reduced and therefore are using profit
before tax and before specific adjusting items as a basis for our opinion.

3. SUMMARY OF OUR AUDIT APPROACH

Key audit matters

The key audit matters that we identified in the current year were:

→ Inventory valuation; and
→ Impairment of non-financial assets.

Materiality

The materiality that we used for the Group financial statements was £5.0m
(FY20: £4.5m) which was determined based on 4.5% profit before tax and before specific adjusting items.

Scoping

Full scope audit work was performed on 17 (FY20: 18) reporting components, and specified audit procedures were undertaken on a further 13 (FY20: 14) reporting components. Our full scope and specified audit procedures covered 65% of Group revenue (FY20: 69%) and 59% of absolute Group statutory profit (FY20: 89%).

Significant changes in our approach

Our audit approach is consistent with the previous year except for:

→ The presentation of restructuring costs as a specific adjusting item is no longer considered to be a key audit matter. In the prior year, the Group launched a significant restructuring programme following the outbreak of COVID-19 and recognised £2.5m in restructuring costs in the FY20 financial statements. In the current year, a net gain of £0.1 million has been recognised representing £2.1 million of further redundancy and closure costs related to the Group’s restructuring programme, offset by a £2.2 million release of restructuring provisions booked last year in relation to this programme. As such, there is a reduced risk that business as usual restructuring activities are incorrectly presented as exceptions within adjusting items.

→ In the prior year due to the forecasting uncertainty from the COVID-19 pandemic our materiality was determined considering a number of different metrics which included:

**Profit before tax and before specific adjusting items**

→ Revenue;
→ Earnings before interest, tax, depreciation and amortisation; and
→ Net assets.

We now consider this uncertainty has reduced and therefore are using profit before tax and before specific adjusting items as our materiality benchmark.

4. CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the directors’ use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors’ assessment of the Group’s and Parent company’s ability to continue to adopt the going concern basis of accounting included:

→ Obtaining an understanding of the financing facilities including nature of facilities, repayment terms and covenants;
→ Obtained an understanding of the controls around the budgeting and forecasting process used in the going concern preparation process;
→ Evaluating the likelihood of business model and principal risks as identified on pages 14 and 15;
→ Challenging the assumptions used in the Board approved forecasts by reference to historical performance and other supporting evidence such as market data;
→ Recalculation of the amount of headroom in the forecasts (in liquidity terms and against the relevant covenant limits);
→ Assessing the appropriateness of the sensitivity analysis and reverse stress tests performed by management;
→ Assessing the adequacy of the disclosures made by management.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group’s and Parent company’s ability to continue as a going concern for a period of at least twelve months from the financial statements are authorised for issue.

In relation to the reporting on how the Group has applied the UK Corporate Governance Code, we have nothing to add or draw attention to in relation to the directors’ statement in the financial statements in relation to the directors’ section about the directors’ assessment of the going concern basis of accounting.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

5. KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on the overall audit strategy, the allocation of resources in the audit and directing the efforts of the engagement team.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

5.1. Inventory Valuation

Key audit matter description

The Group manufactures thermal, carbon and technical ceramic products for a diverse range of end markets. The Group had material inventory balances of £140.7m as at 31 December 2021 (2020: £122.4m). There is a risk that inventory is not valued appropriately because of local manufacturing sites not correctly applying the Group provisioning accounting policy, to appropriately write-down the net realisable value of excess and obsolete stock due to

→ System limitations, whereby significant manual intervention is required to record and value inventory, which requires regular manual adjustments to inventory; and
→ The level of management judgment involved in determining whether a provision should be recognised and how it should be measured. The provision is typically determined based on ageing and expected future usage.

In the Consolidated Financial Statements, note 1 sets out the Group’s accounting policy for inventory valuation and note 16 provides further analysis of the account balance.

How the scope of our audit responded to the key audit matter

We have performed the following audit procedures in respect of this key audit matter:

→ Obtained an understanding of the relevant controls over the inventory provisioning process;
→ Assessed the inventory ageing and ensured that the group accounting policy of fully providing for inventory more than 12 months has been applied. For items less than 12 months understood the breakdown of the inventory by age;
→ Challenged management’s key assumptions in determining inventory provisions by assessing the accuracy and completeness of items included in the provision by taking into account the impact on future usage; and
→ Assessed the mathematical accuracy of the inventory provision by obtaining management’s analysis and performing a recalibration based on the key inputs.

Key observations

Based on our procedures performed, we are satisfied that the valuation of inventory at 31 December 2021 is appropriate.
INDEPENDENT AUDITOR’S REPORT

TO THE MEMBERS OF MORGAN ADVANCED MATERIALS PLC

5.2. Impairment of non-financial assets

Key audit matter description

In FY21, following the outbreak of COVID-19 and the resulting economic downturn, the Group recorded impairments of non-financial assets of £65.6m. These primarily sat within the Technical Ceramics and Thermal Ceramic global business units. In FY21, the Group has had a strong recovery despite the challenging economic environment.

IAS 36 requires that at the end of each reporting period, an entity should assess whether there are any indicators of impairment or indication that an impairment loss recognised in prior periods should be reversed. If such indication exists, the entity shall estimate the recoverable amount of that asset. Management’s review for indicators of impairment or reversal identified sites and assets that required further consideration. Impairment indicators were identified for certain assets in Technical Ceramics Asia, Electrical Carbon UK and North America and Thermal Ceramics North America. Total impairment charges for the year were £12.4 million. This includes a partial impairment of £65.0 million for Technical Ceramics Asia where a value in use calculation was performed. We focused the majority of our work on the carrying value of this CGU and have provided further detail on the key assumptions used in management’s valuation below.

Management has determined the recoverable amount based on a value in use model calculated from cash flow projections, which are based on management’s assumptions and estimates of future trading performance.

Estimating a value in use is inherently judgemental, and a range of assumptions can reasonably be applied in determining the estimates used therein. The key judgements in assessing non-financial assets for impairment are the discount rate, long-term growth rate, and the short-term projected cash flows. The value in use models are sensitive to changes in these estimates, all of which must reflect a long-term view of underlying growth in the respective economy within which these businesses operate and the reasonableness of projected cash flows.

We have focused this key audit matter to the discount rate and short-term future cash flows and material judgements contained therein. This is where the highest degree of sensitivity exists in determining the value in use. As a result, management has provided sensitivity disclosures of the reasonable possible changes that could result in an impairment.

The Audit Committee Report on page 74 refers to impairment of non-financial assets as an area considered by the Audit Committee. Note 1 to the Consolidated Financial Statements sets out the Group’s accounting policy for testing of non-financial assets for impairment and contains further details on the key source of estimation uncertainty.

How the scope of our audit responded to the key audit matter

We have performed the following procedures in respect of this key audit matter:

- Obtained an understanding of the relevant key controls relating to the impairment process;
- Challenged management’s indicator assessment for impairment or reversal by performing our own independent consideration of possible indicators;
- Assessed the integrity of management’s impairment model through testing of the mechanical accuracy and reviewing the application of the input assumptions;
- Evaluated the process management undertook to prepare the cash flow forecasts in their impairment models including agreement with the latest Board-approved plans and management approved forecasts;
- Challenged the cash flow projections through assessing the accuracy of historical budgeting by comparing them with actual performance and independent evidence to support any significant expected future changes to the business;
- Assessed a range of available market data and performing a peer benchmarking exercise to assess and challenge the growth rates forecasted by management in revenue and margins;
- Assessed reasonable possible changes in assumptions to challenge the appropriateness of management’s assessment of reasonable possible change scenarios; and
- Involved internal valuation specialists to assess the appropriateness of the discount rates used.

Key observations

Based on our procedures performed, we consider the key assumptions taken by management to be within an acceptable range and reasonable and supportable. We identified control deficiencies relating to the review controls over the process to identify impairment indicators and the value in use models, which were reported to management and those charged with governance.
INDEPENDENT AUDITOR’S REPORT

TO THE MEMBERS OF MORGAN ADVANCED MATERIALS PLC

7. AN OVERVIEW OF THE SCOPE

7.1. Identification and scoping of components

The Group operates and manufactures in 30 countries across five continents with the largest footprint being in North America, Asia and Europe. Our Group audit was scoped outside the Group’s core business, including Group-wide controls, and extended to all material sites. Based on that assessment, we focused our Group audit scope across all five of the established business units: Thermal Ceramics, Molten Metal systems, Seals and Bearings, Technical Ceramics and Electrical Carbon.

3.1.1.7.4. Working with other auditors

As a part of our audit procedures, we have obtained management’s climate-related risk assessment and held discussions with those charged with governance to understand the process of identifying climate-related risks, the determination of mitigating actions and the impact on the Group’s financial statements. While management has acknowledged that the transition and physical risks posed by Climate change have the potential to impact the medium to long term success of the business, they have also assessed that there is no material impact arising from climate change on the judgements and estimates made in the financial statements as at 31 December 2021 as explained in note 1.3 on page 130.

Our responsibility is to read the other information and, in so doing, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether these are due to errors or other causes (such as fraud). We consider whether the existence of such errors or apparent material misstatements provides a basis for concluding that the financial statements are materially misstated, or otherwise fail to properly present the results of the business and its financial statements.

7.2. Our consideration of the control environment

The Group uses a number of different IT controls across the reporting components and we worked with our IT specialists to obtain an understanding of the General IT controls for relevant systems. The control environment is described as and relies on manual processes with improvements required to the IT environment in order for us to adopt a controls reliance approach to our audit. As management develops and completes its controls improvement programme of work in future years, we expect our audit approach to evolve alongside these developments in the internal control environment.

7.3. Our considerations of climate-related risks

In planning our audit, we have considered the potential impact of climate change on the Group’s business and its financial statements. The Group considers the risk and opportunities relevant to an emerging issue for the Group. As a part of our audit procedures, we have obtained management’s climate-related risk assessment and held discussions with those charged with governance to understand the process of identifying climate-related risks, the determination of mitigating actions and the impact on the Group’s financial statements.

We performed our own qualitative risk assessment of the potential impact of climate change on the Group’s account balances and classes of transaction, and did not identify any additional risks of material misstatement. Our procedures include reading disclosures included in the 50 Strategic Report to consider whether they are materially consistent with the financial statements and our knowledge obtained in the course of the audit.

7.4. Working with other auditors

The audit work on all components was performed by Deloitte Touche Tohmatsu Limited members of the firm and exceptions component business in France which continued to be audited by KPMG. The component audit work was performed under the direction and supervision of the Group audit team.

As a Group level, further substantive audit work was performed over the consolidation and analytical review procedures were performed over components not in scope.

The planned programme which we designed as part of our involvement in the component auditors’ work was delivered over the course of the Group audit. The extent of our involvement which commenced from the planning phase included:

- Setting the scope of the component auditor’s and assessment of their independence;
- Designing the audit procedures for all significant areas to be tested by the component auditors and issuing Group audit instructions detailing the nature and form of the reporting required by the Group engagement team;
- Providing direction on engagement file by the component auditors through online and telephone conversations; and
- A review of the component auditors’ engagement file by a senior member of the Group engagement team.

In response to the Covid-19 pandemic, which limited our ability to make component visits, more frequent calls were held between the Group and component team members and remote access to relevant documents was provided. Even during the pandemic, most of our year-end audit was performed in a remote working environment.

8. OTHER INFORMATION

The other information comprises the information included in the annual report other than the financial statements and our auditor’s report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover our consideration of the other information. However, to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

The key laws and regulations we considered in this context included the Companies Act, Listing Rules, pensions legislation, tax legislation in all relevant jurisdictions where the Group operates.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which is necessary to enable the business to operate or to avoid a material penalty. These included the group’s environmental regulations.

11.2. Audit response to risks identified

As a result of the performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

Our procedures to respond to risks included the following:

- Reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- Enquiring of management regarding the risk committee and in-house legal counsel concerning actual and potential litigation threats;
- Performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- Reading minutes of meetings of those charged with governance, reviewing internal audit and assessing correspondence with HFM;
- In addressing the risk of fraud in relation to revenue recognition, we reviewed an understanding of relevant controls in the revenue cycle and tested a sample of sales recognised during the period by agreeing to invoices, dispatch notes and cash collection (where appropriate) to assess the performance obligations have been met; and
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments assessing whether the judgements made in making accounting estimates are indicative of a potential bias, and whether the business is capable of any material inconsistencies or non-compliance with laws and regulations that may be material to the financial statements.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including significant component audit teams and internal specialists and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.
INDEPENDENT AUDITOR’S REPORT

TO THE MEMBERS OF MORGAN ADVANCED MATERIALS PLC

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

12. OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2006

In our opinion the part of the directors’ remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion, based on the work undertaken in the course of the audit:

→ The information given in the strategic report and the directors’ report for the financial year for which the financial statements are prepared is consistent with the financial statements; and

→ The strategic report and the directors’ report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors’ report.

13. CORPORATE GOVERNANCE STATEMENT

The Listing Rules require us to review the directors’ statement in relation to going concern, longer-term viability and that part of the Corporate Governance Statement relating to the group’s compliance with the provisions of the UK Corporate Governance Code specified for our review.

Based on the work undertaken as part of our audit, we have concluded that each of the following elements of the Corporate Governance Statement is materially consistent with the financial statements and our knowledge obtained during the audit:

→ The directors’ statement with regards to the appropriateness of adopting the going concern basis of accounting and any material uncertainties identified set out on page 53;

→ The directors’ explanation as to its assessment of the group’s prospects, the period this assessment covers and why the period is appropriate set out on page 53;

→ The directors’ statement on fair and understandable set out on page 108;

→ The section of the annual report that describes the review of effectiveness of risk management and internal control systems set out on page 76; and

→ The section describing the work of the audit committee set out on page 75.

14. MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

14.1. Adequacy of explanations received and accounting records

Under the Companies Act 2006 we are required to report to you if, in our opinion:

→ We have not received all the information and explanations we require for our audit; or

→ Adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or

→ The parent company financial statements are not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

14.2. Directors’ remuneration

Under the Companies Act 2006 we are also required to report if in our opinion certain disclosures of directors’ remuneration have not been made or the part of the directors’ remuneration report to be audited is not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

15. OTHER MATTERS WHICH WE ARE REQUIRED TO ADDRESS

15.1. Auditor tenure

Following the recommendation of the audit committee, we were appointed in June 2019 to audit the financial statements for the year ending 31 December 2020 and subsequent financial periods. The Board’s decision was approved by the shareholders at the AGM in May 2020.

The period of total uninterrupted engagement of the firm is 2 years, covering the years ending 31 December 2020 and 31 December 2021.

15.2. Consistency of the audit report with the additional report to the audit committee

Our audit opinion is consistent with the additional report to the audit committee we are required to provide in accordance with FAs (UK).

16. USE OF OUR REPORT

The report is made solely to the company’s members, as a body, in accordance with Chapter 3 and Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members these matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

As required by the Financial Conduct Authority (FCA) Disclosure Guidance and Transparency Rule (DTR) 4.1.1R, these financial statements form part of the European Single Electronic Format (ESEF) prepared Annual Financial Report filed on the National Storage Mechanism of the UK FCA in accordance with the ESEF Regulatory Technical Standard (ESEF RTS). The auditor’s report provides no assurance over whether the annual financial report has been prepared using the single electronic format specified in the ESEF RTS.

## Financial statements

### 1. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS

Morgan Advanced Materials plc (the ‘Company’) is a public company limited by shares incorporated in the UK under The Companies Act and is headquartered in the UK. The address of the registered office is given in ‘Shareholder information’ on page 188. The principal activities of the Company and its subsidiaries and the nature of the Group’s operations are set out in the Strategic Report on pages 2 to 57.

The Group’s financial statements consolidate those of the Company and its subsidiaries (together referred to as the ‘Group’), and include the Group’s interest in associates. The Parent Company financial statements present information about the Company as a separate entity and not about its Group. These consolidated financial statements have been drawn up to 31 December 2021. The Group maintains a 13-month calendar financial year ending on 31 December.

The Group’s financial statements have been prepared and approved by the Directors in accordance with the requirements of the Companies Act 2006 and International Financial Reporting Standards (IFRSs) as adopted by the UK. There has been no change to the recognition, measurement or disclosure from preparation in previous periods under IFRSs as adopted by the European Union. The Company has elected to prepare its Parent Company financial statements in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework; these are presented on pages 169 to 184.

Except for the changes set out in the adoption of new and revised standards section, the accounting policies set out below have been applied consistently to all periods presented in these Group financial statements.

### SIGNIFICANT ACCOUNTING POLICIES

#### Measurement convention

The financial statements are prepared on the historical cost basis except that the following assets and liabilities are stated at their fair value: derivative financial instruments and financial instruments designated as fair value through other comprehensive income (FVOCI).

#### Functional and presentation currency

The Group’s financial statements are presented in pounds sterling, which is the Company’s functional currency.

### Basis of consolidation

(i) **Subsidiaries**

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

(ii) **Acquisitions**

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. The Group measures goodwill as the acquisition-date fair value of the consideration transferred, including the amount of any non-controlling interest in the acquiree, less the net of the acquisition-date fair values of the identifiable assets acquired and liabilities assumed, including contingent liabilities as required by IFRS 3.

Consideration transferred includes the fair values of assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, equity interests issued by the Group, contingent consideration, and share-based payment awards of the acquiree that are reclassified in the business combination. Any contingent consideration payable is recognised at fair value at the acquisition date. Subsequent changes to the fair value of contingent consideration that is not classified as equity is recognised in the income statement.

Transaction costs that the Group incurs in connection with a business combination, such as finder’s fees, legal fees, due diligence fees and other professional and consulting fees, are expensed as incurred.

(iii) **Associates**

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Group holds between 20% and 50% of the voting power of another entity. Associates are accounted for using the equity method and are initially recognised at cost.

(iv) **Transactions eliminated on consolidation**

Intra-group balances and any unrealised gains and losses on income and expenses arising from intra-group transactions are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with associates are eliminated against the investment to the extent of the Group’s interest in the associate. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.
I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS

continued

Foreign currency

(i) Foreign currency transactions

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to pounds sterling at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to pounds sterling at foreign exchange rates ruling at the dates at which the fair values are determined.

(ii) Financial statements of foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on consolidation, are translated to pounds sterling at foreign exchange rates ruling at the balance sheet date. The revenues, expenses and cash flows of foreign operations are translated to pounds sterling at an average rate for the period where this approximates to the foreign exchange rates ruling at the dates of the transactions. Foreign exchange differences arising in retranslation since the adoption of IFRS are recognised directly in other comprehensive income and accumulated in the translation reserve.

Specific adjusting items

The Group uses specific adjusting items, which are not defined or specified under IFRS. These specific adjusting items, which are not considered to be a substitute for IFRS measures, provide additional helpful information. In the consolidated income statement the Group presents specific adjusting items separately. In the judgment of the Directors, due to the nature and value of these items they should be disclosed separately from the underlying results of the Group to provide the reader with an alternative understanding of the financial information and an indication of the underlying performance of the Group.

Revenue

Revenue is recognised when or as the Group satisfies a performance obligation by transferring a promised good or service to a customer. The Group’s principal performance obligations are the provision of products and components, and is satisfied at a point in time and subject to payment terms typical to the geography in which the business operates. Products and components are transferred when the Group obtains control of the goods. For goods that are collected by the customer, revenue is recognised at the point in time when the customer has taken physical possession of the goods. For contracts that include delivery of goods, the delivery element of the contract constitutes a separate performance obligation because it is distinct. For these contracts, control of the goods does not transfer to the customer until the goods have been delivered and therefore both performance obligations are satisfied simultaneously. Revenue for these contracts is therefore recognised on delivery.

Substantially all of the Group’s revenue is derived from short-term contracts for the provision of products and components. A smaller portion of the Group’s revenue is derived from long-term based business, principally within the Thermal Ceramics global business unit. Revenue for these contracts is recognised in line with fulfilment of contractual performance obligations stated in the contract and is not significant, consequently (except for trade receivables) the Group does not have significant assets or liabilities relating to its contracts with customers.

Revenue is only recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The transactions considered material in determining revenue recognition are those which: (i) are not contractually cancelable; (ii) are not affected by final approval; and (iii) are not dependent on the delivery of a separate good or service.

Determining the transaction price does not require significant judgement. The costs incurred in obtaining contracts are not material. The Group acts as a principal in its transactions with customers. In 2021, there were no material adjustments to revenue which related to performance obligations satisfied in the previous year.

IFRS 15 Revenue from Contracts with Customers requires revenue to be disaggregated into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. The Group discloses revenue disaggregated by geography, end market and by global business unit, which are aligned by product type, in note 3 to the consolidated financial statements.

Research and development

The Group’s research and development expenditure is widely dispersed with no individually material projects. It is often some time in a project before the Group is able to test technical or commercial feasibility and therefore whether the Group will continue to fund any individual project, as such materially all of the Group’s expenditure is recognised in the income statement as an expense as incurred.

Development activities are capitalised when research findings are applied to a plan or design for the production of new or substantially improved products and processes that relate to a product or process that is technically and commercially feasible and the Group has sufficient resources to complete development, use and sale of products or processes. Capitalised development expenditure is stated at cost less accumulated amortisation and impairment losses.

Finance income and expense

Net financing costs comprise interest payable on borrowings calculated using the effective interest rate method, interest receivable on funds invested, gains and losses on hedging instruments that are recognised in the income statement, interest on IFRS 16 lease liabilities and net interest on IAS 19 pension assets and IAS 19 obligations. Interest income is recognised in the income statement as it accrues, using the effective interest method.

Borrowing costs (interest and other costs) are capitalised when they are incurred in raising specific funds to finance a major capital project which will be a significant productive asset, or to the extent that funds borrowed generally are used for the purposes of obtaining a qualifying asset.

I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS

continued

Taxation

Taxation includes income tax and comprises current and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised in equity or other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation of assets and settlement of liabilities using the rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Discontinued operations

Where the Group has disposed of or has classified as held-for-sale a business component which represents a separate major line of business or geographical area of operations, it classifies such operations as discontinued. The post-tax profit or loss of the discontinued operations is shown as a single line on the face of the consolidated income statement, separate from the results of the rest of the Group.

Hedge accounting

The Group designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in cash flow hedges. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges. At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, and with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group determines whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedge relationships meet all of the following hedge effectiveness requirements:

- there is an economic relationship between the hedged item and the hedging instrument
- the effect of the cash flows on the economic values of the hedging instrument and the hedged item is substantially offset by changes in the economic values of the hedging instrument and the hedged item in the period of hedge effectiveness
- the economic values of the hedging instrument and the hedged item are economically highly correlated
- the hedging relationship is expected to remain highly effective over time

If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for that designated hedge relationship remains the same, the Group adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria again. The Group designates the full change in the fair value of a forward contract (i.e. including the forward elements) as the hedging instrument for all of its hedging relationships involving forward contracts.

Note 22 sets out details of the fair values of the derivative instruments used for hedging purposes.

Movements in the hedging reserve in equity are detailed in note 20.

Fair value hedges

The fair value change on qualifying hedging instruments is recognised in profit or loss.

Where hedging gains or losses are recognised in profit or loss, they are recognised in the same line as the hedged item.

Cash flow hedges

The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of hedging reserve, limited to the cumulative change in fair value of the hedged item from inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forward transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are removed from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability. This transfer does not affect other comprehensive income. Furthermore, if the Group expects that some or all of the loss accumulated in the hedging reserve will not be recovered in the future, that amount is immediately reclassified to profit or loss.

The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. Any gain or loss recognised in other comprehensive income and accumulated in cash flow hedge reserve that at time remains in equity is reclassified to profit or loss when the forecast transaction occurs, or less. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in the cash flow hedge reserve is reclassified immediately to profit or loss.
1. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS continued

Property, plant and equipment

(i) Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation (see below) and impairment losses. The cost of self-constructed assets includes the cost of materials, direct labour, and an appropriate proportion of production overheads.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Gains and losses on the disposal of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of the asset. Gains and losses on the disposal of property, plant and equipment are recognised in ‘Operating costs before amortisation of intangible assets’ in the income statement.

(ii) Depreciation of owned assets

Depreciation is charged in the income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Land is not depreciated. Depreciation methods, useful lives and residual values are reviewed at each balance sheet date. The estimated useful lives are as follows:

- Buildings: 50 years
- Plant, equipment and fixtures: 3–20 years

Leasing

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all leases where it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (defined as leases of a value of less than USD 5,000 at lease commencement). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

(i) Lease liabilities

The lease liability is initially measured at the present value of future lease payments, discounted by using the rate implicit in the lease or, where the rate cannot be readily determined, an incremental borrowing rate. The lease payments included in the lease liability comprise fixed lease payments, variable payments that depend on an index or rate and any payments due under lease extension, termination or purchase options to the extent they are assessed as reasonably certain.

The lease liability is subsequently measured by using the effective interest method and in reducing the carrying amount to reflect the lease payments made. The Group remeasures the lease liability and makes a corresponding adjustment to the related right-of-use asset whenever there is a lease modification, a change in lease term or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of other lease variables, such as purchase options. A remeasurement will also occur when the lease payments change due to changes in index rates.

(ii) Right-of-use assets

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement date, less any lease incentives received and initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Group incurs an obligation for costs to demand and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

(iii) Depreciation of right-of-use assets

Right-of-use assets are depreciated over the shorter of lease term and useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

Goodwill

All business combinations are accounted for by applying the purchase method. Goodwill represents the difference between the cost of the acquisition and the fair value of assets, liabilities and contingent liabilities acquired.

Goodwill is not amortised. Goodwill is allocated to cash-generating units or groups of cash-generating units and is tested at least annually for impairment. If the recoverable amount of the cash-generating unit or group of cash-generating units is less than the carrying amount of the unit or group, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit or group and then to reduce the carrying amount of the other intangibles and other assets of the unit or group pro-rata on the basis. An impairment loss recognised for goodwill is not reversed in a subsequent period.

I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS continued

Other intangible assets

Other intangible assets that are acquired by the Group are stated at cost less accumulated amortisation (see below) and impairment losses. Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of intangible assets unless such lives are indefinite. Intangible assets with an indefinite useful life are systematically tested for impairment at each balance sheet date. Other intangible assets are amortised from the date they are available for use. The estimated useful lives are as follows:

- Capitalised development costs: 3 years
- Computer software: 3–10 years
- Customer relationships: 15–20 years
- Technology and trademarks: 15–20 years

When the Group incurs configuration and customisation costs as part of a cloud-based software-as-a-service agreement, and where this does not result in the creation of an asset which the Group has control over, then these costs are expensed.

Impairment of non-financial assets, excluding goodwill

The carrying amounts of the Group’s assets and cash-generating units are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the asset or cash-generating unit’s recoverable amount is estimated.

The recoverable amount of other assets and cash-generating units is the greater of their value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit. An impairment loss is recognised immediately in profit or loss.

An impairment loss is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised. A reversal of an impairment loss is recognised immediately in profit or loss to the extent that the asset’s or cash-generating unit’s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Investments in equity securities

Investments in equity securities held by the Group are classified as FVOCI and are stated at fair value, with any resultant gain or loss being recognised directly in other comprehensive income (in the fair value reserve), except for impairment losses. The gains or losses arising from changes in fair value are recognised in other comprehensive income until the security is disposed of, after which the cumulative gain or loss previously recognised in other comprehensive income and accumulated in the FVOCI reserve is transferred to retained earnings.

Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of inventories is based on the first-in-first-out principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, costs includes an appropriate share of overheads based on normal operating capacity.

Trade and other receivables

Trade receivables are recorded initially at transaction price and subsequently measured at amortised cost less the loss allowance. The loss allowance is recognised based on management’s expectation of losses without regard to whether an impairment trigger happened or not (an ‘expected credit loss’ (ECL)’ model). The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECL, estimated based on historical write-offs and adjusted for forward-looking information where appropriate. Trade receivables more than 180 days past due are generally considered not recoverable and a 100% loss allowance is recognised, except where historical experience with certain customers or geographies indicate otherwise. The loss is recognised in the income statement. Trade receivables are written off when recoverability is assessed as being remote. Subsequent recoveries of amounts previously written off are credited to the income statement.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits. Short-term deposits include demand deposits and short-term highly liquid investments with maturities of three months or less that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Bank overdrafts that are repayable on demand and form an integral part of the Group’s cash management are included as a component of borrowings for the purpose of the Group statement of cash flows.

Trade and other payables

Trade and other payables are recognised initially at transaction price. Subsequent to initial recognition they are measured at amortised cost using the effective interest method.

Borrowings

Borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the income statement over the period of the borrowings on an effective interest basis.
I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS continued

Financial instruments issued by the Group are treated as equity (i.e. forming part of shareholders’ funds) only to the extent that they meet the following two conditions:

(i) they include no contractual obligations upon the Group to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Group; and

(ii) where the instrument will or may be settled in the Company’s own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Company’s own equity instruments or is a derivative that will be settled by the Company exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the Company’s own shares, the amounts presented in these financial statements for called-up share capital and share premium account exclude amounts in relation to those shares.

Finance payments associated with financial liabilities are dealt with as part of finance expenses. Finance payments associated with financial instruments that are classified in equity are dividends and are recorded directly in equity.

Pensions and other long-term service benefits

(i) Defined contribution plans

For defined contribution plans, the Group pays contributions to either publicly or privately administered pension plans, and the Group has no further payment obligations once the contributions have been paid. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement as incurred.

(ii) Defined benefit plans

A defined benefit plan is any retirement plan which is not a defined contribution plan. Typically, defined benefit plans define an amount of retirement benefit that an employee will receive, usually depending on one or more factors such as age, years of service and earnings.

The Group’s net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods, that benefit is discounted to determine its present value, and the fair value of any plan assets is deducted. The discount rate is the yield at the balance sheet date on AA-rated bonds that have maturity dates approximating the terms of the Group’s obligations. The calculation is performed by a qualified actuary using the projected unit credit method.

When the calculation results in a benefit to the Group, the recognised asset is limited to the total of the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. An economic benefit is available to the Group if it is realisable during the life of the plan, or on settlement of the plan liabilities. Remeasurement gains and losses, differences between the interest income and actual returns on assets, and the effect of changes in actuarial assumptions, are recognised in full in other comprehensive income in the year in which they arise.

(iii) Long-term service benefits

The Group’s net obligation in respect of long-term service benefits, other than pension plans, is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The obligation is calculated using the projected unit credit method, or similar approximation, and is discounted to its present value and the fair value of any related assets is deducted. The discount rate is the yield at the balance sheet date on AA-rated bonds that have maturity dates approximating the terms of the Group’s obligations.

Share-based payment transactions

The grant date fair value of share-based payment awards granted to employees is recognised as an expense, with a corresponding increase in equity, with a corresponding increase in equity, over the period that the employees become conditionally entitled to the awards. The amount recognised as an expense is adjusted to reflect the actual number of awards for which the related service and non-market performance conditions are met, such that the amount ultimately recognised as an expense is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

Provisions, contingent liabilities and contingent assets

A provision is recognised in the consolidated balance sheet when the Group has a present legal or constructive obligation as a result of a past event and there is probable outflow of resources which can be reliably measured and will be required to settle the obligation. Provisions are recognised at an amount equal to the best estimate of the expenditure required to settle the Group’s liability. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate reflecting the current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A contingent liability is disclosed, where significant, if the existence of the obligation will only be confirmed by future events or where the amount of the obligation cannot be measured with reasonable reliability. A contingent liability is not disclosed if the likelihood of a material outflow in excess of any amounts provided is considered remote. Obligations arising from restructuring plans are recognised when detailed formal plans have been established and when there is a valid expectation that such a plan will be carried out. The Group’s contingent liabilities are reviewed on a regular basis.

A contingent asset is not recognised but is disclosed, where significant, if an inflow of economic benefit is probable.
I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS continued

1. Credit risk

The Group retains a small amount of insurance contract liabilities, together with the factors likely to affect its future development, performance and position are set out in the Strategic Report on pages 2 to 57. The financial position of the Group, its cash flows, liquidity position and borrowing facilities, are described earlier in this Financial Review.

In addition, note 22 to the consolidated financial statements, includes the Group’s policies and processes for managing financial risk, details of its financial instruments and hedging activities and details of its exposures to credit risk and liquidity risk. The Group meets its day-to-day working capital requirements through local banking arrangements underpinned by the Group’s £200 million unsecured multi-currency revolving credit facility, which matures in September 2024. As at 31 December 2021 the Group had significant headroom on its covenants and available liquidity with the Group’s £200 million multi-currency revolving credit facility being undrawn. Total committed borrowing facilities were £372.6 million, none of which is due to mature in the following 12 months. The amount drawn under these facilities was £172.6 million, which together with cash and cash equivalents of £127.3 million, gave a total headroom of £372.7 million.

The principal borrowing facilities are subject to covenants that are measured biannually in June and December, being net debt to EBITDA of a maximum of 3x and interest cover of a minimum of 4x, based on measures defined in the facilities agreements which are adjusted from the equivalent IFRS amounts. The Group has carefully modelled its cash flow outlook, taking account of reasonably possible changes in trading performance, exchange rates and plausible downside scenarios. This review indicated that there was sufficient headroom and liquidity for the business to continue for the 18-month period based on the facilities available as discussed in note 22 to the financial statements. The Group was also expected to be in compliance with the required covenants discussed above.

The Board has also reviewed the Group’s reverse stress testing performed to demonstrate how much headroom is available on covenant levels in respect of changes in net debt, EBITDA, and underlying revenues. Based on this assessment, a combined reduction in EBITDA of 35% and an increase in net debt of 80% would still allow the Group to operate within its financial covenants. The Directors do not consider either of these scenarios to be plausible given the diversity of the Group’s end-markets and its broad manufacturing base.

The Board and Executive Committee have regular reporting and review processes in place in order to closely monitor the ongoing operational and financial performance of the Group. As part of the ongoing risk management process, principal and emerging risks are identified and reviewed on a regular basis. This process includes the ongoing review of the impact of the pandemic on the Group and its stakeholders. Potential uncertainties in demand remain across the countries that the Group operates in as a result of COVID-19, despite these uncertainties the Group has shown a robust recovery in most of its end-markets, leading to a return to growth for the 2021 financial year. In addition, the Directors have assessed the risk of climate change and do not consider that it will impact the Group’s ability to operate as a going concern for the period under consideration.

The Board fully recognises the challenges that lie ahead but, after making enquiries, and in the absence of any material uncertainties, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for a period of 18 months from the date of signing the Annual Report and Accounts. Accordingly, they continue to adopt the going concern basis in preparing the Annual Report and Accounts.

J. Non-GAAP measures

Where non-GAAP measures have been referenced these have been identified by an asterisk (*) where they appear in text, and by a footnote where they appear in tables of the Financial Review. Further details can be found on pages 55 to 57, ‘Alternative Performance Measures’.

NEWLY ADOPTED STANDARDS

There were no new standards applicable to the Group in the year.

ACCOUNTING DEVELOPMENTS AND CHANGES

New accounting standards in issue but not yet effective

New standards and interpretations that are in issue but not yet effective are listed below:

- IFRS 17 (including the June 2020 Amendments to IFRS 17) – Insurance Contracts;
- Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate of Joint Venture;
- Amendments to IAS 1 – Classification of Liabilities as Current or Non-current;
- Amendments to IFRS 3 – Reference to the Conceptual Framework;
- Amendments to IAS 16 – Property, Plant and Equipment – Proceeds before Intended Use;
- Amendments to IAS 37 – Onerous Contracts – Cost of Fulfilling a Contract;
- Amendments to IAS 1 and IFRS Practice Statement 2 – Disclosure of Accounting Policies;
- Amendments to IFRS 8 – Definition of Accounting Estimates;

The adoption of the above standards and interpretations is not expected to lead to any material changes to the Group’s accounting policies or have any other material impact on the financial position or performance of the Group.

There are no other upcoming accounting standards or amendments that are applicable to the Group.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

I. SIGNIFICANT ACCOUNTING POLICIES, ESTIMATES AND JUDGEMENTS continued

1. Significant sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are included in the below notes.

Climate change is a global challenge and an emerging risk to businesses, people and the environment across the world. We have a role to play in improving our energy management, reducing our carbon emissions and by helping our customers do the same. Growing awareness of climate change and customer sustainability targets will provide impetus for business growth as we provide products, services and solutions that increase efficiency and reduce customers’ energy use and carbon emissions. As a result, in our view climate change does not create any further key sources of estimation uncertainty. For further detail see the Risk Management and Sustainability sections of the Strategic Report on pages 38 and 16.

Note 23: Pensions and other post-retirement employee benefits

The principal actuarial assumptions applied to pensions are shown in note 23, including a sensitivity analysis. The actuarial evaluation of pension assets and liabilities is based on assumptions in respect of inflation, future salary increases, discount rates, returns on investments and mortality rates. Relatively small changes in the assumptions underlying the actuarial valuations of pension schemes can have a significant impact on the net pension liability included in the balance sheet.

In 2018, based on the results of a High Court hearing, the Group recognised a liability in relation to Guaranteed Minimum Pensions (GMPs), as an initiative to remove inequalities in scheme benefits that arise from Guaranteed Minimum Pensions being unequal between men and women. As a result of a further judgement in November 2020 relating to the need to equalise historical transfer payments, a further charge of £0.1 million has been included in these accounts, refer also to note 23. Legal uncertainty remains in this area in relation to how equalisation will be practically implemented.

Note 25: Environmental provisions and contingent liabilities

Provisions for environmental costs are estimated based on current legal and constructive requirements. Actual costs and cash outflows can differ from current estimates because of changes in underlying factors including laws and regulations, public expectations, prices, more detailed analysis of site conditions and innovations in clean-up technology. The ultimate requirement for remediation and its costs are inherently difficult to estimate. Amounts provided are the Group’s best estimate of exposure based on currently available information. Although at present no additional costs of environmental issues have been identified beyond our best estimate, future possible costs that are not provided for could be material to the Group’s results in the period in which they are recognised. However, we do not expect these costs to have a material impact on the Group’s financial position or liquidity.

Note 6: Impairment of non-financial assets (excluding goodwill)

In addition to the impairment assessment of goodwill, described above, management also monitors the performance of individual assets and cash-generating units. Where indicators of impairment exist, they perform an impairment review on those assets or cash-generating units.

For assets or cash-generating units which the business continues to use, the review process relies on the use of estimates of the future profitability and cash flows which may differ from the actual results derived. There is a higher level estimation uncertainty inherent in these assumptions and it is reasonably possible that a change in these assumptions could lead to a reversal of the impairment charge.

Where non-financial assets or cash-generating units are not utilised by the business and will not be utilised in the future they are written down to their recoverable amount. There is a lower level of judgement associated with these impairments.

Other assumptions and estimates which have a lower risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next 12 months include:

Notes 8 and 15: Taxation

The level of current tax and deferred tax recognised is dependent on the tax rates in effect at the balance sheet date, and on subjective judgements as to the outcome of decisions to be made by the tax authorities in the various tax jurisdictions around the world in which the Group operates.

The Group periodically assesses its liabilities and contingencies for all tax years open to audit based on the latest information available. The Group records the level of current tax and deferred tax recognised is dependent on the tax rates in effect at the balance sheet date, and on subjective judgements as to the outcome of decisions to be made by the tax authorities in the various tax jurisdictions around the world in which the Group operates.

The Group periodically assesses its liabilities and contingencies for all tax years open to audit based on the latest information available. The Group records the level of current tax and deferred tax recognised is dependent on the tax rates in effect at the balance sheet date, and on subjective judgements as to the outcome of decisions to be made by the tax authorities in the various tax jurisdictions around the world in which the Group operates.

The adoption of the above standards and interpretations is not expected to lead to any material changes to the Group’s accounting policies or have any other material impact on the financial position or performance of the Group.

There are no other upcoming accounting standards or amendments that are applicable to the Group.
2. ACQUISITIONS AND DISPOSALS

2021

Disposal of Latrobe
On 15 January 2021, the Group completed the sale of assets associated with the Technical Ceramics business, based in Latrobe, US. The transaction was structured as a sale of the business and related assets for total consideration of £0.6 million. The disposal resulted in a loss of £0.1 million which was recognised in specific adjusting items within the consolidated income statement, see also note 6.

The loss on disposal is as follows:

<table>
<thead>
<tr>
<th>31 December</th>
<th>£m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trading net assets of disposal group</td>
<td>0.6</td>
</tr>
<tr>
<td>Goodwill of disposal group</td>
<td>0.1</td>
</tr>
<tr>
<td>Cumulative foreign exchange gains and losses recycled on disposal</td>
<td>(0.1)</td>
</tr>
<tr>
<td>Total net assets</td>
<td>0.6</td>
</tr>
</tbody>
</table>

Consideration | 0.6 |
Transaction costs associated with the disposal | (0.1) |
Loss on disposal | (0.1) |

In 2021, Latrobe generated an operating profit of £nil on revenues of £0.1 million in the period prior to the disposal (year ended 31 December 2020, £0.2 million on revenues of £3.0 million).

The disposal group was included in the Technical Ceramics operating segment.

Disposal of Jemmtec
On 28 April 2021, the Group completed the sale of its investment in associate, Jemmtec Limited (Jemmtec). The Group’s share of the total consideration was £14.2 million, comprising £12.2 million of initial consideration, on a cash-free, debt-free basis, a further consideration of £0.2 million for working capital adjustments and £1.8 million of contingent consideration that has been received in full in 2021. The disposal resulted in a gain of £7.2 million which was recognised in specific adjusting items within the consolidated income statement, see also note 6.

The gain on disposal is as follows:

<table>
<thead>
<tr>
<th>31 December</th>
<th>£m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Investment carrying value</td>
<td>7.0</td>
</tr>
<tr>
<td>Total consideration</td>
<td>14.2</td>
</tr>
<tr>
<td>Gain on disposal</td>
<td>7.2</td>
</tr>
</tbody>
</table>

In 2021, the Group’s share of profit in associate (net of income tax) was £0.4 million in the period prior to the disposal (year ended 31 December 2020, £0.6 million), see also note 14.

2. ACQUISITIONS AND DISPOSALS continued

Acquisition of Delamag
On 1 March 2021, Morgan Technical Ceramics Limited wholly purchased the business and assets of the ‘Delamag’ business of sourcing raw materials for the processing and manufacture of magnesium oxide from Delamin Limited. The acquisition comprised primarily all rights to the ‘Delamag’ business name, technical knowledge, intellectual property and business contracts.

The assets acquired and the consideration is as follows:

<table>
<thead>
<tr>
<th>31 December</th>
<th>£m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Identifiable intangible assets acquired</td>
<td>1.8</td>
</tr>
<tr>
<td>Goodwill</td>
<td>0.1</td>
</tr>
<tr>
<td>Total consideration</td>
<td>1.9</td>
</tr>
</tbody>
</table>

The intangible assets recognised represent the initial measurement of assets acquired based on information available at acquisition. Assets acquired may be remeasured as further information is obtained during the measurement period, which is up to 12 months from the date of acquisition.

The acquisition was a vertical integration and preserves existing income, as such the incremental profit from acquisition is immaterial in the year. The Delamag acquisition forms part of the Seals and Bearings operating segment.

2020

Disposal of Diamonex
On 31 August 2020, the Group completed the sale of its Diamonex business, based in Allentown, US. The transaction was structured as a sale of the business and related assets for total consideration of £5.9 million. The consideration comprised £5.6 million paid in cash on completion and £0.3 million of deferred consideration received in December 2021.

The disposal resulted in a gain of £2.2 million which was recognised in specific adjusting items within the consolidated income statement, see also note 6. The gain on disposal was as follows:

<table>
<thead>
<tr>
<th>31 December</th>
<th>£m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trading net assets of disposal group</td>
<td>2.2</td>
</tr>
<tr>
<td>Goodwill of disposal group</td>
<td>0.9</td>
</tr>
<tr>
<td>Cumulative foreign exchange gains and losses recycled on disposal</td>
<td>0.3</td>
</tr>
<tr>
<td>Total net assets</td>
<td>3.4</td>
</tr>
<tr>
<td>Consideration</td>
<td>5.9</td>
</tr>
<tr>
<td>Transaction costs associated with the disposal</td>
<td>(0.3)</td>
</tr>
<tr>
<td>Gain on disposal</td>
<td>2.2</td>
</tr>
</tbody>
</table>

In 2020, Diamonex generated an operating profit of £0.5 million on revenues of £4.3 million in the period prior to the disposal.

The disposal group was included in the Technical Ceramics operating segment.
3. SEGMENT REPORTING

For 2020 and 2021, the Group reported as two divisions and five global business units, which have been identified as the Group’s reportable operating segments, as detailed on pages 14, 44 to 49. These have been identified on the basis of internal management reporting information that is regularly reviewed by the Group’s Board of Directors (the Chief Operating Decision Maker) in order to allocate resources and assess performance. From 2022 onwards, we will no longer present divisional totals in our segmental reporting. We will continue to report five separate global business units.

Segment results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly investments and related income, borrowings and related expenses, corporate assets and head office expenses, and income tax assets and liabilities.

The information presented below represents the operating segments of the Group.

</tbody>
</table>

Employee costs:

Wages and salaries | 259.6 | 264.2 |

Other costs:

Equity-settled share-based payment expense | 24 | 4.5 |

Social security costs and other benefits | 54.4 | 54.3 |

Pension costs | 23 | 15.1 |

Depreciation – property, plant and equipment | 33.6 | 33.4 |

Depreciation – right-of-use assets | 3.0 | 3.7 |

Short-term leases and leasing of low value assets:

Plant and equipment | 12 | 9.2 |

Other leases | 0.3 | 0.4 |

Other operating charges and income:

Net foreign exchange gains | 0.1 | 0.1 |

Net other operating charges | 59.9 | 70.0 |

Net foreign exchange losses | 59.8 | 69.8 |

Total operating costs before specific adjusting items and amortisation of intangible assets | 826.0 | 819.0 |

Amortisation of intangible assets | 13 | 6.0 |

Total operating costs before specific adjusting items | 832.0 | 825.1 |

The following costs are included in total operating costs before specific adjusting items in the above table:

1. Research and development

The Group recognised £28.5 million in expense in respect of research and development (2020: £28.0 million). These costs are included in employee costs and other operating costs in the above table. There are no individually material project costs.

2. Audit and non-audit fees

A summary of the audit and non-audit fees in respect of services provided by the auditor charged to operating profit in the year ended 31 December 2021 is set out below:

| Fees payable to the Company’s auditor for the audit of the Company’s annual accounts | 0.7 | 0.7 |
| in respect of the current year | |
| in respect of the prior year | 0.1 | |
| Fees payable to the Company’s auditor and its associates for other services | 1.9 | 1.9 |
| the auditing of accounts of any subsidiaries of the Company | 0.1 | 0.1 |
| audit-related services | 2.8 | 2.7 |
5. STAFF NUMBERS
The average number of persons employed by the Group (including Directors) during the year, analysed by reporting segment, was as follows:

<table>
<thead>
<tr>
<th>Segment</th>
<th>Number of employees</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thermal Ceramics</td>
<td>2,410</td>
</tr>
<tr>
<td>Molten Metal Systems</td>

</tr>
<tr>
<td>Seals and Bearings</td>
<td>1,270</td>
</tr>
<tr>
<td>Technical Ceramics</td>
<td>2,130</td>
</tr>
<tr>
<td>Carbon and Technical Ceramics division</td>
<td>4,760</td>
</tr>
<tr>
<td>Corporate (UK and North America)</td>
<td>50</td>
</tr>
<tr>
<td>Group</td>
<td>7,620</td>
</tr>
</tbody>
</table>

Average employee numbers have been rounded to the nearest 10.

6. SPECIFIC ADJUSTING ITEMS
Specific adjusting items in relation to discontinued operations are disclosed in note 9.

6. SPECIFIC ADJUSTING ITEMS continued

Restructuring costs
A net credit of £0.1 million has been recognised in the current year representing £2.1 million of further redundancy and closure costs related to the Group’s restructuring programme, offset by a £2.2 million release of restructuring provisions booked last year in relation to this programme.Whilst the Group’s restructuring programme was completed in 2021, we retain restructuring provision of £1.18 million for the Group’s obligations at the balance sheet date (2020: £7.3 million). This provision includes remaining lease exit costs and multi-employer pension obligations for two sites which have been closed during the year. The cash outflows relating to the pension obligations may continue for up to 20 years, subject to any settlement being reached in advance of that date. Refer to note 23 for further information.

Net profit on disposal of business
The Group disposed of its 35% shareholding in Jenmetec Limited and the business assets associated with the Latrobe business during the year. These disposals generated a profit of £7.2 million and a loss of £0.1 million, respectively. Refer to note 2 for further information.

Business closure and exit costs
A £0.2 million charge relating to the liquidation of businesses in Europe and Asia.

2020
Impairment of non-financial assets
Technical Ceramics, ceramic cores
The significant downturn in aerospace demand in 2020 resulted in impairment losses of £28.8 million relating to the ceramic cores business. The impaired assets comprised intangible assets which had been recognised upon the acquisition of the Carpenter business in 2008, and property, plant and equipment.

Technical Ceramics, China
On 15 June 2020 the Group announced the closure of its Suzhou manufacturing facility in China and recognised £1.1 million relating to the impairment of property, plant and equipment.

Thermal Ceramics
Reduced demand in the aerospace, automotive and industrial market segments resulted in impairment losses of £35.7 million in Thermal Ceramics, which related to the closure of sites and under-utilised product lines, as well as the impairment of intangible assets recognised upon the acquisition of Porextherm in Germany in 2014.

Restructuring costs
Following the announcement of the Group’s restructuring programme in 2020 the Group recognised a £24.0 million charge which related to staff redundancies, site closure costs, legal and professional fees and the exit of certain multi-employer defined contribution pension plans.

Profit on disposal of business
On 31 August 2020, the Group completed the sale of its Diamonex business, based in Allentown, US. The transaction was structured as a sale of the business and related assets. Consideration of £3.9 million was recognised, which comprised £5.6 million cash paid on completion and £0.3 million of deferred consideration which was paid in 2021. A gain of £2.2 million was realised on disposal – see note 2 for more details.

<td>(0.2)</td>
</tr>
<tr>
<td>Statutory effective rate of tax</td>
<td>28.2</td>
</tr>
</tbody>
</table>

The effective rate of tax before specific adjusting items is 27.1% (2020: 27.2%).

The Group operates in many jurisdictions around the world and is subject to factors that may impact future tax charges including the recently enacted US tax reform, implementation of the OECD’s BEPS actions, tax rate and legislation changes, expiry of the statute of limitations and resolution of tax audits and disputes.

9. DISCONTINUED OPERATIONS

The Group disposed of its Composites and Defence Systems business on 20 November 2018. The business represented a separate reportable segment and therefore, in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, the disposal group was classified as discontinued.

The results from discontinued operations, which have been disclosed in the consolidated income statement, are set out below:

<table>
<thead>
<tr>
<th>31 December 2021</th>
<th>31 December 2020</th>
</tr>
</thead>
<tbody>

</table>

In 2021, £3.3 million of the specific adjusting items balance relate to the full and final settlement of certain long-term contracts. A further £2.4 million relates to the reassessment of certain provisions associated with the disposal of the Composites and Defence Systems business.

In 2020, specific adjusting items related to the reassessment of certain provisions associated with the disposal of the Composites and Defence Systems business.

There is no income tax expense in relation to the discontinued operations in either the current or preceding year.

Cash flows from discontinued operations are set out below:

</tbody>
</table>

The weighted average lease term is 12.2 years for land and buildings and 3.5 years for plant and equipment (2020: 13.2 years and 3.7 years respectively).

The maturity analysis of lease liabilities is presented in note 22.

Amounts recognised in the consolidated income statement in respect of leasing arrangements are set out in the table below:

<table>
<thead>
<tr>
<th></th>
<th>2021 £m</th>
<th>2020 £m</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>**(11.0)</td>
<td>(12.2)</td>
<td></td>
</tr>
</tbody>
</table>

At 31 December 2021, the Group is committed to future payments of £0.6 million (2020: £0.3 million) for short-term leases and leasing of low-value assets.

At 31 December 2021, the Group had entered into leases which had not yet commenced with future cash flows totalling £0.2 million (2020: £0.3 million).

The total of future minimum lease income under non-cancellable leases, where the Group is a lessor is £nil (2020: £0.3 million).
### 13. INTANGIBLE ASSETS continued

Goodwill is attributed to each operating segment as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>£m</th>
<th>2021</th>
<th>2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thermal Ceramics</td>
<td>84.5</td>
<td>84.6</td>
<td></td>
</tr>
<tr>
<td>Molten Metal Systems</td>
<td>9.0</td>
<td>9.0</td>
<td></td>
</tr>
<tr>
<td>Electrical Carbon</td>
<td>29.3</td>
<td>29.3</td>
<td></td>
</tr>
<tr>
<td>Seals and Bearings</td>
<td>14.9</td>
<td>14.9</td>
<td></td>
</tr>
<tr>
<td>Technical Ceramics</td>
<td>35.2</td>
<td>35.4</td>
<td></td>
</tr>
<tr>
<td>Total</td>
<td>172.9</td>
<td>172.2</td>
<td></td>
</tr>
</tbody>
</table>

Each operating segment is assessed for impairment annually and whenever there is an indication of impairment.

The carrying value of goodwill has been assessed with reference to its value in use, reflecting the projected discounted cash-flows of each operating segment to which goodwill has been allocated. The key assumptions used in determining value in use relate to growth rates and discount rates.

The cash flow projections in year one are based on the most recent Board approved budget. Cash flow projections for years two to five are based on the most recent Board approved strategic plan. The key assumptions that underpin these cash flow projections relate to sales and operating margins, which are based on past experience, taking into account the effect of known or likely changes in market or operating conditions. External data sources have been considered as to the strength and recovery of the Group’s end-markets in building an expectation of the future cash flows of each operating segment.

A 1.0% growth rate has been used for years beyond 2026 and to calculate a terminal value. Management has assessed these growth rates, including the terminal growth rate as reasonable for each operating segment.

In 2021, the Group has used the following pre-tax discount rates for calculating the value in use of each of the operating segments: Thermal Ceramics: 13.2%, Molten Metal Systems: 12.9%, Electrical Carbon: 12.3%, Seals and Bearings: 11.2%, Technical Ceramics: 11.1%.

The Directors have considered the following individual sensitivities and are confident that no impairment would arise for each of the Thermal Ceramics, Molten Metal Systems, Electrical Carbon, Seals and Bearings and Technical Ceramics cash-generating units in any one of the following three circumstances, which are considered reasonably possible changes:

- If the pre-tax discount rate was increased to 15%.
- If no growth was assumed for years two to five and in the calculation of terminal value.
- If the cash flow projections of all businesses were reduced by 25%.

### 14. INVESTMENTS

**2021 £m** | **2020 £m**
---|---
Non-current investments | – | 0.7 |
PFOCI – equity instrument | – | 0.5 |
Investment in associates | – | 7.2 |

**INVESTMENT IN ASSOCIATES**

On 28 April 2021, the Group completed the sale of its investment in associate, as detailed in note 2. The Group’s share of profit from its associate for the year was £0.4 million (2020: £0.6 million). The Group did not receive a dividend from its associate during the current or preceding year.

Details of the Group’s material associate at the end of the reporting period are as follows:

<table>
<thead>
<tr>
<th>Name of associate</th>
<th>Principal activity</th>
<th>Place of incorporation and principal place of business</th>
<th>Proportion of ownership interest/ voting rights held by the Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jemitile Limited</td>
<td>Manufacture of heat refractory shapes</td>
<td>United Kingdom</td>
<td>–</td>
</tr>
</tbody>
</table>

The above associate has been accounted for using the equity method in these consolidated financial statements.
14. INVESTMENTS continued

Summarised financial information in respect of the Group’s material associate is set out below. The summarised financial information below has been prepared in accordance with IFRSs (adjusted by the Group for equity accounting purposes).

<table>

15. RECOGNISED DEFERRED TAX ASSETS AND LIABILITIES

Deferred tax assets and liabilities are attributable to the following:

<table>
<thead>
<tr>
<th></th>
<th>2021 £m</th>
<th>2020 £m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Property, plant and equipment</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Right-of-use assets and lease liabilities</td>
<td>3.9</td>
<td>3.9</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>13.1</td>
<td></td>
</tr>
<tr>
<td>Employee benefits</td>
<td>10.8</td>
<td></td>
</tr>
<tr>
<td>Provisions</td>
<td>10.0</td>
<td></td>
</tr>
<tr>
<td>Tax value of loss carried forward recognised</td>
<td>1.0</td>
<td>0.6</td>
</tr>
<tr>
<td>Others</td>
<td>1.1</td>
<td></td>
</tr>
<tr>
<td>Offset</td>
<td>15.0</td>
<td></td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>40.1</td>
<td>24.4</td>
</tr>
</tbody>
</table>

UNRECOGNISED DEFERRED TAX ASSETS

Deferred tax assets have not been recognised in respect of the following items:

<table>
<thead>
<tr>
<th></th>
<th>2021 £m</th>
<th>2020 £m</th>
</tr>
</thead>
<tbody>
<tr>
<td>UK pension deficit</td>
<td>31.8</td>
<td>10.9</td>
</tr>
<tr>
<td>Tax losses</td>
<td>10.9</td>
<td>98.7</td>
</tr>
<tr>
<td>Capital losses</td>
<td>39.9</td>
<td>40.3</td>
</tr>
<tr>
<td>Other deductible temporary differences</td>
<td>75.1</td>
<td>61.4</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>277.7</td>
<td>320.3</td>
</tr>
</tbody>
</table>

Deferred tax assets have not been recognised in relation to these temporary differences due to uncertainty surrounding future utilisation. Based on current tax legislation the tax losses will not expire. Although the Group as a whole is profitable, the unrecognised losses relate to entities where it is not probable that there will be future taxable profits against which these losses can be utilised.

17. TRADE AND OTHER RECEIVABLES

Non-current

- Trade and non-trade receivables | 2.9 | 4.0 |

Current

- Gross trade receivables | 150.1 | 132.2 |
- Expected credit losses | (10.9) | (7.3) |
- Net trade receivables | 139.2 | 124.9 |
- Contract assets | 0.6 | 0.5 |
- Other non-trade receivables and prepayments | 21.6 | 18.7 |

The Group’s exposure to credit and currency risks related to trade and other receivables is disclosed in note 22.

Contract assets relate to the Group’s right to consideration for project-based business which was completed but not billed at the end of the year.
In 2021, the Group had restricted cash of £1.5 million (2020: £0.9 million) as a result of exchange controls in Argentina.

The capital redemption reserve arose when the Company redeemed Preference shares wholly out of distributable profits.

RETAINED EARNINGS

The capital redemption reserve arose when the Company redeemed Preference shares wholly out of distributable profits.

SHARE ISSUANCE

The Directors have declared an interim dividend of £0.4 million (2020: £0.4 million). The interim dividend is payable on 14 December 2021 to those shareholders on the register at 31 October 2021. The Directors recommend that the dividend be distributed on a scrip basis or in cash.

Consideration received in respect of shares transferred to participants of employee share schemes was £3.1 million (2020: £0.4 million). The market value of shares held by the Trust at 31 December 2021 was £4.8 million (2020: £2.1 million).
## 20. Capital and Reserves (continued)

### Dividends

The following Ordinary dividends were declared and paid by the Company:

<table>
<thead>
<tr>
<th></th>
<th>Per share</th>

</tr>
</thead>
<tbody>
<tr>
<td>In issue at beginning and end of period</td>
<td>285,369,988</td>
<td>285,369,988</td>
</tr>
</tbody>
</table>

As at the date of this Report 285,369,988 Ordinary shares have been issued (2020: 285,369,988).

Details of options outstanding in respect of Ordinary shares are given in note 24.

Additionally, the Company has authorised, issued and fully paid 437,281 (2020: 437,281) cumulative preference shares classified as borrowings totalling £0.4 million (2020: £0.4 million). The preference shares are comprised of 125,327 of 5.5% Cumulative First Preference shares of £1 each and 311,954 issued 5.0% Cumulative Second Preference shares of £1 each. The voting rights of these shares are set out below.

Dividends on the cumulative preference shares are presented within finance costs in the Group’s consolidated income statement.

### Voting Rights of Shareholders

#### Ordinary shares

The holders of Ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company.

### Preference shares

The 5.5% Cumulative First Preference shares of £1 each and the 5.0% Cumulative Second Preference shares of £1 each confer on the holders thereof the right to receive a cumulative preferential dividend at the rate of 5.5% and 5.0% respectively, calculated up to 30 June and 31 December in every year. The First and Second Cumulative Preference shares shall not entitle the holders thereof to attend or vote at any general meeting unless either:

(i) the meeting is convened to consider any resolutions for reducing the capital, or authorising any issue of debentures or debenture stock, or increasing the borrowing powers of the Board under the Articles of Association of the Company, or winding up, or sanctioning a sale of the undertaking, or altering the Articles in any manner affecting their respective interests, or any other resolutions directly altering their respective rights and privileges; or

(ii) at the date of the notice convening the general meeting the Preference dividend is upwards of one month in arrears from the payment date of any half-yearly instalment.

On a return of capital on a winding-up of the assets of the Company available for distribution shall be applied:

First, in payment to the holders of the First Preference shares of the amounts paid up on such shares, together with interest at the rate of 5.5% pa.

Second, in payment to the holders of the Second Preference shares of the amounts paid up on such shares, together with interest at the rate of 5.0% pa.

Third, in repaying the capital paid up or credited as paid up on the Ordinary shares.

Fourth, any surplus shall be distributed ratably amongst the holders of the Ordinary shares in proportion to the nominal amount paid up on their respective holdings of shares in the Company.

## 21. Borrowings and Lease Liabilities

This note provides information about the contractual terms of the Group’s borrowings and lease liabilities which are measured at amortised cost.

For more information about the Group’s exposure to interest rate and foreign currency risk, see note 22.

### Borrowing Facilities and Liquidity

All of the Group’s borrowing facilities are arranged by Group Treasury with Morgan Advanced Materials plc as the principal obligor. In a few cases operating subsidiaries have external borrowings but these are supervised and controlled centrally. Group Treasury seeks to obtain certainty of access to funding in the amounts, diversity of maturities and diversity of counterparties as required to support the Group’s medium-term financing requirements and to minimise the impact of poor credit market conditions.

### Financial Risk Management

This note presents information about the Group’s exposure to a variety of financial risks: credit risk, liquidity risk, market risk and foreign currency risk, and the Group’s management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

### Financial Risk Management and Treasury Policy

Group Treasury works within a framework of policies and procedures approved by the Audit Committee. It acts as a service centre for Morgan Advanced Materials plc’s businesses, not as a profit centre, and manages and controls risk in the treasury environment through the establishment of such procedures. Group Treasury seeks to align treasury goals, objectives and philosophy to those of the Group. It is responsible for all of the Group’s funding, liquidity, cash management, interest rate risk, foreign exchange risk and other treasury business. As part of the policies and procedures, there is strict control over the use of financial instruments to hedge foreign currencies and interest rates. Speculative trading in derivatives and other financial instruments is not permitted.

### Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Group is exposed to credit risk on financial instruments such as liquid assets, derivative assets and trade receivables. The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

<table>

</tr>
</tbody>
</table>
22. FINANCIAL RISK MANAGEMENT continued

FVOCI – EQUITY INSTRUMENTS

The Group limits its exposure to credit risk by only investing in liquid securities and only with counterparties that have a sound credit rating. Given these high credit ratings, management does not expect any counterparty to fail to meet its obligations.

TRADE AND OTHER RECEIVABLES

The Group’s exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Group’s customer base, including the default risk of the industries and countries in which customers operate, have less influence on credit risk.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. The Group does not require collateral in respect of financial assets.

The Group serves thousands of customers. Many of these have purchased the same product for several years in some and in several cases. Others have modified and enhanced designs or adopted the same components into new products, extending the lifecycle of the components that the Group supplies.

The Group’s level of customer retention is very high, particularly with its major accounts and, although the top 20 ranking will alter from year to year, many of the names remain consistent over time.

The Group establishes a provision that represents its estimate of expected credit losses in respect of trade and other receivables and investments. At the point the amount is considered irrecoverable it is written off against the financial asset directly.

The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions.

The Group seeks a balance between certainty of funding and a flexible, cost-effective borrowing structure. The policy is to ensure that the Group has sufficient borrowings and committed facilities to meet its medium-term financing requirements.

The following are the undiscounted contracted maturities of financial liabilities, including interest payments:

<table>
<thead>
<tr>
<th>CASH FLOWS ASSOCIATED WITH NON-DERIVATIVE FINANCIAL LIABILITIES</th>

</tr>
</tbody>
</table>

Bank and other borrowings include an unsecured multi-currency revolving credit facility set to mature in September 2024.

OFFSETTING FINANCIAL ASSETS AND LIABILITIES

The following table shows the amounts recognised for forward exchange contracts, which are subject to offsetting arrangements on a gross basis, and the amounts offset in the balance sheet.

The Group also has cash pooling agreements which cannot be offset under IFRS, but which could be settled net under the terms of matter netting agreements, are also presented in the table to show the total net exposure of the Group.

22. FINANCIAL RISK MANAGEMENT continued

LIQUIDITY AND FUNDING RISK

Liquidity is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by cash.

The Group’s approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions.

The Group seeks a balance between certainty of funding and a flexible, cost-effective borrowing structure. The policy is to ensure that the Group has sufficient borrowings and committed facilities to meet its medium-term financing requirements.

The following are the undiscounted contracted maturities of financial liabilities, including interest payments:

<table>
<thead>
<tr>
<th>CASH FLOWS ASSOCIATED WITH NON-DERIVATIVE FINANCIAL LIABILITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effective interest rate</td>
</tr>
<tr>
<td>------------------------</td>
</tr>
</tbody>
</table>

The Group limits its exposure to credit risk by only investing in liquid securities and only with counterparties that have a sound credit rating. Given these high credit ratings, management does not expect any counterparty to fail to meet its obligations.

The Group’s exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Group’s customer base, including the default risk of the industries and countries in which customers operate, have less influence on credit risk.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. The Group does not require collateral in respect of financial assets.

The Group serves thousands of customers. Many of these have purchased the same product for several years in some and in several cases. Others have modified and enhanced designs or adopted the same components into new products, extending the lifecycle of the components that the Group supplies.

MARKET RISK

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices, will affect the Group’s income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

The Group enters into derivatives for hedging purposes, and also incurs financial liabilities, in order to manage market risks. All such transactions are carried out in accordance with the Treasury Policy, which has been approved by the Audit Committee. Generally the Group seeks to apply hedge accounting in order to manage volatility in profit or loss.

INTEREST RATE RISK

The Group seeks to reduce the volatility in its interest charge caused by rate fluctuations. The proportions of fixed and floating rate debt are determined in order to manage volatility in profit or loss.

At the reporting date the interest rate profile of the Group’s interest-bearing financial instruments was:

<table>
<thead>
<tr>
<th></th>
<th>Floating rate</th>

<td>– – –</td>
</tr>
</tbody>
</table>

22. FINANCIAL RISK MANAGEMENT continued

FOREIGN CURRENCY RISK

Due to the international reach of the Group, currency transaction exposures exist. The Group has a policy in place to hedge all material firm commitments and a large proportion of highly probable forecast foreign currency exposures in respect of sales and purchases over the following 12 months, and achieves this through the use of foreign exchange markets. A significant proportion of the forward exchange contracts have maturities of less than one year after the balance sheet date. The Group continues its practice of not hedging income statement translation exposure.

There are exchange control restrictions which affect the ability of a small number of the Group’s subsidiaries to transfer funds to the Group. The Group does not believe such restrictions have had or will have any material adverse impact on the Group as a whole or the ability of the Group to meet its cash flow requirements.

The table below shows the Group’s currency exposures, being exposures on currency transactions that give rise to net currency gains and losses recognised in the income statement. Such exposures comprise the monetary assets and liabilities of the Group that are not denominated in the functional currency of the operating company involved.

<table>
<thead>
<tr>
<th></th>
<th>2021</th>
<th>2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>Functional currency of Group operations</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GBP</td>
<td>1.1</td>
<td>(0.1)</td>
</tr>
<tr>
<td>USD</td>
<td>2.2</td>
<td>0.3</td>
</tr>
<tr>
<td>Euro</td>
<td>3.6</td>
<td>0.4</td>
</tr>
<tr>
<td>Net balance sheet exposure</td>
<td>0.1</td>
<td>0.7</td>
</tr>
</tbody>
</table>

The amounts shown in the table take into account the effect of the forward contracts entered into to manage these currency exposures.

In respect of other monetary assets and liabilities held in currencies other than the currency of the reporting unit, the Group ensures that the net exposure is kept to an acceptable level, by buying or selling foreign currencies at spot rates where necessary to address short-term imbalances.

The Group classifies its forward exchange contracts which hedge forecasted transactions as cash flow hedges and states them at fair value. The fair value of forward exchange contracts used as hedges of forecasted transactions at 31 December 2021 was an asset of £nil (2020: £0.1 million).

The contractual cash flows associated with the forward exchange contracts that are designated as cash flow hedges are shown in the section on liquidity risk.

The impact on profit or loss is expected to occur at the same time as the associated cash flows.

Currency translation risks are controlled centrally. To defend against the impact of a permanent reduction in the value of its overseas net assets through currency depreciation, the Group seeks to match the currency of financial liabilities with the currency in which the net assets are denominated. This is achieved by raising funds in different currencies and through the use of hedging instruments such as swaps, and is implemented only to the extent that the Group’s gearing covenant under the terms of its borrowing documents, as well as its facility headroom, are likely to remain comfortably within limits.

In this way, the currency of the Group’s financial liabilities becomes more aligned to the currency of the trading cash flows that service them.

The Group’s currency split of total borrowings was as follows:

<table>
<thead>
<tr>
<th></th>
<th>2021</th>
<th>2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>GBP</td>
<td>0.5</td>
<td>71.7</td>
</tr>
<tr>
<td>USD</td>
<td>102.1</td>
<td>101.0</td>
</tr>
<tr>
<td>Euro</td>
<td>71.4</td>
<td>76.1</td>
</tr>
<tr>
<td>Other</td>
<td>174.0</td>
<td>248.8</td>
</tr>
</tbody>
</table>

The Group’s sensitivity to changes in foreign exchange rates on financial assets and liabilities as at 31 December 2021 is as follows:

Based upon the currency profile of the Group’s net financial assets and liabilities, if GBP had strengthened by 10%, reported net financial liabilities would have decreased by £7.9 million (2020: £41.1 million). Conversely, if GBP had weakened by 10%, reported net financial liabilities would have increased by £12.2 million (2020: £73.3 million). Assuming the change occurred on the balance sheet date, there would be no impact on reported profit as, either the net financial liabilities are in the same currency as that of the respective Group entity, or the change would be offset by an equal and opposite change in the foreign currency monetary items in the Group’s holding company.

The amounts generated from the sensitivity analysis are forward-looking estimates of market risk assuming certain adverse market conditions occur. Actual results in the future may differ materially from those projected results. The impact of a weakening in GBP on the Group’s financial assets and liabilities would be more than offset in equity and income by its impact on the Group’s overseas net assets and earnings respectively.
All hedging instruments are presented within derivative financial instruments on the group balance sheet. Forwards contracts (for terms not exceeding 12 months) to hedge the exchange rate risk arising from these anticipated future transactions. It is anticipated that highly probable forecast sales and purchases in UK, Europe, North America, Australia and Asia. The Group has entered into foreign exchange hedge accounting is no longer applied (2020: nil).

As at 31 December 2021 there was no balance in cash flow hedge reserve/foreign currency translation reserve arising from hedging relationships for which hedge accounting is no longer applied.

Weighted average hedge rates for the year were as follows:

<table>

**Other market price risk**

Equity price risk arises from FVOCI equity instruments held for meeting partially the unfunded portion of the Group’s defined benefit pension obligations. The primary goal of the Group’s investment strategy is to maximise returns in order to meet partially the Group’s unfunded benefit obligations.

**Capital management**

The Board seeks to maintain a balance between the advantages and security afforded by a sound capital position, and the higher returns that might be possible with higher levels of borrowings. The Board monitors capital using the indicators set out in the table below. These indicators are also presented excluding the impact of IFRS 16 Leases as these adjusted measures are more closely aligned to the Group’s covenants.

1. Definitions of these non-GAAP measures can be found in the glossary of terms on page 186, reconciliations of the statutory results to the adjusted measures can be found on pages 55 to 57.

The table above analyses financial instruments carried at fair value, by valuation method, together with the carrying amounts shown in the balance sheet. The fair value of cash and cash equivalents, current trade and other receivables/payables and floating-rate bank and other borrowings are excluded from the preceding table as their carrying amount approximates their fair value.

FAIR VALUE HIERARCHY

The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2: not traded in an active market but the fair values are based on quoted market prices or alternative pricing sources with reasonable levels of price transparency. Fair value is calculated using discounted cash flow methodology, future cash flows are estimated based on forward exchange rates
Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The major methods and assumptions used in estimating the fair values of financial instruments reflected in the preceding table are as follows:

EQUITY SECURITIES

Fair value is based on quoted market prices at the balance sheet date.

DERIVATIVES

Forward exchange contracts are marked to market using listed market prices or by discounting the contractual forward price and deducting the current spot rate.

FIXED-RATE BORROWINGS

Fair value is calculated based on discounted expected future principal and interest cash flows. The interest rates used to determine the fair value of borrowings are 1.0%-3.1% (2020: 0.9%-2.4%). There have been no transfers between Level 1 and Level 2 during 2021 and 2020 and there were no Level 3 financial instruments in either 2021 or 2020.

There were no changes in the Group’s approach to capital management during the year. Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.
23. PENSIONS AND OTHER POST-RETIREMENT EMPLOYEE BENEFITS

The Group operates a number of defined benefit arrangements as well as defined contribution plans. The defined benefit plans are primarily in the UK, US and Europe and predominantly provide pensions based on service and career-average pay. In addition post-retirement medical plans are operated in the US.

**DEFINED CONTRIBUTION PLANS**

The total expense relating to defined contribution plans in the current year was £10.7 million (2020: £11.6 million). The expense includes contributions to two US Multi-Employer Plans of £0.3 million (2020: £0.3 million) and a contribution to one German Multi-Employer Plan of £0.1 million (2020: £0.3 million).

The Group expects to contribute £11.0 million to ongoing defined contribution arrangements in 2022.
23. PENSIONS AND OTHER POST-RETIREMENT EMPLOYEE BENEFITS continued

**European schemes**

In Europe, the Group operates a number of retirement schemes, with the bulk of the obligations relating to arrangements for employees in Germany. In line with local practice these arrangements are not funded in advance, with benefits being met by the Group as they fall due.

ACTUARIAL ASSUMPTIONS
The actuarial liability in respect of global employee benefits will not be known until the last payments have been made. In placing a current estimate on the Group’s past service benefit obligations, a number of assumptions about the future are required. For defined benefit schemes, the Directors make annual estimates and assumptions in respect of discount rates, future changes in salaries, employee turnover, inflation rates, life expectancy and several other assumptions. In making these estimates and assumptions, the Directors consider advice provided by external advisers, such as actuaries.

The assumptions used are best estimate assumptions chosen from a reasonable range and which may not be borne out in practice. The principal assumptions are the discount rate and inflation assumptions which are long-term and measured on external factors, based upon each plan’s duration.

In addition to these, the mortality assumption in the UK and the US is material to the cost of the promised benefits. In the UK, the latest CMI mortality projection tables (CMI2020) have been used. A w2020 parameter of 20% for the Morgan Pension Scheme and 15% for the Morgan Group Senior Staff Pension and Life Assurance Scheme have been adopted to allow for the impact of COVID-19 on mortality. The extent of the impact of COVID-19 on each scheme has been assessed by additional scheme specific analysis. This assumption will continue to be reviewed at each accounting period. In both the UK and Europe, the assumed increases in salaries and pensions in payment are derived from assumed future inflation.

The rates shown below are single equivalents for the obligations as a whole derived from discounting along the yield curve. In line with IAS 19, in determining the value of the annuity contract held in the UK we have reflected the same methodology as used to value the corresponding obligations, reflecting the actual cash flow profile and duration of the insured obligations, rather than those of the Schemes as a whole.

Actuarial assumptions were:

2. Percentage increase in the UK reflects both fixed rate and RPI related increases to different elements of members’ pensions.
24. SHARE-BASED PAYMENTS

The Group operates various share option programmes that allow Group employees to acquire shares in the Company. During 2021, awards were made to Executives and senior employees under the Morgan Advanced Materials plc Long-Term Incentive Plan (LTP), the Morgan Advanced Materials plc Deferred Bonus Plan (DBP) and the Morgan Advanced Materials plc Restricted Stock Units (RSU). The Company also maintains a UK all-employee Sharesave scheme (Sharesave). Further details can be found in the Remuneration Report on pages 82 to 103.

The grant date fair value of options granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees become unconditionally entitled to the options. The amount recognised as an expense is adjusted to reflect the actual number of options for which the related service and non-market vesting conditions are met.

The charge expensed to the income statement in 2021 was £6.5 million (2020: £3.7 million).

The following options and awards were outstanding at 31 December 2021 in respect of Ordinary shares:

CLOSURE AND RESTRUCTURING PROVISIONS

Closure and restructuring provisions are based on the Group’s restructuring programmes and represent committed expenditure at the balance sheet date. The amounts provided are based on the costs of terminating relevant contracts, under the contract terms, and management’s best estimate of other associated restructuring costs including professional fees.

Whilst the Group’s restructuring programme was completed in 2021, we retain provisions for remaining lease exit costs and multi-employer pension obligations from two sites which have been closed during the year. The cash outflows relating to the pension obligations may continue for up to 20 years, subject to any settlement being reached in advance of that date.

LEGAL AND OTHER PROVISIONS

Legal and other provisions mainly comprise amounts provided against open legal and contractual disputes arising in the normal course of business and long-service costs. Provisions are made for the expected costs associated with such matters, based on past experience of similar items and other known factors, taking into account professional advice received, and represent management’s best estimate of the most likely outcome. The timing of utilisation of these provisions is frequently uncertain, reflecting the complexity of issues and the outcome of various court proceedings and associated negotiations.

Where obligations are not capable of being reliably estimated, or if a material outflow of economic resources is considered remote, it is classified as a contingent liability. The Group is the opinion of any claims that may be brought that may be defeated successfully and, therefore, the possibility of any material outflow in settlement is assessed as remote.

Subsidiary undertakings within the Group have given unsecured guarantees of £10.5 million (2020: £9.0 million) in the ordinary course of business.

ENVIRONMENTAL PROVISIONS

Environmental provisions are made for quantifiable environmental liabilities arising from known environmental issues. The amounts provided are based on the best estimate of the costs required to remedy these issues. At one site, a remediation feasibility study is currently being conducted in relation to a known environmental issue and in conjunction with the local Environmental Regulator. A remediation plan has been prepared. The provision recorded reflects the best estimate of the costs required to remedy these issues.

ENVIRONMENTAL CONTINGENT LIABILITIES

The Group is subject to local health, safety and environmental laws and regulations concerning its manufacturing operations around the world. These laws and regulations require the Group to take future action to remediate the impact of historical manufacturing processes on the environment or lead to other economic outflows. Such contingencies may exist for various sites which the Group currently operates or has operated in the past. There is a contingent liability arising from the as yet unknown environmental issues at the site referred to above, pending the completion of the feasibility study.

TAX CONTINGENT LIABILITIES

The Group is subject to periodic tax audits by various fiscal authorities covering corporate, employee and sales taxes in the various jurisdictions in which it operates. We have provided for estimates of the Group’s likely exposures where these can be reliably estimated. These are disclosed in notes 8 and 15.

26. CAPITAL COMMITMENTS

In 2021, commitments for property, plant and equipment and computer software expenditure for which no provision has been made in these accounts amount to £6.3 million (2020: £2.4 million) for the Group.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

27. RELATED PARTIES

IDENTIFICATION OF RELATED PARTIES

The Group has related party relationships with its subsidiaries (a list of all related undertakings and associates is shown in note 44), and with its Directors, executive officers and their close family members.

TRANSACTIONS WITH KEY MANAGEMENT PERSONNEL

The key-management of the Group and parent Company consists of the Board of Directors (including non-executive Directors) and members of the Executive Committee.

The compensation for the executive and non-executive Directors and members of the Executive Committee charged in the year was:

<table>
<thead>
<tr>

\[1\] Share-based payment expense represents the net IFRS 2 share-based payment (credit)/charge to the consolidated income statement in the year for the members of the Executive Committee.

The financial statements were approved by the Board of Directors on 3 March 2022 and were signed on its behalf by:

- Pete Raby
  - Chief Executive Officer

- Peter Turner
  - Chief Financial Officer
29. ACCOUNTING POLICIES

BASIS OF PREPARATION

These financial statements were prepared in accordance with Financial Reporting Standard 101: Reduced Disclosure Framework (FRS 101) and the Companies Act 2006.

The separate financial statements of the Company are presented as required by the Companies Act 2006. The Company meets the definition of a qualifying entity under FRS 101 Application of Financial Reporting Requirements issued by the FRC. Accordingly, these financial statements are prepared in accordance with Financial Reporting Standard 101: Reduced Disclosure Framework.

In these financial statements, the Company has applied the exemptions available under FRS 101 in respect of the following disclosures:

• A cash flow statement and related notes;
• Comparative period reconciliations for share capital, tangible fixed assets and intangible assets;
• Transactions with wholly owned subsidiaries;
• The effects of new but not yet effective IFRSs;
• The compensation of key management personnel; and
• Capital management.

As the consolidated financial statements of Morgan Advanced Materials plc include the equivalent disclosures, the Company has also taken the exemptions under FRS 101 available in respect of the following disclosures:

• IFRS 2 Share-Based Payments in respect of Group-settled share-based payments; and
• The disclosures required by IFRS 7 Financial Instruments Disclosures.

The Company proposes to continue to adopt the reduced disclosure framework of FRS 101 in its next financial statements.

Under Section 408(4) of the Companies Act 2006 the Company is exempt from the requirement to present its own income statement or statement of comprehensive income.

The Company’s financial statements are presented in its functional currency, pounds sterling, generally rounded to the nearest million.

The Company’s financial statements are prepared on a going concern basis as set out in note 1 the consolidated financial statements of the Group.

The accounting policies set out below have, unless otherwise stated, been applied consistently to the period presented in these financial statements.

FOREIGN CURRENCY

Transactions in foreign currencies are translated to the Company’s functional currency at the foreign exchange rate ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities are denominated in foreign currencies that are stated at fair value are retranslated to the functional currency at foreign exchange rates ruling at the dates the fair value was determined.

INTANGIBLE ASSETS

Intangible assets that are acquired by the Company are stated at cost less accumulated amortisation and less accumulated impairment losses. Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of intangible assets unless such lives are indefinite. Intangible assets with an indefinite useful life and goodwill are systematically tested for impairment at each balance sheet date. Other intangible assets are amortised from the date they are available for use. The estimated useful lives are as follows:

Software: 3-7 years

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is stated at cost less accumulated depreciation and accumulated impairment losses. Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of each part of an item of tangible fixed assets.

Land is not depreciated. The estimated useful lives are as follows:

Plant, equipment and fixtures: 3-20 years

Buildings: 50 years

Depreciation methods, useful lives and residual values are reviewed at each balance sheet date.
29. ACCOUNTING POLICIES continued

LEASING
The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee.

The lease liability is initially measured at the present value of future lease payments including adjustments for any lease incentives receivable. Lease payments are to be made under reasonable certain options are also included in the measurement of the liability. Lease payments are discounted using the interest rate implicit in the lease. That rate cannot be readily determined, which is generally the case of leases in the company, the lease’s incremental borrowing rate is used, and being the rate the individual lessees would have to pay to borrow the funds necessary to obtain an asset of similar value on similar terms.

The right-of-use-assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement date, less any lease incentives received and initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter of the lease term and useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

INVESTMENTS IN SUBSIDIARIES
Investments in subsidiaries are carried at cost less provision for impairment. The Company tests the investment balances for impairment annually or when there are indications of impairment. If any such indication of impairment exists, the Company makes an estimate of its recoverable amount. Where the carrying amount of an investment exceeds its recoverable amount, the investment is considered impaired and is written down to its recoverable amount. Where these circumstances have reversed, the impairment previously made is reversed to the extent of the original cost of the investment.

FINANCIAL INSTRUMENTS
Financial instruments and financial liabilities are recognised in the Company balance sheet when the Company becomes party to the contractual provisions of the instrument.

CLASSIFICATION OF FINANCIAL INSTRUMENTS ISSUED BY THE COMPANY
Financial instruments issued by the Company are treated as equity only to the extent that they meet the following two conditions:

a) they include no contractual obligations upon the Company to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Company; and

b) where the instrument will or may be settled in the Company’s own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Company’s own equity instruments or is a derivative that will be settled by the Company’s exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of an equity instrument, it is treated as a derivative that includes no obligation to deliver a variable number of the Company’s own equity instruments or is a derivative that will be settled by the Company’s exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

NON-DERIVATIVE FINANCIAL INSTRUMENTS
Non-derivative financial instruments comprise investments in equity and debt securities, trade and other debtors, cash and cash equivalents, loans and borrowings, and trade and other creditors.

TRADE AND OTHER DEBTORS
Trade and other debtors are recorded initially at transaction price and subsequently measured at amortised cost. This results in their recognition at nominal value less an allowance for any doubtful debts. The allowance for doubtful debts is recognised based on management’s expectation of losses without regard to whether an impairment trigger happens or not (an ‘expected credit loss’ (ECL) model). The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECL.

TRADE AND OTHER CREDITORS
Trade and other creditors are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method. The Directors consider that the carrying amount of trade payables approximates to their fair value.

INTEREST-BEARING BORROWINGS
Interest-bearing bank loans and overdrafts are initially recorded at fair value on the date the consideration received, net of direct issue costs. They are subsequently held at amortised cost using the effective interest method. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for using an effective interest method and are added to or deducted from the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

29. ACCOUNTING POLICIES continued

IMPAIRMENT OF FINANCIAL ASSETS
The Company recognises provisions for expected credit losses (ECLs) on financial assets measured at amortised cost. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk with lifetime ECL recognised when there has been a significant increase in credit risk since initial recognition. Life ECL represents the expected credit losses that will result from all possible defaults over the expected life of the financial instrument.

To assess whether the credit risk has increased significantly since initial recognition the Company compares the risk of default occurring at the reporting date with the risk of default at the date of initial recognition. The Company utilises both qualitative and quantitative information to support this assessment, including historical experience and forward-looking information.

The Company considered amounts due from Group undertakings to be in default when the borrower is unlikely to pay its credit obligations to the Company in full. A financial asset is ‘credit-impaired’ when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

DERIVATIVE FINANCIAL INSTRUMENTS
Derivative financial instruments are recognised at fair value. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss. The Group enters into derivative financial instruments to manage its exposure to foreign exchange rate risks including non-designated foreign exchange contracts as detailed in note 48.

A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. Derivatives are not offset in the financial statements unless the Group has both a legally enforceable right and intention to offset. The impact of the Master Netting Agreements on the Group’s financial position is disclosed in note 22. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not due to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

EMPLOYEE BENEFITS
Defined contribution plans
A defined contribution plan is a post-employment benefit plan under which the Company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement in the periods during which services are rendered by employees.

Defined benefit plans
A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company’s net obligation in respect of defined benefit pension plans and other post-employment benefits is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods, that benefit is discounted to present value using a discount rate that reflects the Group’s perception of future market yields for a portfolio of high-quality, high-grade fixed-rate bonds and using mortality rates approximating to those used by the Group’s actuaries. The calculation is performed by a qualified actuary using the projected unit credit method. When the calculation results in a benefit to the Company, the recognised asset is limited to the total of any unrealised past service costs and the present value of benefits available in the form of any future refunds from the plan, reductions in future contributions to the plan or settlement of the plan and takes into account the adverse effect of any minimum funding requirements.

Actuarial gains and losses that have arisen since the adoption of IFRS 101 are recognised in the period that they occur directly into equity through the statement of comprehensive income.

The Company is the sponsoring and principal employer of two UK defined benefit pension Schemes, the Morgan Pension Scheme and the Morgan Group Senior Staff Pension and Life Assurance Scheme (the UK Schemes). The Company also guarantees certain obligations and liabilities to the employees that currently participate in the two UK Schemes. During 2016 the Company adopted a new policy to allocate costs associated with the UK pension schemes between the Company and the participating employee. The Company assessed the impact on the financial statements of the reclassification and recognised a liability for the unfunded portion of the UK Schemes. This ensures that the pension liability is reflected in the entity that employed the participant. Previously all of the Scheme assets and liabilities were recognised on the balance sheet of the Company only. Further details are provided in note 33.

Share-based payment transactions
Share-based payment arrangements in which the Company receives goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by the Company.

The grant date fair value of share-based payments awards granted to employees is recognised as an expense, with a corresponding increase in equity, over the period in which the employees become unconditionally entitled to the awards. Share-based payment charges and credits relating to awards granted to employees of subsidiaries are recharged to those subsidiaries with a corresponding entry in the Company’s income statement. The fair value of the awards granted is measured using an option valuation model, taking into account the terms and conditions upon which the awards were granted. The grant date recognised as an expense is adjusted to reflect the actual number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do not meet the related service and non-market performance conditions at the vesting date. For share-based payment awards with non-vesting conditions, the grant date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

Share-based payment transactions in which the Company receives goods or services by incurring a liability to transfer cash or other assets that is based on the price of the Company’s equity instruments are accounted for as cash-settled share-based payments. The fair value of the amount payable to employees is recognised as an expense, with a corresponding increase in liabilities, over the period in which the employees become unconditionally entitled to payment. The liability is remeasured at each balance sheet date and at settlement date. Any changes in the fair value of the liability are recognised as personal expense in profit or loss.

Disclosure of the share-based payment transactions can be found in note 24 to the Group financial statements.
29. ACCOUNTING POLICIES continued

Own shares held by The Morgan General Employee Benefit Trust

Transactions of the Group sponsored Morgan General Employee Benefit Trust are treated as being those of the Company and are therefore reflected in the Company’s financial statements. In particular, the Trust’s purchases and sales of shares in the Company are debited and credited to equity.

PROVISIONS

A provision is recognised in the balance sheet when the Company has a present legal or constructive obligation as a result of a past event that can be reliably measured, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects risks specific to the liability where the effect of discounting is expected to be material.

TAXATION

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of goodwill; the initial recognition of assets or liabilities that affect neither accounting nor taxable profit other than in a business combination; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised.

DIVIDENDS ON SHARES PRESENTED WITHIN SHAREHOLDERS’ FUNDS

Dividends unpaid at the balance sheet date are only recognised as a liability if that date is the extent to which the Company has appropriately approved and are no longer at the discretion of the Company. Unpaid dividends that do not meet these criteria are disclosed in the notes to the financial statements.

FINANCIAL GUARANTEE CONTRACTS

Where the Company enters into financial guarantee contracts to guarantee the indebtedness of other companies within its Group, the Company considers these to be insurance arrangements, and accounts for them as such. In this respect, the Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the Company will be required to make a payment under the guarantee, at which point a liability would be recognised.

USE OF JUDGEMENTS AND ESTIMATES

In preparing these financial statements, management has made judgements, estimates, and assumptions that affect the application of the Company’s accounting policies and the reported amount of assets, liabilities, income and expenses.

In addition to the areas of judgement and estimates outlined in note 1 to the consolidated Group financial statements, the Company also identifies the assumptions required in investments impairment assessments as a source of significant risk of resulting in a material adjustment to the asset carrying values of the Company. Assessment of impairment relies on the use of estimates of the future profitability in a multiple based valuation which may differ from the actual results achieved. Due to global economic uncertainty, there is an increased level of risk and therefore a key source of estimate uncertainty in these assumptions, see note 34 for sensitivity analysis.

30. STAFF NUMBERS AND COSTS

The average number of persons employed by the Company (including Directors) during the year was as follows:

Number of employees 2021 2020
Directors and corporate staff 58 63

Full details of the Directors’ remuneration for the period can be found in the Remuneration Report on pages 84 to 105.

Aggregate employee-related costs were as follows:

<table>
<thead>
<tr>
<th>Note</th>
<th>2021 £m</th>

After a year of global economic recovery and an improvement in forecasts, management conducted a review of the Company’s investment in subsidiary undertakings. Following this review management identified the reversal of impairment losses of £119.6 million (2020: £nil) against a number of Shares in Group undertakings which reflected the increased expectation in future cash flows arising from these investments. In addition, management identified the reversal of impairment losses of £0.7 million (2020: £nil) against loans following loan repayments.

In the prior year impairment losses of £68.9 million and £9.7 million were against a number of Shares in Group undertakings and loans respectively. There were no impairment losses recognised in the current year.

The impairment assessment of Shares in Group undertakings uses the Board approved, 2022 budgets in an EBITDA* multiple valuation, which is sensitive to changes in the principal assumptions. A 2% increase in either EBITDA* or the multiple would increase the carrying value of the share in Group undertakings by £4.3 million. Management consider these changes to be reasonable possible. In 2021, no borrowings were secured on the assets of the Company (2020: £nil).

Note 44 to the financial statements gives details of the Company’s fixed asset investments.

In 2021, no borrowings were secured on the assets of the Company (2020: £nil).
39. EMPLOYEE BENEFITS: PENSIONS

DEFINED BENEFIT PLANS

The Company participates in two defined benefit pension schemes, the Morgan Pension Scheme and the Morgan Group Senior Staff Pension and Life Assurance Scheme (the Schemes). The Schemes were closed to new entrants on 1 August 2011, with any new employees receiving benefits through the Morgan Group Personal Pension Plan, a defined contribution arrangement. The Morgan Group Senior Staff Pension and Life Assurance Scheme was closed to the future accrual of benefits on and with effect from 6 April 2016. The Morgan Pension Scheme was closed to the future accrual of benefits on and with effect from 6 April 2018. Current employees, including those who were active in the Schemes at closure, were auto-enrolled into The Morgan Group Personal Pension Plan for their future pension benefits.

The Group operates a defined contribution pension plan (the Morgan Group Personal Pension Plan). The total Company expense relating to this plan is included in administrative expenses. The assumptions used are best estimate assumptions chosen from a range of possible actuarial assumptions which may not be borne out in practice. The assumptions are the discount rate and inflation assumptions which are long-term and measured on external factors, based upon each plan’s duration. In addition to these, the mortality assumption in the UK is material to the cost of the promised benefits. The assumed increases in salaries and pensions in payment are derived from assumed future inflation.

NOTES TO THE COMPANY BALANCE SHEET

39. EMPLOYEE BENEFITS: PENSIONS continued

Principal actuarial assumptions at the year end were as follows:

<table>
<thead>
<tr>
<th>Assumptions</th>
<th>2021 £m</th>
<th>2020 £m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inflation (RPI/CPI)</td>
<td>3.40/2.61</td>
<td>2.88/2.03</td>
</tr>
<tr>
<td>Discount rate</td>
<td>1.92</td>
<td>1.23</td>
</tr>
<tr>
<td>Pensions increase</td>
<td>3.00/0.32/0.75</td>
<td>3.00/0.28/0.56</td>
</tr>
<tr>
<td>Salary increase</td>
<td>n/a</td>
<td>n/a</td>
</tr>
<tr>
<td>Mortality – post-retirement:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Life expectancy of a male aged 60 in accounting year (years)</td>
<td>26.0</td>
<td>26.3</td>
</tr>
<tr>
<td>Life expectancy of a male aged 60 in accounting year + 20 (years)</td>
<td>27.4</td>
<td>27.8</td>
</tr>
</tbody>
</table>

Funding

The most recent full actuarial valuations of the Schemes were undertaken as at March 2019 and resulted in combined assessed deficits of £120.3 million. On the basis of these full valuations, the Trustees of the Schemes, having consulted with the Group, agreed past service deficit recovery payments totaling £66.5 million a year from January 2020 (Company: £5.4 million), increasing by 2.75% pa until 2025, with further payments to Morgan Pension Scheme for 2026 and 2027. This recovery plan is subject to approval from the UK Pensions Regulator. New full valuations are due with effective dates of March 2022 and the outcome of those consultations will determine the Group’s future contribution requirements, with any new deficit arising needing to be met through the payment of additional contributions.

Sensitivity analysis

The sensitivities of the Company’s net balance sheet to the principal assumptions are:

<table>
<thead>
<tr>
<th>Change in assumption</th>
<th>2021 effect £m</th>
<th>2020 effect £m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount rate</td>
<td>Decrease by 0.1%</td>
<td>2.1</td>
</tr>
<tr>
<td>Inflation</td>
<td>Increases by 0.1%</td>
<td>0.8</td>
</tr>
<tr>
<td>Mortality – post-retirement</td>
<td>Pensioners live 1 year longer</td>
<td>5.1</td>
</tr>
</tbody>
</table>

These sensitivities have been calculated to show the movement in the net balance sheet in isolation, and assuming no other changes in market conditions at the accounting date (except where a fully matching insurance policy is held where this asset is assumed to change in value to match the change in obligations). This is unlikely in practice, for example, a change in discount rate is unlikely to occur without any movement in the value of the assets held by the Company’s schemes.

Defined contribution plans

The Group operates a defined contribution pension plan (the Morgan Group Personal Pension Plan). The total Company expense relating to this plan in 2021 was £6.6 million (2020: £6.6 million).

40. PROVISIONS AND CONTINGENT LIABILITIES

Dilapidation provisions £m | Other provisions £m | Total £m
---|---|---
Provisions made during the year | 0.3 | 3.3 | 3.6
Provisions used during the year | (0.2) | (0.1) | (0.3)
Effects of movement on foreign exchange | – | (0.1) | (0.1)
Balance at 31 December 2021 | 0.1 | 5.0 | 5.1

Other provisions relate to legal claims and are based on the Company’s assessment of the probable cost of these activities.
40. PROVISIONS AND CONTINGENT LIABILITIES continued
Contingent liabilities and guarantees
Where the Company enters into financial guarantee contracts to guarantee the indebtedness of other companies within its Group, the Company considers these to be insurance arrangements, and accounts for them as such. In this respect, the Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the Company will be required to make a payment under the guarantee, at which point a liability would be recognised.

The Group has been subject to legal claims in a number of countries. In some cases it will not be possible to form a view, either because the facts are unclear or because further time is needed to properly assess the merits of the case, and no provisions are held against such cases. The Board, having taken legal advice, is of the opinion that the remainder of these actions will not have a material impact on the Company’s financial position.

The Company participates in a cash pooling arrangement provided by Lloyds Bank plc with other UK Group companies. As part of that pooling arrangement, the Company has provided a Guarantee for any liabilities of the other participating companies to the bank. Limited to the lower of:

a) an amount equal to the base currency amount of the total liabilities in the cash pool; and
b) an amount equal to the base currency amount of the guarantor’s own net asset balance in the cash pool.

At the balance sheet date, the guaranteed amount was £0.1m (2020: £1.5m).

There are no other contingent liabilities in the Company as at 31 December 2021.

41. SHARE CAPITAL

Ordinary Shares

<table>
<thead>
<tr>
<th>In issue at beginning and end of the period</th>
<th>2021</th>
<th>2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shares owned by 25% each</td>
<td>71.3</td>
<td>71.3</td>
</tr>
</tbody>
</table>

Ordinary Shares of 25 pence each

Additionally the Company has authorised, issued and fully paid 497,281 (2020: 471,281) cumulative preference shares classified as borrowings totaling £0.4m (2020: £0.4m). The preference shares comprise 125,337 of 5.5% Cumulative First Preference shares of £1 each and 311,954 issued 5.0% Cumulative Second Preference shares of £1 each.

Refer to note 20 for details of the rights to dividends, voting rights and return of capital to the Preference shares.

For proposed Ordinary dividends see the consolidated income statement on page 118.

42. SHARE PREMIUM AND RESERVES

The merger reserve comprises the balance associated with the premium of shares issued during previous acquisitions. Further details on share premium and reserves are given in note 20.

Apex Financial Services (Trust Company) Limited administer The Morgan General Employee Benefit Trust (the Trust) in which shares are held to satisfy awards granted under the Company’s share plans. The shares are distributed via discretionary settlement governed by the rules of the Trust deed dated 1 March 1996 (as amended).

The total number of own shares held by the Trust at 31 December 2021 was 1,360,098 (2020: 841,880) and at that date had a market value of £4.6 million (2020: £2.6 million).

In 2021, the amount of reserves of Morgan Advanced Materials plc that may be distributed under Section 831(4) of the Companies Act 2006 was £281.5 million (2020: £148.3 million). This comprises a portion of the profit and loss account.

43. RELATED PARTIES

The Company has related party relationships with its subsidiaries, its associates, its Directors and executive officers and their close family members. The Company is exempt from providing information relating to these parties with the exception of transactions with entities where the Company does not directly or indirectly own 100% of the shareholding, these are set out in the table below.

<table>
<thead>

45. DERIVATIVE FINANCIAL ASSETS AND LIABILITIES

|  | 2021 £m | 2020 £m | 2021 £m | 2020 £m |
--- | --- | --- | --- | --- |
Derivative financial assets | | | | |
Forward foreign exchange contracts non-designated | | | | |
– amounts falling due within one year | 1.0 | 1.4 | – | –
– amounts falling due after more than one year | 8.2 | 10.1 | 9.2 | 11.5

Derivative financial liabilities | | | | |
Forward foreign exchange contracts non-designated | | | | |
– amounts falling due within one year | (0.9) | (1.6) | (2.7) | (5.5)
– amounts falling due after more than one year | (2.6) | (5.6) | | |

Fair values are measured using a hierarchy where the inputs are:

1. Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities.
2. Level 2 – not traded in an active market but the fair values are based on quoted market prices or alternative pricing sources with reasonable levels of price transparency. Fair value is calculated using discounted cash flow methodology, future cash flows are estimated based on forward exchange rates.
3. Level 3 – inputs for the assets or liability that are not based on observable market data (unobservable inputs).

The derivative financial assets and liabilities are all measured using Level 2 inputs. The fair value of forward foreign exchange contracts is estimated by discounting the future cash flows using appropriate market-sourced data at the balance sheet date.

GROUP STATISTICAL INFORMATION

Diluted adjusted earnings per share | 22.8p | 26.7p | 28.0p | 19.0p |
Diluted adjusted earnings per share | 27.0p | 28.0p | 28.0p | 19.0p |

1. The Group disposed of the Companies and Defences Systems business in 2019, the disposal group comprised the Companies and Defences Systems operating segment and has been classified as a discontinued operation under IFRS 5. Figures for 2016-2017 have been restated to reflect these changes.
2. Figures for 2016-2017 have been restated to reflect the Group’s cumulative preference share as borrowings. See note 1 to the consolidated financial statements.
3. 2020 has been restated to reflect the adoption of IFRS 16 Revenue from Contracts with Customers in 2018.
4. On 31 March 2020, the Group announced the Board’s decision to withdraw the proposed 2019 final dividend due to the financial uncertainty resulting from the COVID-19 pandemic.
5. Definitions of these non-GAAP measures can be found in the glossary of terms on page 148; reconciliation of the statutory results to the adjusted measures can be found on pages 15 to 17.

OVERVIEW

Governance

Financial statements
This document has been prepared for and only for the members of the Company as a body and no other persons. Its purpose is to assist members in assessing how the Directors have performed their duties, the Company’s strategies and the potential for those strategies to succeed and for no other purpose. Save as would otherwise arise under English law, the Company, its Directors, employees, agents or advisers do not accept or assume responsibility or liability to any third parties to whom this document is shown or into whose hands it may come and any such responsibility or liability is expressly disclaimed.

This document contains forward-looking statements that are subject to risk factors associated with, amongst other things, the economic and business circumstances occurring from time to time in the countries, sectors and markets in which the Group operates. These and other factors could adversely affect the outcome and financial effects of the plans and events described. Forward-looking statements by their nature involve a number of risks, uncertainties and assumptions because they relate to events and/or depend on circumstances that may or may not occur in the future and could cause actual results and outcomes to differ materially from those expressed in or implied by the forward-looking statements.

It is believed that the expectations reflected in these statements are reasonable, but they may be affected by a wide range of such variables. No assurances can be given that the forward-looking statements in this document will be realised. The forward-looking statements reflect the knowledge and information available at the date this document was prepared and will not be updated during the year that will be considered in the Annual Report for next year. Nothing in this document should be construed as a profit forecast.

**Glossary of Terms**

- **Constant-currency**: Constant-currency revenue and Group adjusted operating profit are derived by translating the prior year results at current year average exchange rates.
- **Corporate costs**: Corporate costs consist of the costs of the central head office.
- **Free cash flow before acquisitions, disposals and dividends**: Cash generated from continuing operations less net capital expenditure, net interest paid, tax paid and lease payments.
- **Group earnings before interest, tax, depreciation and amortisation (EBITDA)**: EBITDA is defined as operating profit before specific adjusting items, amortisation of intangible assets and depreciation.
- **Group adjusted operating profit**: Operating profit adjusted to exclude specific adjusting items and amortisation of intangible assets.
- **Group organic**: The Group results excluding acquisition, disposal and business exit impacts at constant-currency.
- **Adjusted earnings per share (EPS)**: Adjusted earnings per share is defined as operating profit adjusted to exclude specific adjusting items and amortisation of intangible assets, plus share of profit of associate less net financing costs, income tax expense and non-controlling interests, divided by the weighted average number of Ordinary shares during the period.
- **Net debt**: Net debt is defined as provisions, cash and cash equivalents, borrowings, bank overdrafts and lease liabilities.
- **Net cash and cash equivalents**: Net cash and cash equivalents is defined as cash and cash equivalents less bank overdrafts.
- **Return on invested capital (ROIC)**: Group adjusted operating profit divided by capital employed at average total assets.
- **Specific adjusting items**: See note 6 and note 1 to the consolidated financial statements for further details.

1. Reconciliation of these non-GAAP measures to GAAP measures can be found on pages 55 to 57.
SHAREHOLDER INFORMATION

COMPANY DETAILS

Company name change The Company changed its name to Morgan Advanced Materials plc (from The Morgan Crucible Company plc) on 27 March 2013. Following this change, share certificates issued in the name ‘The Morgan Crucible Company plc’ remain valid (replacement share certificates in the name ‘Morgan Advanced Materials plc’ were not issued to existing shareholders).

Registered office York House, Sheet Street, Windsor, SL4 1DD
Registered in England and Wales No. 286773
Telephone: +44 (0)1753 837000
www.morganadvancedmaterials.com

Website The Company’s website provides information about the Group including the markets in which it operates, its strategy and recent news from the Group. The Investors section is a key source of information for shareholders, containing details of financial results, shareholder meetings and dividends, and providing access to frequently asked questions. Current and past annual half-year and sustainability & responsibility reports are also available to view and download.

Company registrars Equiniti Limited, Aspect House, Spencer Road, Lancing, West Sussex, BN99 6DA
Telephone: +44 (0)371 384 2412
Website: www.shareview.co.uk
Lines are open between 8.30am and 5.30pm, Monday to Friday (excluding UK public holidays).
Shareholders with queries relating to their shareholding should contact Equiniti directly. Alternatively, shareholders may find the Investors section of our website useful for general enquiries.

Shareview portfolio
www.shareview.co.uk
This is a service, which enables shareholders to manage their shareholdings online.

Dividend payments
You can choose to receive your dividend in a number of ways. Dividends will automatically be paid to you by cheques in UK sterling and sent to your registered address unless you have chosen one of the options below:

Direct payment to your bank
Cash dividends can be paid directly to a UK bank or building society account. This means that your dividend reaches your bank account on the payment date, it is more secure (cheques can sometimes get lost in the post), you avoid the inconvenience of depositing a cheque and cheque fraud is reduced. If you are a shareholder who has a UK bank or building society account you can arrange to have dividends paid direct via a bank/building society mandate. You can add or change your mandate online at www.shareview.co.uk, or by contacting Equiniti.

Overseas payments
If you live overseas and would like dividends paid to an overseas account, please contact Equiniti by post to set up or amend a mandate. They offer an overseas payment service for 90 countries worldwide. Please see further information at www.shareview.co.uk.

Multiple accounts on the shareholder register
If a shareholder receives two or more sets of AGM documents, or multiple dividend payments, this means that there is more than one account in their name on the shareholder register, perhaps because the name or the address appears on each account in a slightly different way. If you have multiple accounts and would like them to be combined, please contact Equiniti.

Buying and selling shares
Equiniti offer a service to buy and sell shares in UK listed companies. For more information, visit www.shareview.co.uk or call 03456 037 037. Providing this information is not a recommendation to buy or sell shares and this service may not be suitable for all shareholders.

The price and value of any investments and income from them can fluctuate and may fall. Therefore, you may get back less than the amount you invested. Past performance is not a guide to future performance.

Neither the Company nor Equiniti provides advice or makes recommendations about investments. If you have any doubts about the suitability of an investment, you should seek advice from a suitably qualified professional advisor.

Donate your shares to charity
If you have only a small number of shares which are uneconomical to sell, you may wish to consider donating them to charity, free of charge, through ShareGift (registered charity 1052686), a charity that specialises in the donation of small, unwanted shareholdings to good causes. You can find out more by visiting www.sharegift.org or by telephoning +44 (020) 7930 3737.

Unsolicited telephone calls and mail
Shareholders in companies may receive unsolicited phone calls or correspondence concerning investment matters. If you are offered unsolicited investment advice, discounted shares, a premium price for shares you own, or if you receive a share company or research reports, please check the company or person contacting you is properly authorised by the Financial Conduct Authority before getting involved. Further information about what you should do is available on our website in the ‘Shareholder Centre’ within the Investors section.

Asset Reunification Programme
Morgan has launched a tracing programme with the aim of reuniting lost shareholders or their estates with unclaimed cash entitlements in respect of Morgan dividend payments. Cash entitlements may not have been claimed due to an address change, or where a Shareholder is deceased and the beneficiaries or executors of an estate are not aware of the holding. If you would like to clarify whether you or a deceased person for whose estate you act holds shares in Morgan please contact Equiniti for further assistance.
USING ADVANCED MATERIALS TO MAKE THE WORLD MORE SUSTAINABLE, AND TO IMPROVE THE QUALITY OF LIFE.
